Making Health Policy A Critical Introduction:

Making Health Policy Andy Alaszewski, Patrick Brown, 2013-12-23 This new textbook opens up the policy making process for students uncovering how government decisions around health are really made Starting from more traditional insights into how ministers and civil servants develop policy with limited knowledge and money the book goes on to challenge the conception of policy as a rational process revealing it to be something quite different Knee jerk reactions to disasters keeping voters satisfied the powerful leverage of interest groups and the skewing of debate through ideology and the media are each considered in turn These processes render policy far from rational or at least require a much broader approach for considering policy logic one that is open to different rationalities of values norms and pragmatism The book draws on historical and contemporary examples to highlight that though challenges to policy makers may seem in some ways novel in many senses key processes endure and indeed are rooted in historical contexts Although the examples are drawn from UK health and social care the book's theory driven approach is applicable across national contexts especially for countries where uncertainty risk and resource pressures create significant dilemmas for policy makers The book's multi perspective thematic approach will be especially relevant to students as will the broad range of case study examples used *Making Health Policy* will be essential reading for students of health policy social policy social work and the sociology of medicine health and illness

that health care financing reform is shaped by a complex interplay of forces over time It also provides the most updated material about health care financing reforms in Shanghai Singapore and Hong Kong The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests It shows that institutional changes in health care financing system can be incremental but transformative in nature It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change

China s current social medical insurance system has nominally covered more than 95 per cent of 1.4 billion population in China and is moving towards the ambitious goal of universal health insurance coverage Challenges posed by a rapidly ageing population an inherently discriminatory design of the health insurance system the disorder of drug distribution system and an immature legal system constrain the Chinese government from realizing its goal of universal health insurance coverage in the long run This book uses a refined version of historical institutionalism to critically examine China s pathway to universal

health insurance coverage since the mid 1980s It pays crucial attention to the processes of transforming China s healthcare financing system into the basic social medical insurance system alongside rapid socio economic changes Financing Healthcare in China will interest researchers and government and think tank officials interested in the state of healthcare reforms in China Healthcare specialists outside of East Asia may also be interested in its general study of healthcare in developing countries Scholars and students interested in the healthcare field will also find this useful **Evolve Resources for Promoting Health** Lyn Talbot, Glenda Verrinder, 2014-01-24 Evolve Resources for Promoting Health
