Solving the Homework Problem by Flipping the Learning Jonathan Bergmann, 2017-04-11 Teachers view homework as an opportunity for students to continue learning after the bell rings For many students it is often just the dreaded H word How can educators change the way students view homework while ensuring that they still benefit from the additional learning it provides It is easy Flip the learning In Solving the Homework Problem by Flipping the Learning Jonathan Bergmann the co founder of the flipped learning concept shows you how The book outlines why traditional homework causes dread and frustration for students how flipped learning completing the harder or more analytical aspects of learning in class as opposed to having students do it on their own improves student learning and how teachers can create flipped assignments that both engage students and advance student learning Bergmann introduces the idea of flipped videos and provides step by step guidance to make them effective The book also includes useful forms a student survey and a sample letter to send to parents explaining the flipped learning concept You want your students to learn and your students want learning to be accessible With that in mind read through these pages flip the learning in your classroom and watch students get excited about homework

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i.e. extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner

developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation Instructional Moves for Powerful Teaching in Higher Education Jeremy T. Murphy,Meira Levinson,2023-03-07 A toolkit of strategies for postsecondary instructors to use to cultivate safe inclusive learning spaces and improve teaching Based on work conducted through the Instructional Moves project at Harvard University Instructional Moves for Powerful Teaching in Higher Education outlines the many ways in which good college and graduate school teaching is rooted in deliberate pedagogical choices that support active learning Jeremy T Murphy and Meira Levinson distill good instruction to its essential components analyzing the careful steps successful instructors take to create learning spaces that encourage all students to do ambitious work Profiling professors in a range of contexts and disciplines Murphy and Levinson take readers on deep dives into individual instructors teaching methods in actual classrooms Each real world example is accompanied by a set of practical action points that can be adopted by both new and experienced instructors communities of practice and educational developers and coaches Collectively the examples underscore how students with differing abilities diverse identities and disparate worldviews can all benefit from student centered learning environments in which collaboration is valued and students are afforded opportunities to apply what they have learned Murphy and Levinson spotlight inclusive instructional moves such as community building exercises interactive lectures and discussion facilitation that nurture a sense of belonging and encourage student engagement in both in person and online settings They also explore the benefits of innovative teaching formats such as flipped classrooms simulations and virtual learning Instructional Moves for Powerful Teaching in Higher Education illustrates how pedagogical shifts small and large can improve college teaching powerfully

Handbook of College Science Teaching Joel J. Making Scientists Gregory Light,Marina Micari,2013-03-05 Gregory Light and Marina Micari reject the view that science technology engineering and mathematics are elite disciplines restricted to a small number with innate talent Rich in concrete advice Making Scientists offers a new paradigm of how scientific subjects can be taught at the college level Handbook on Personalized Learning for States, Districts, and Schools Marilyn Murphy,Sam Redding,Janet Twyman,2016-07-01 The recent passage of the Every Student Succeeds Act ESSA presents new opportunities and greater flexibility in efforts to personalize learning for all children The Handbook on Personalized Learning for States Districts and Schools provides insight and guidance on maximizing that new flexibility Produced by the Center on Innovations in Learning CIL one of seven national content centers funded by the U S Department of Education this volume suggests how teachers can enhance personalized

learning by cultivating relationships with students and their families to better understand a child's learning and motivation. Personalized learning also encourages the development of students' metacognitive, social, and emotional competencies, thereby fostering students' self-direction in their own education, one aimed at mastery of knowledge and skills and readiness for career and college. Chapters address topics across the landscape of personalized learning, including co-designing instruction and learning pathways with students, variation in the time, place, and pace of learning, including flipped and blended classrooms, and using technology to manage and analyze the learning process. The Handbook's chapters include Action Principles to guide states, districts, and schools in personalizing learning.

Active Learning in College Science Joel J. Mintzes, Emily M. Walter, 2020-02-23

This book explores evidence-based practice in college science teaching. It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching. In editing this book, we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines. Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence. Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges, 4-year liberal arts institutions, comprehensive regional campuses, and flagship research universities. In keeping with Wieman's challenge, our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences. The content is structured as follows: after an Introduction based on Constructivist Learning Theory, Section I the practices we explore are Eliciting Ideas and Encouraging Reflection; Section II Using Clickers to Engage Students; Section III Supporting Peer Interaction through Small Group Activities; Section IV Restructuring Curriculum and Instruction; Section V Rethinking the Physical Environment; Section VI Enhancing Understanding with Technology; Section VII and Assessing Understanding; Section VIII. The book's final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses. The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events. Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years. In this view, learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base. For most students, that knowledge base is riddled with a host of naïve notions, misconceptions, and alternative conceptions they have acquired throughout their lives. To a considerable extent, the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view, to assist as students restructure and reconcile their newly acquired knowledge, and to provide opportunities for students to evaluate what they have learned and

apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for **Behavior Analysis for Effective Teaching** Julie S.
