Puckett, 2021-06-22 We all have a past that we sometimes try to forget When a situation arises that reminds us of our past we must not allow it to dictate our future but somehow use our past experiences to propel us to do better As our society deals with issues of racism and hate between people of different races gender and ethnicity groups it brings back memories of my childhood while living as a Black person in the mid 1950s and the 1960s In this book I highlight some of the events I personally experienced others that were told to me by reliable sources and some are fictional to give the reader a snapshot of what it was like being born and living during these times The stories I tell in this book draws the contrast between two small boys of different skin colors and how they didn t allow the color of their skin to affect their friendship and the comparison between two different sets of parents who taught their children to love people of all skin colors and treat others the way you would want to be treated Sometimes our past leaves bruises and wounds that cannot be healed by us alone but with God s help we can heal over time **The Mathematical Coloring Book** Alexander Soifer, 2008-10-13 This is a unique type of book at least I have never encountered a book of this kind The best description of it I can give is that it is a mystery novel developing on three levels and imbued with both educational and philosophical moral issues If this summary description does not help understanding the particular character and allure of the book possibly a more detailed explanation will be found useful One of the primary goals of the author is to interest readers in particular young mathematicians or possibly pre mathematicians in the fascinating world of elegant and easily understandable problems for which no particular mathematical knowledge is necessary but which are very far from being easily solved In fact the prototype of such problems is the following If each point of the plane is to be given a color how many colors do we need if every two points at unit distance are to receive distinct colors More than half a century ago it was established that the least number of

colors needed for such a coloring is either 4 or 5 or 6 or 7 Well which is it Despite efforts by a legion of very bright people many of whom developed whole branches of mathematics and solved problems that seemed much harder not a single advance towards the answer has been made This mystery and scores of other similarly simple questions form one level of mysteries explored In doing this the author presents a whole lot of attractive results in an engaging way and with increasing level of depth

More Love, Less Panic Claude Knobler, 2015-01-02 In this heartwarming and hilarious memoir Claude Knobler describes how he learned the hard way that the apple actually can fall far from the tree and that s Okay Already the biological parents of a seven year old son and a five year old daughter Claude Knobler and his wife decided to adopt Nati a five year old Ethiopian boy who seemed different from Knobler in every conceivable way After more than five years spent trying to turn his wild silly adopted African son into a quiet neurotic Jewish guy like himself Knobler realized the importance of having the courage to love accept and let go of his children In this wonderfully written memoir Knobler explains how his experiences raising Nati led him to learn a lesson that applied equally well to parenting his biological children It s essential to spend the time we are given with our children to love them and enjoy them rather than push and mold them into who we think they should be
