Series in Specialty Competencies in Professional Psychology Series Editors Arthur M. Nezu and Christine Maguth Nezu. As the field of psychology continues to grow and new specialty areas emerge and achieve recognition, it has become increasingly important to define the standards of professional specialty practice. Developed and conceived in response to this need for practical guidelines, this series presents methods, strategies, and techniques for conducting day-to-day practice in any given psychology specialty. The topical volumes address best practices across the functional and foundational competencies that characterize the various psychology specialties, including clinical psychology, cognitive and behavioral psychology, school psychology, geropsychology, forensic psychology, clinical neuropsychology, couples and family psychology, and more. Functional competencies include common practice activities like assessment and intervention, while foundational competencies represent core knowledge areas such as ethical and legal issues, cultural diversity, and professional identification. In addition to describing these competencies, each volume provides a definition, description, and development timeline of a particular specialty, including its essential and characteristic pattern of activities, as well as its distinctive and unique features. Written by recognized experts in their respective fields, volumes are comprehensive, up-to-date, and accessible. Le narcissisme pathologique est une maladie mentale qui se caractérise par une estime de soi excessive et une incapacité à reconnaître les besoins des autres. Un profond sentiment d'insécurité sous-jacent. O incapacitate de a se conecta la ceea ce simt sau gândesc ceilalți. Multiplele fațete ale tulburării narcisice de personalitate pun clinicienii în fața unor provocări unice. Autorii cărții de față recunosc aceste provocări și oferă un ghid care integrează cercetarea contemporană cu teoria psihanalitică permițând psihoterapeuților acces la abordări și strategii pentru a lucra cu pacienții cu tulburare narcisică de personalitate care se poate fi adaptată la fiecare situație clinică.
