*Ecstatic Worlds* Janine Marchessault, 2023-10-31 When media translate the world to the world twentieth century utopian projects including Edward Steichen's *Family of Man* Jacques Cousteau's underwater films and Buckminster Fuller's *Geoscope* Postwar artists and architects have used photography film and other media to imagine and record the world as a wonder of collaborative entanglement to translate the world for the world In this book Janine Marchessault examines a series of utopian media events that opened up and expanded the cosmos creating ecstatic collective experiences for spectators and participants Marchessault shows that Edward Steichen's 1955 *Family of Man* photography exhibition for example and Jacques Cousteau's 1956 underwater film *Le monde du silence* *The Silent World* both gave viewers a sense of the earth as a shared ecology The Festival of Britain 1951 in particular its Telekinema a combination of 3D film and television and its Live Architecture exhibition along with Expo 67's cinema experiments and media city created an awareness of multiple worlds Toronto's alternative microcinema CineCycle Agnès Varda's 2000 film *Les glaneurs et la glaneuse* and Buckminster Fuller's *World Game* *Geoscope* representing ecologies of images and resources encouraged planetary thinking The transspecies communication platform the Dolphin Embassy devised by the Ant Farm architecture collaborative extends this planetary perspective toward other species and Finnish artist Erkki Kurenniemi's *Death of the Planet* projects a postanthropocentric future Drawing on sources that range from the Scottish town planner Patrick Geddes to the French phenomenologist Maurice Merleau-Ponty Marchessault argues that each of these media experiments represents an engagement with connectivity and collectivity through media that will help us imagine a new form of global humanism

**Neptune's Laboratory** Antony Adler, 2019-11-19 We have long been fascinated with the oceans and sought to pierce the profundity of their depths But the history of marine science also tells us a lot about ourselves Antony Adler explores the ways in which scientists politicians and the public have invoked ocean environments in imagining the fate of humanity and of the planet

**Wicked Problems** Guru Madhavan, 2024-03-26 An ode to systems engineers whose invisible work undergirds our life and an exploration of the wicked problems they tackle Our world is filled with pernicious problems How for example did novice pilots learn to fly without taking to the air and risking their lives How should cities process mountains of waste without polluting the environment Challenges that tangle personal public and planetary aspects often occurring in health care infrastructure business and policy are known as wicked problems and they are not going away anytime soon In linked

chapters focusing on key facets of systems engineering efficiency vagueness vulnerability safety maintenance and resilience engineer Guru Madhavan illuminates how wicked problems have emerged throughout history and how best to address them in the future He examines best known tragedies and lesser known tales from the efficient design of battleships to a volcano eruption that curtailed global commerce and how maintenance of our sanitation systems constitutes tikkun olam or repair of our world Braided throughout is the uplifting tale of Edwin Link an unsung hero who revolutionized aviation with his flight trainer In Link s story Madhavan uncovers a model mindset to engage with wickedness An homage to society s innovators and maintainers Wicked Problems offers a refreshing vision for readers of all backgrounds to build a better future and demonstrates how engineering is a cultural choice one that requires us to restlessly find ways to transform society but perhaps more critically to care for the creations that already exist      **The Branches of Ecology** Frank N.

Egerton,2023-01-31 The ecological sciences are a diverse array of major scientific disciplines They grew from minor sciences with little status in 1900 and now occupy crucial areas of research bearing on the future of our planet This book describes a century of growth and development A dramatic century long rise in the status of ecological knowledge was accompanied by the rise of professional ecological organizations the establishment of university faculties and the creation of government agencies advising on conservation natural resources and the prevention of pollution Like all sciences ecology continues to yield new findings and surprising revelations New technologies now address existential challenges facing our world This book documenting the rise of ecology is an inspiring history portending an important role in the twenty first century Key Features The author is the acknowledged authority on the history of ecology The content is familiar to members of the Ecological Society of America but has not previously been assembled into a single narrative Appropriate for a course in the history of ecology Provides a broad perspective on ecology Related Titles Egerton F N A Centennial History of the Ecological Society of America ISBN 978 0 3673 7763 2 Rieppel O Phylogenetic Systematics Haeckel to Hennig ISBN 978 0 3678 7645 6 Dronamraju K A Century of Geneticists Mutation to Medicine ISBN 978 1 4987 4866 7      **Ocean Science and the British Cold War State** Samuel A. Robinson,2018-05-03 This book focuses on the activities of the scientific staff of the British National Institute of Oceanography during the Cold War Revealing how issues such as intelligence gathering environmental surveillance the identification of enemy science along with administrative practice informed and influenced the Institute s Cold War program In turn this program helped shape decisions taken by Government military and the civil service towards science in post war Britain This was not simply a case of government ministers choosing to patronize particular scientists but a relationship between politics and science that profoundly impacted on the future of ocean science in Britain      **The Physics of Scuba Diving** Marlow Anderson,2011-06-28 The Physics of Scuba Diving features questions at the end of each chapter for which answers can be found by visiting <http://nup.com/physics-of-scuba-diving-answer.aspx>      **Sustainable Development and Resilience of Tourism** Deepak Chhabra,Navin Atal,Alka Maheshwari,2024-08-29 This volume examines

