Federation News ,1925 It's Elementary ,2007 Comprehensive guide for educators featuring strategies and lesson plans for incorporating LGBT issues and curriculum into K 8 classrooms Also includes resources on school and community organizing safe schools policy legal information and professional development *Defining Hybrid Homeschools in America* Eric Wearne,2020-10-28 Defining Hybrid Homeschools in America Little Platoons explores the idea of hybrid homeschools where students attend a formal school setting for part of the week and are homeschooled the rest of the week Eric Wearne observes that school choice in America typically comes in two forms programs set up for disadvantaged students and the more common form of choice that wealthy parents can exercise paying private tuition or moving to a more desirable school district While disadvantaged families in many places and wealthy families everywhere can exercise choice when it comes to schooling a sizeable group typically gets left out of those options the large number of families who are too wealthy to access state or local programs but not wealthy enough to pay for private schooling or moving expenses Wearne argues that this is a long term weakness for school choice in America the middle class is generally a well off demographic but is almost completely unserved when it comes to this large aspect of their children's lives However one low cost option has arisen to address this niche hybrid home schools Wearne cites existing research to argue for this model's efficacy for the middle class as a strong example of a healthy civil society and examines how policy definitions are breaking down and evolving in education as we challenge the existing definitions of schooling Indoor Thermal Comfort Perception Kristian Fabbri,2015-06-30 Providing a methodology for evaluating indoor thermal comfort with a focus on children this book presents an in depth examination of children's perceptions of comfort Divided into two sections it first presents a history of thermal comfort the human body and environmental parameters common thermal comfort indexes and guidelines for creating questionnaires to assess children's perceptions of indoor thermal comfort It then describes their understanding of the concepts of comfort and energy and the factors that influence that perception In this context it takes into account the psychological and pedagogical aspects of thermal comfort judgment as well as architectural and environmental characteristics and equips readers with the knowledge needed to effectively investigate children's perspectives on environmental ergonomics The research field of indoor thermal comfort adopts on the one hand physical parameter measurements and comfort indexes e.g Predicted Mean Vote PMV or adaptive comfort and on the other an ergonomic

assessment in the form of questionnaires However the latter can offer only limited insights into the issue of comfort as children often use different terms than adults to convey their experience of thermal comfort The book aims to address this lack of understanding with regard to children's perceptions of indoor thermal comfort The book is intended for HVAC engineers and researchers architects and researchers interested in thermal comfort and the built environment It also provides a useful resource for environmental psychologists medical and cognitive researchers
