Local Anesthesia For Dental Professionals:

Local Anesthesia for Dental Professionals Kathy B. Bassett, Arthur C. DiMarco, 2010 Local Anesthesia for Dental Professionals is designed to meet the requirements of comprehensive courses in local anesthesia for both dental hygiene and dental programs. It includes extensive ancillary student and instructor resources including clearly stated objectives for each chapter, easy-to-reference tables, relevant case studies, question and answer banks, and laboratory skill assessments. In addition to separate chapters on topical anesthetics, dose considerations, inadequate anesthesia, specialty factors, and anatomic factors, this text includes troubleshooting factors and considerations specific to each technique. *Local Anesthesia in Dentistry* Jesús Calatayud, Mana Saraghi, 2024-01-16 Local Anesthesia in Dentistry Distills the current body of knowledge in local anesthesia into a single, easy-to-use volume. Local Anesthesia in Dentistry: A Locoregional Approach provides comprehensive coverage of all aspects of local anesthetics, including anatomic considerations, pharmacology, armamentarium, injection techniques, indications, contraindications, complications, novel anesthetics, formulations, and more. In-depth chapters offer clear criteria and guidelines for patient care, supported by hundreds of evidence-based references. Alongside this standalone, appendices are hosted on the book's companion website. In these appendices, the authors have distilled a wide body of research, summarizing the findings of the seminal studies in the field, including historical landmark studies and clinical trial data to support practical aspects of locoregional anesthesia discussed in the textbook. This easy-to-use volume provides students and professionals with a one-stop resource on local anesthesia in dentistry. Offers critical evaluations of research and literature on each topic and subtopic. Addresses all common local anesthetic techniques, including basic injection, mandibular and maxillary anesthesia, and local anesthesia in children. Features practical, quantitative data and step-by-step information on situations encountered in daily practice. Designed to support all levels of dental professionals. Local Anesthesia in Dentistry: A Locoregional Approach is written by two highly experienced practitioners, making this authoritative resource a must-have for dentists, dental nurses, dental technicians, hygienists, specialists, students, and researchers. It is also a valuable reference for other healthcare providers looking to support future study. **The Administration and Use of Local Anesthesia Among Registered Dental Hygienists** Mason Colón, 2021 The administration of local anesthesia is an important focus in the field of dentistry, and its application has facilitated painless treatment among patients, allowing dental professionals to provide appropriate patient care. Current research related to the success and safety of local anesthesia application among registered dental hygienists evidences its importance. However, there presents a lack of research related to the administration of local anesthetic among dental hygienists in different practice settings, as well as the utilization rate. The purpose of this study is to identify the utilization rate of local anesthesia by dental hygienists and identify the reasoning associated with use or non-use of this skill. A quantitative cross-sectional survey research design was used on a non-probability sample of dental hygienists practicing in the state of Ohio. The survey

was designed with demographic questions questions regarding use of local anesthesia the non use of local anesthesia and attitudes related to local anesthesia application The data evidenced that 95 7% reported having administered local anesthesia while licensed Results further indicated that 93 5% reported that they like to administer local anesthesia The findings from this study suggest that there is active utilization of local anesthesia among registered dental hygienists and that there is an appreciation for the skill Additional research is recommended to explore the qualitative reasons for use and non use of local anesthesia and the perceptions related to this skill and to better understand the potential relationships among variables associated with the profession of dental hygiene and local anesthesia application
