Handbook of Community-Based Participatory Research Steven S. Coughlin,Selina A. Smith,Maria Eulalia Fernández,2017 Community based participatory research CBPR emerged in response to the longstanding tradition of top down research studies in which social scientists observe social phenomena and community problems as outsiders separate from the participants daily lives CBPR is more immersive fostering partnerships between academic and community organizations that increase the value and consequence of the research for all partners The current perspectives gleaned from this school of research have been wildly well received in no small part because they address the complexity of the human experience in their conclusions HANDBOOK OF COMMUNITY BASED PARTICIPATORY RESEARCH codifies the methods and theories of this research approach and articulates an expansive vision of health that includes gender equality safe and adequate housing and freedom from violence Topic based chapters apply the theory and methods of CBPR to real world problems affecting women ethnic and racial minorities and immigrant communities such as sexual violence exposure to environmental toxins and lack of access to preventive care as well as suggesting future directions for effective culturally sensitive research HANDBOOK OF COMMUNITY BASED PARTICIPATORY RESEARCH is required reading for academics policy makers and students seeking meaningful social change through scholarship

Population Health Intervention Research Daniel W. Harrington,Sara McLafferty,Susan J. Elliott,2016-07-22 Health geographers are well situated for undertaking population health intervention research PHIR and have an opportunity to be at the forefront of this emerging area of inquiry However in order to advance PHIR the scientific community needs to be innovative with its methodologies theories and ability to think critically about population health issues For example using alternatives e g community based participatory research to traditional study designs such as the randomised control trial health geographers can contribute in important ways to understanding the complex relationships between population health both intended and unintended consequences interventions and place Representing a diverse array of health concerns ranging across chronic and infectious diseases and research employing varied qualitative and quantitative methodologies the contributions to this book illustrate how geographic concepts and approaches have informed the design and planning of intervention s and or the evaluation of health impacts For example the authors argue that geographically targeting interventions to places of high need and tailoring interventions to local place contexts are critically important for intervention success Including an

afterword by Professor Louise Potvin this book will appeal to researchers interested in population and public community health and epidemiology as well as health geography **Food and World Culture** Linda S. Watts,Kelty

Clark-Mahoney,2022-08-23 This book uses food as a lens through which to explore important matters of society and culture In exploring why and how people eat around the globe the text focuses on issues of health conflict struggle contest inequality and power Whether because of its necessity pleasure or ubiquity the world of food and its lore proves endlessly fascinating to most people The story of food is a narrative filled with both human striving and human suffering However many of today s diners are only dimly aware of the human price exacted for that comforting distance from the lived world realities of food justice struggles With attention to food issues ranging from local farming practices to global supply chains this book examines how food s history and geography remain inextricably linked to sociopolitical experiences of trauma connected with globalization such as colonization conquest enslavement and oppression The main text is structured alphabetically around a set of 70 ingredients from almonds to yeast Each ingredient s story is accompanied by recipes Along with the food profiles the encyclopedia features sidebars These are short discussions of topics of interest related to food including automats diners victory gardens and food at world s fairs This project also brings a social justice perspective to its content weighing debates concerning food access equity insecurity and politics **Agriculture, Rural Development, Food and Drug**

Administration, and Related Agencies Appropriations for 2012 United States. Congress. House. Committee on Appropriations. Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies,2011 *Inequality in America* Robert S. Rycroft,Kimberley Kinsley,2021-06-18 This authoritative reference work

explores the factors driving the much debated increase in economic inequality in U S society as well as the impact that this divide is having on U S culture politics families communities and institutions This reference work provides an authoritative and comprehensive resource for both students and scholars who are interested in learning more about the rich poor divide in the United States a divide regarded by many lawmakers researchers pundits and concerned citizens as one of the nation s most serious problems The book provides important historical background for understanding how the nation has grappled with or ignored this issue in the past examines specific causes of inequality identified by observers across the political spectrum and summarizes the potential consequences both present and future of economic inequality This book examines more than 25 issues frequently cited as factors contributing to the rapidly widening gap between socioeconomic classes in the U S ranging from such demographic factors as race and gender to tax code provisions and differences in access to quality education and health care The book also provides both a retrospective and prospective look at government policies aimed at addressing inequality or assisting the poor Finally the book looks ahead to survey the future of inequality in America **The Neoliberal Diet** Gerardo Otero,2018-10-03 This remarkable comprehensive study of neoliberal agribusiness and the obesity epidemic is critical reading for food studies scholars Contemporary Sociology Obesity rates are rising across the United

States and beyond While some claim that people simply eat too much energy dense food while exercising too little The Neoliberal Diet argues that the issue is larger than individual lifestyle choices Since the 1980s the shift toward neoliberal regulation has enabled agribusiness multinationals to thrive by selling a combination of meat and highly processed foods loaded with refined flour and sugars a diet that originated in the United States Drawing on extensive empirical data Gerardo Otero identifies the socioeconomic and political forces that created this diet which has been exported around the globe at the expense of people s health Otero shows how state level actions particularly subsidies for big farms and agribusiness have ensured the dominance of processed foods and made fresh foods inaccessible to many Comparing agrifood performance across several nations including the NAFTA region and correlating food access to class inequality he convincingly demonstrates the structural character of food production and the effect of inequality on individual food choices Resolving the global obesity crisis Otero concludes lies not in blaming individuals but in creating state level programs to reduce inequality and make healthier food accessible to all

Measuring Diets and Food Choice in the Context of a Changing World Winnie Bell, Christine Blake, Shauna Downs, 2025-08-06 Historically research in low and middle income countries has been focused on what people consume with less attention to how and why people choose to consume the foods that they do As incomes rise and local food environments undergo rapid changes providing consumers with a wider array of options at competitive prices understanding the underlying drivers of food choice including the preferences and values that underpin them has become increasingly important In recent years there have been renewed efforts to understand the drivers of food choice in the context of changing food environments and broader food system and how these drivers link with food consumption The goal of this Research Topic is to look beyond dietary consumption what people eat by considering more holistically the various drivers of food choice how and why people eat the foods they do to better understand what underpins individual decisions Ultimately by understanding why people make the choices they do especially when situated in the local food environment and or broader food system we can identify important entry points for behavior change interventions develop a better understanding about the role of food safety in food choice decisions improve the environment climate and food systems through improved knowledge on the drivers of food choice and learn about how changing livelihoods shifts dynamics related to food choice amongst other important research tied to drivers of food choice
