Areas covered include teaching and learning secondary geometry through history, the representations of geometric figures, students' cognition in geometry, teacher knowledge, practice and beliefs, teaching strategies, instructional improvement, and classroom interventions, research designs, and problems for secondary geometry. Drawing on a team of international authors, this new text will be essential reading for experienced teachers of mathematics, graduate students, curriculum developers, researchers, and all those interested in exploring students' study of geometry in secondary schools. El-Hi Textbooks & Serials in Print, 2000, 2000 **Improving Instruction in Geometry and Measurement** Margaret Schwan Smith, Edward A. Silver, Mary Kay Stein, 2005-01-01. Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers. In this book, one of a three-volume set, well-known mathematics educators Margaret Smith, Edward A. Silver, and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction. They focus on ways to engage upper elementary, middle school, and high school students in thinking, reasoning, and problem solving to build their mathematics understanding and proficiency. The content focus of Volume One is rational numbers and proportionality. Using materials that were developed under the NSF-funded COMET Cases of Mathematics to Enhance Teaching program, each volume in the set features cases from urban middle school classrooms with ethnically, racially, and linguistically diverse student populations. Each case illustrates an instructional episode in the classroom of a teacher who is implementing standards-based instruction, the teacher's perspective, including their thoughts and actions as they interact with students, and with key aspects of mathematical content, cognitively challenging mathematics activities that are built around samples of authentic classroom practice, and facilitation chapters to help professional developers teach the cases, including specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher's

own practice As a complete set this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning **McDougal Littell Geometry** ,2007 **Geometry:**
