Making Choices In Health Who Guide To Cost Effectiveness Analysis:

Making Choices in Health T. Tan-Torres Edejer, 2003 **Making Choices in Health** World Health Organization, 2003

The Guide in Part I begins with a brief description of generalized CEA and how it relates to the two questions raised above. It then considers issues relating to study design, estimating costs, assessing health effects, discounting, uncertainty, and sensitivity analysis, and reporting results. Detailed discussions of selected technical issues and applications are provided in a series of background papers originally published in journals but included in this book for easy reference in Part II from the back cover.

Making Choices in Health: WHO Guide to Cost-effectiveness Analysis Rob M. Adam Baltussen (Taghreed), Several guidelines on cost effectiveness analysis CEA already exist. There are two reasons for producing another set. The first is that traditional or incremental CEA ignores the question of whether the current mix of interventions represents an efficient use of resources. Secondly, the resources required to evaluate the large number of interventions required to use CEA to identify opportunities to enhance efficiency are prohibitive. The approach of Generalized CEA proposed in this Guide seeks to provide analysts with a method of assessing whether the current as well as proposed mix of i

Journal of the Medical Association of Thailand, 2008-06 The journal of Medical Association of Thailand publishes original and review articles including case reports that relate to the study or research on diseases, epidemiology, drug or vaccine that have the influence on clinical course, treatment and prevention of human illness.

Evidence-based Decisions and Economics Ian Shemilt, Miranda Mugford, Luke Vale, Kevin Marsh, Cam Donaldson, 2011-09-22 The need for evidence based decisions that take account of both effectiveness and economics is greater now than ever. Using case studies and illustrative examples throughout, the authors describe how the activities and outputs of evidence synthesis, systematic review, economic analysis, and decision making interact within and across different spheres of health and social policy and practice. Expanding on the first edition, the book now covers approaches to evidence synthesis that combine economics and systematic review methods in the applied fields of social welfare, education, and criminal justice as well as health care. Written by economists and health services researchers closely involved in developing evidence based policy and practice, it showcases current state of the art methodology and will be an invaluable read for all policy makers and practitioners using evidence to inform decisions. Analysts conducting research to support decisions and students discovering the need for evidence based decisions to incorporate economic perspectives and evidence.

Ethics and Governance of Biomedical Research Daniel Strech, Marcel Mertz, 2016-05-09 In this book, scholars with different disciplinary and national backgrounds argue for possible answers and analyse case studies on current issues of governance in biomedical research. These issues comprise, among others, the research-care distinction, risk evaluation in early human trials, handling of incidental findings, nocebo effects, cluster randomized trials, publication bias, or consent in biobank research. This book demonstrates how new technologies and research possibilities multiply or intensify already known governance challenges, leaving room for ethical analysis and

complex moral choices Clinical researchers research ethics committee members and research ethicists have all to deal with such challenges on a daily basis While general reflection on core concepts of research ethics is seldom pointless those confronted with hard moral choices do need more practical and contextualized reflection on the said issues This book particularly provides such contextualized reflections and aims to inform all those who study conduct regulate fund or participate in biomedical research Infant and Young Child Feeding Fiona Dykes,Victoria Hall-Moran,2009-08-14 This exciting book edited by Fiona Dykes and Victoria Hall Moran and with a foreword from Gretel Peltz explores in an integrated context the varied factors associated with infant and child nutrition including global feeding strategies cultural factors issues influencing breastfeeding and economic and life cycle influences Program Evaluation and Performance Measurement James C. McDavid,Irene Huse,Laura R. L. Hawthorn,2018-10-16 Program Evaluation and Performance Measurement offers a conceptual and practical introduction to program evaluation and performance measurement for public and non profit organizations The authors cover the performance management cycle in organizations which includes strategic planning and resource allocation program and policy design implementation and management and the assessment and reporting of results The Third Edition has been revised to highlight the current economic political and socio demographic context within which evaluators are expected to work and includes dynamic public policy exemplars such as the evaluation of body worn police cameras Finally a text that successfully brings together quantitative and qualitative methods for program evaluation Kerry Freedman Northern Illinois University **The Elgar Companion to Health Economics** Andrew M. Jones,2012 The Elgar Companion to Health Economics is a comprehensive and accessible look at the field as seen by its leading figures Joseph Newhouse Harvard Medical School US Acclaim for the first edition This Companion is a timely addition It contains 50 chapters from 90 contributors around the world on the topical and policy relevant aspects of health economics there is a balanced coverage of theoretical and empirical materials and conceptual and practical issues I have found the Companion very useful Sukhan Jackson Economic Analysis and Policy This encyclopedic work provides interested readers with an authoritative and comprehensive overview of many if not all of the current research issues in health economics Highly recommended Upper level undergraduates and above R M Mullner Choice This comprehensive collection brings together more than 50 contributions from some of the most influential researchers in health economics It authoritatively covers theoretical and empirical issues in health economics with a balanced range of material on equity and efficiency in health care systems health technology assessment and issues of concern for developing countries This thoroughly revised second edition is expanded to include four new chapters while all existing chapters have been extensively updated The Elgar Companion to Health Economics Second Edition intends to take an audience of advanced undergraduates postgraduates and researchers to the current frontier of research by providing concise and readable introductions to key topics Simulating the impact of malaria control interventions Fabrizio Tediosi,2011-12-05T00:00:00+01:00 Malaria is one of the major public health

