Neuroanatomy of the Mouse Hannsjörg Schröder, Natasha Moser, Stefan Huggenberger, 2020-02-28 This textbook describes the basic neuroanatomy of the laboratory mouse. The reader will be guided through the anatomy of the mouse nervous system with the help of abundant microphotographs and schemata. Learning objectives and summaries of key facts at the beginning of each chapter provide the reader with an overview on the most important information. As transgenic mice are one of the most widely used paradigms when it comes to modeling human diseases a basic understanding of the neuroanatomy of the mouse is of considerable value for all students and researchers in the neurosciences and pharmacy but also in human and veterinary medicine. Accordingly the authors have included whenever possible comparisons of the murine and the human nervous system. The book is intended as a guide for all those who are about to embark on the structural histochemical and functional phenotyping of the mouse's central nervous system. It can serve as a practical handbook for students and early researchers and as a reference book for neuroscience lectures and laboratories.
