Important

Some operators have found that when they fill up with the correct amount of oil, the level on the dipstick is too high due to the fact that it takes a while for the oil to run into the final drives.

Opening the Vent plugs helps to speed this up.

Using a filter wrench turn the filter counter-clockwise to remove it.

Lightly smear the rubber seal on the new

filter with oil to ensure, turn it clockwise

until the seal compresses the hose and then turn it

another 1/2 turn to tighten it.
