Ebook: Microeconomics, Global Edition MCCONNELL, 2011-09-16 *Ebook Microeconomics Global Edition Business Groups and Strategic Coopetition* Wioletta Mierzejewska, Patryk Dziurski, 2022-12-30 *Business Groups and Strategic Coopetition* sheds lights on the poorly recognised problem of intra organisational relationships within business groups by adopting the coopetition lens It brings together the strategic management coopetition and performance and international management perspectives business groups and its role in the economy It is a unique proposition as those two research streams such as business groups and coopetition are rarely assessed together The coopetition which is seen as the strategy of value creating in the rapidly changing environment brings benefits such as an increased innovation cost reduction access to resources and improved competitive position that could be captured by business groups as well However the understanding of complex organisations such as business group and answering the question how to manage intra level coopetition to gain better performance therein is still unclear Therefore the book aims to extend the knowledge in the field of internal relationships within business groups as well as the coopetition phenomenon This book is written to meet needs of researchers students as well as managers and to present an integrated view on the coopetition within business groups

What's Wrong with Economics? Robert Skidelsky, 2020-04-28 A passionate and informed critique of mainstream economics from one of the leading economic thinkers of our time This insightful book looks at how mainstream economics quest for scientific certainty has led to a narrowing of vision and a convergence on an orthodoxy that is unhealthy for the field not to mention the societies which base policy decisions on the advice of flawed economic models Noted economic thinker Robert Skidelsky explains the circumstances that have brought about this constriction and proposes an approach to economics which includes philosophy history sociology and politics Skidelsky's clearly written and compelling critique takes aim at the way that economics is taught in today's universities where a focus on modelling leaves students ill equipped to grapple with what is important and true about human life He argues for a return to the ideal set out by John Maynard Keynes that the economist must be a mathematician historian statesman and philosopher in equal measure