problems for low income countries a major global health priority and it has also a dramatic economic impact Standard tools traditionally used to assess the public health and economic impact of malaria control interventions such as efficacy trials and static cost effectiveness analyses capture only short term effects They fail to take into account long term and dynamic effects due to the complex dynamic of malaria and to the interactions between intervention effectiveness and health systems This study aimed at developing integrated mathematical models for predicting the epidemiologic and economic effects of malaria control interventions The study combines innovative mathematical models of malaria epidemiology with innovative modeling of the health system and of the costs and effects of malaria control interventions These approaches are applied to simulate the epidemiological impact and the cost effectiveness of hypothetical malaria vaccines Combining advanced stochastic simulation modeling of malaria epidemiology with health system dynamic modeling is a crucial innovation proposed by the approaches presented in this thesis

Global Bioethics Ronald M. Green,Aine Donovan,Steven A. Jauss,2008-11-06 Medical care and biomedical research are rapidly becoming global Ethical questions that once arose only in the narrow context of the physician patient relationship in relatively prosperous societies are now being raised across societies cultures and continents For example what should be the standard of care for clinical trials of medical innovations in poorer countries Are researchers obligated to compare new therapies or drugs with the best known ones available or can they use as a benchmark the actual treatments or lack of treatments available to poor people Should pharmaceutical companies seeking to lower the costs of new drug trials be allowed to enrol citizens of less developed countries in them even when those individuals cannot afford and will not be eligible for the resulting drugs More generally should the norms of medicine and research be the same across cultures or can they adapt to local social economic or religious conditions Global Bioethics gathers some of the world s leading bioethicists to explore many of the new questions raised by the globalization of medical care and biomedical research Among the topics covered are the impact of globalization on the norms of medical ethics the conduct of international research the ethics of international collaborations challenges to medical professionalism in the international setting and the relation of religion to global bioethics

Safety and Reliability - Safe Societies in a Changing World Stein Haugen,Anne Barros,Coen van Gulijk,Trond Kongsvik,Jan Erik Vinnem,2018-06-15 Safety and Reliability Safe Societies in a Changing World collects the papers presented at the 28th European Safety and Reliability Conference ESREL 2018 in Trondheim Norway June 17 21 2018 The contributions cover a wide range of methodologies and application areas for safety and reliability that contribute to safe societies in a changing world These methodologies and applications include foundations of risk and reliability assessment and management mathematical methods in reliability and safety risk assessment risk management system reliability uncertainty analysis digitalization and big data prognostics and system health management occupational safety accident and incident modeling maintenance modeling and applications simulation for safety and reliability analysis dynamic risk and barrier management organizational factors and safety culture human factors and human