progress in sustainable and resilient development of niche forms of tourism from a health and wellbeing perspective. It also aims to offer deep and innovative insights on the supporting role of non pharmaceutical interventions to enhance resilience and wellbeing of visited and visiting communities. A comparative and critical discourse of the role of hard medicine is also offered from both a core and supplementary perspective particularly from eudaimonic and physiologically restorative standpoints. Furthermore indigenous non pharmaceutical interventions and spiritual healing mechanisms are discussed in the context of their potential to facilitate long term immunity and happiness. The book conceptually situates health as a fourth pillar of sustainability and examines its role in stimulating long lasting transformations rooted in positive psychology inner transformation and sustainable consumption of organic products and services. It designs an evolving transformational Quality of Life paradigm that strengthens the foundations of health wellbeing based sustainable development initiatives and resilience of tourism systems. The work will be of interest to academic professional and various public and private stakeholders of tourism such as destination marketing organizations policy makers hospitality industries tour operators host communities NGOs and government agencies.

**Ice Ghosts** Paul Watson, 2017-03-21 Intriguing and enjoyable. Ian McGuire New York Times Book Review. Ice Ghosts weaves together the epic story of the lost Franklin Expedition of 1845 whose two ships HMS Erebus and HMS Terror and their crew of 129 were lost to the Arctic ice with the modern tale of the scientists divers and local Inuit behind the recent incredible discoveries of the wrecks. Paul Watson a Pulitzer Prize winning journalist who was on the icebreaker that led one of the discovery expeditions tells a fast paced historical adventure story and reveals how a combination of faith in Inuit knowledge and the latest science yielded a discovery for the ages.

**The Dream Machine** Richard Whittle, 2010-04-27 A fascinating and authoritative narrative history of the V 22 Osprey revealing the inside story of the most controversial piece of military hardware ever developed for the United States Marine Corps. When the Marines decided to buy a helicopter airplane hybrid tiltrotor called the V 22 Osprey they saw it as their dream machine. The tiltrotor was the aviation equivalent of finding the Northwest Passage an aircraft able to take off land and hover with the agility of a helicopter yet fly as fast and as far as an airplane. Many predicted it would reshape civilian aviation. The Marines saw it as key to their very survival. By 2000 the Osprey was nine years late and billions over budget bedeviled by technological hurdles business rivalries and an epic political battle over whether to build it at all. Opponents called it one of the worst boondoggles in Pentagon history. The Marines were eager to put it into service anyway. Then two crashes killed twenty three Marines. They still refused to abandon the Osprey even after the Corps own proud reputation was tarnished by a national scandal over accusations that a commander had ordered subordinates to lie about the aircraft's problems. Based on in depth research and hundreds of interviews The Dream Machine recounts the Marines quarter century struggle to get the Osprey into combat. Whittle takes the reader from the halls of the Pentagon and Congress to the war zone of Iraq from the engineer's drafting table to the cockpits of the civilian and Marine pilots who risked their lives flying the Osprey and sometimes lost them. He

reveals the methods motives and obsessions of those who designed sold bought flew and fought for the tiltrotor These stories including never before published eyewitness accounts of the crashes that made the Osprey notorious not only chronicle an extraordinary chapter in Marine Corps history but also provide a fascinating look at a machine that could still revolutionize air travel

**Why Forests? Why Now?** Frances Seymour, Jonah Busch, 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time averting climate change and promoting development Despite their importance tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest rich countries The good news is that the science economics and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation *Why Forests Why Now* synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent affordable and achievable

*Bright Signals* Susan Murray, 2018-06-12 Susan Murray traces four decades of technological cultural and aesthetic debates about the possibility use and meaning of color television within the broader history of twentieth century visual culture

*Expeditions as Experiments* Marianne Klemun, Ulrike Spring, 2016-10-18 This collection focuses on different expeditions and their role in the process of knowledge acquisition from the eighteenth century onwards It investigates various forms of scientific practice conducted during after and before expeditions and it places this discussion into the scientific context of experiments In treating expeditions as experiments in a heuristic sense we also propose that the expedition is a variation on the laboratory in which different practices can be conducted and where the transformation of uncertain into certain knowledge is tested The experimental positioning of the expedition brings together an ensemble of techniques strategies material agents and social actors and illuminates the steps leading from observation to facts and documentation The chapters show the variety of scientific interests that motivated expeditions with their focus on natural history geology ichthyology botany zoology helminthology speleology physical anthropology oceanography meteorology and magnetism

**Deep Learning** Stellan Ohlsson, 2011-01-31 Although the ability to retain process and project prior experience onto future situations is indispensable the human mind also possesses the ability to override experience and adapt to changing circumstances Cognitive scientist Stellan Ohlsson analyzes three types of deep non monotonic cognitive change creative insight adaptation of cognitive skills by learning from errors and conversion from one belief to another incompatible belief For each topic Ohlsson summarizes past research re formulates the relevant research questions and proposes information processing mechanisms that answer those questions The three theories are based on the principles of redistribution of activation specialization of practical knowledge and re subsumption of declarative information Ohlsson develops the implications of those mechanisms by scaling their effects with respect to time complexity and social interaction The book ends with a unified theory of non monotonic cognitive change that

captures the abstract properties that the three types of change share
