The Power of Story Joan Wink Ph.D., 2017-11-07 Through this book readers will discover that stories can move the human heart and head in ways that research cannot. Stories bring together readers, writers, librarians, teachers, students, and families in the libraries of today and will continue to do so tomorrow. Written for all those lovers of literacy, this book links libraries and literacies through the power of stories. The book is not filled with data in the form of pie charts, graphs, and tables. Rather, the truth of the research is grounded in authentic stories that reflect not only the interpretation of data but also the transformative nature of literacies and libraries. The author's primary goal is that readers will come to value and use storytelling in their own professional and personal lives to explain and expand on complex concepts and to make information more accessible for all. The book begins by presenting anecdotes and the author's personal story to lay the foundation for what literacies are and what literacy is not. An activity, *Spiral of Literacy*, allows readers to reflect on their own literacies. Chapters that follow each begin with a story that sets the theoretical foundation. Each chapter concludes with an action section that demonstrates how to turn theory to practice, whether you are in a library, a classroom, or at home. A final chapter envisions what libraries might look like in 10 years through interviews with librarians, teachers, and others interested in literacy.

Making Literature Matter John Schilb, John Clifford, 2014-09-26 Students have always responded powerfully to the memorable stories, poems, plays, and essays gathered in distinctive clusters in *Making Literature Matter*'s thematic anthology. At the same time, the book's chapters on reading, writing, and research help students harness those responses into persuasive, well-supported arguments about the issues raised by the literature. As ever, the new edition of *Making Literature Matter* reflects John Schilb and John Clifford's careful attention to emerging pedagogical needs and trends. In response to instructor requests, they have expanded their treatment of argumentation and research and refined their approach to literary genres. Further, they read widely to identify some of the most engaging fiction, poetry, drama, and nonfiction published recently and based their new choices for the sixth edition on how well that literature raises and explores issues that matter to students right now.

Meals Matter Michael Symons, 2020-06-02 Until the early nineteenth century, political philosophy and economics were dining companions. Both took up fundamental questions of how we should feed one another. But with the rise of corporate capitalism, modern economics lost sight of its primary task and turned away from the complexities of real people's sustenance in favor of the single-minded pursuit of money. In *Meals Matter*, Michael Symons returns economics to its roots in the distribution of food and the labor required. Setting the table with vivid descriptions of conviviality, he offers a gastronomic rebuttal to the narrow worldview of mainstream economics. Engaging with a wide variety

of thinkers including Epicurus Enlightenment philosophers such as Thomas Hobbes and John Locke the gastronome Jean Anthelme Brillat Savarin and economic theorists from François Quesnay and Adam Smith through the neoliberals Symons traces how we went astray and how we can find our way back to a more caring sustainable way of life He finds hope for shared table pleasure in institutions like community gardens street markets and banquets and in eating fresh local and slow food An innovative historically based argument at the intersection of food history and social thought Meals Matter challenges us to reject the economics of greed in favor of a community based economics of sharing and gastronomic enjoyment