Urban Transport XXIV F. A. Ortega Riejos, 2019-01-30 Providing a collection of research works on the continuing requirement for better urban transport systems this volume consists of papers presented at the 24th International Conference on Urban Transport and the Environment The need for better urban transport systems and for a healthier environment has resulted in a wide range of research originating from many different countries These studies highlight the importance of innovative systems new approaches and original ideas which need to be thoroughly tested and critically evaluated before they can be implemented in practice Moreover there is a growing need for integration with telecommunications systems and IT applications in order to improve safety security and efficiency This book also addresses the need to solve important pollution problems associated with urban transport in order to achieve a healthier environment The variety of topics covered in this volume reflects the complex interaction of the urban transport systems with their environment and the need to establish integrated strategies The aim is to arrive at optimal socio economic solutions while reducing the negative environmental impacts of current transportation systems

WHO guidance on research methods for health emergency and disaster risk management, revised 2022 World Health Organization, 2022-10-13 The WHO website has an introductory description for the Guidance It states that the WHO Guidance on Research Methods for Health Emergency and Disaster Risk Management Health EDM was developed to address the need to promote high quality research methods to those who commission and conduct research on Health EDM The intended audience includes decision makers practitioners and community actors who need for evidence based policy and practice to implement the Health EDM

Framework Sendai Framework on Disaster Risk Reduction 2015 2030 the International Health Regulations 2005 the United Nations Sustainable Development Goals SDGs and other relevant global regional and national frameworks Chapters have been written by more than 100 international authors with practical experience and expertise in a wide range of areas including research practice and policy making The unique collection of chapters provides straightforward and practical guidance on how to plan conduct and report a wide variety of studies that can answer quantitative and qualitative questions in different emergency settings Case studies of direct relevance to Health EDRM provide real life examples of research to illustrate the methods and their impact The book was revised in 2022 with an additional chapter on how to use this book in the context of COVID 19 pandemic

Infectious Disease Epidemiology Ibrahim Abubakar, Helen R. Stagg, Ted Cohen, Laura C. Rodrigues, 2016-04-07 Infectious Disease Epidemiology is a concise reference guide which provides trainees and practicing epidemiologists with the information that they need to understand the basic concepts necessary for working in this specialist area Divided into two sections part one comprehensively covers the basic principles and methods relevant to the study of infectious disease epidemiology It is organised in order of increasing complexity ranging from a general introduction to subjects such as mathematical modelling and sero epidemiology Part two examines key major infectious diseases that are of global significance Grouped by their route of transmission for ease of reference they include diseases that present a particular burden or a high potential for causing mortality This practical guide will be essential reading for postgraduate students in infectious disease epidemiology health protection trainees and practicing epidemiologists

Methods for the Economic Evaluation of Health Care Programmes M. F. Drummond, 2005 This highly successful textbook is now available in its third edition Over the years it has become the standard textbook in the field world wide It mirrors the huge expansion of the field of economic evaluation in health care since the last edition was published in 1997 This new edition builds on the strengths of previous editions being clearly written in a style accessible to a wide readership Key methodological principles are outlined using a critical appraisal checklist that can be applied to any published study The methodological features of the basic forms of analysis are then explained in more detail with special emphasis of the latest views on productivity costs the characterisation of uncertainty and the concept of net benefit The book has been greatly revised and expanded especially concerning analysing patient level data and decision analytic modelling There is discussion of new methodological approaches including cost effectiveness acceptability curves net benefit regression probabilistic sensitivity analysis and value of information analysis There is an expanded chapter on the use of economic evaluation including discussion of the use of cost effectiveness thresholds equity considerations and the transferability of economic data This new edition is required reading for anyone commissioning undertaking or using economic evaluations in health care and will be popular with health service professionals health economists pharmacists and health care decision makers It is especially relevant for those taking pharmacoeconomics courses

Ethics, Prevention, and Public Health Angus Dawson, M. F.

Verweij,2007-01-18 In this volume a range of issues in public health ethics are explored using the resources of moral theory political philosophy philosophy of science applied ethics law and economics The twelve original papers presented consider numerous ethical issues within public health ethics *Applied Methods of Cost-effectiveness Analysis in Healthcare* Alastair Gray,2011 This book provides the reader with a comprehensive set of instructions and examples of how to perform an economic evaluation of a health intervention focusing solely on cost effectiveness analysis in healthcare
