Hashtag Publics Nathan Rambukkana, 2015 This collection investigates the publics of the hashtag Taking cues from critical public sphere theory contributors are interested in publics that break beyond the mainstream in other publics They are interested in the kinds of publics that do politics in a way that is rough and emergent flawed and messy and ones in which new forms of collective power are being forged on the fly and in the shadow of loftier mainstream spheres Hashtags are deictic indexical yet what they point to is themselves their own dual role in ongoing discourse Focusing on hashtags used for topics from Ferguson Missouri to Australian politics from online quilting communities to labour protests from feminist outrage to drag pop culture this collection follows hashtag publics as they trend beyond Twitter into other spaces of social networking such as Facebook Instagram and Tumblr as well as other media spaces such as television print and graffiti

Affective Formation of Publics Margreth Lünenborg, Birgitt Röttger-Rössler, 2023-09-01 This book offers an interdisciplinary analysis of current formations of publics that is informed by in depth knowledge of affect and emotion theory Using empirical case studies from contexts as diverse as India Pakistan Tanzania and the Americas as well as Europe the book challenges dichotomous distinctions between private and public Instead publics are understood as a relational structure that encompasses both people and their physical and mediatized environment While each kind of public is affectively constituted the intensity of its affective attunement varies considerably The volume is aimed at academic readers interested in understanding the dynamic and fluid forms of contemporary formation of publics be it digital or face to face encounters as well as in the intersection of both forms This includes researchers from media and communication studies social anthropology theatre or literary studies It is aimed at advanced students of these disciplines who are interested in the

unfolding of contemporary publics **Critical Security Studies in the Digital Age** Joseph Downing, 2023-01-23 This book demonstrates that the disciplinary boundaries present within international relations approaches to security studies are redundant when examining social media and inter and multi disciplinary analysis is key A key result of the analysis undertaken is that when examining the social media sphere security scholars need to expect the unexpected This is because social media enables users to subvert contest and create security narratives with symbols and idioms of their choice which can take into account traditional security themes but also unexpected and under explored themes such as narratives from the local context of the users towns and cities and the symbolism of football clubs The book also explores the complex topography of social media when considering constructions of security The highly dynamic topography of social media is neither elite dominated and hierarchical as the Copenhagen School conceptualises security speak However neither is it completely flat and egalitarian as suggested by the vernacular security studies non elite approach Rather social media s topography is shifting and dynamic with individuals gaining influence in security debates in unpredictable ways In examining social media this book engages with the emancipatory burden of critical security studies This book argues that it remains unfulfilled on social media and rather presents a thin notion of discursive emancipation where social media does provide the ability for previously excluded voices to participate in security debates even if this does not result in their direct emancipation from power hierarchies and structures offline Digital Afterlife and the Spiritual Realm Maggi Savin-Baden, 2021-12-09 Few religious leaders have examined the potential for the positive impact of digital media and digital immortality creation in religious contexts It is evident that there have been recent moves away from traditional funeral services focusing on the transition of the deceased into the future world beyond towards a rise of memorial content within funerals and commemorative events This has heralded shifts in afterlife beliefs by replacing them to all intents and purposes by attitudes to this life Digital Afterlife and the Spiritual Realm explores the ways in which digital media and digital afterlife creation affects social and religious understandings of death and the afterlife Features Understands the impact of digital media on those living and those working with the bereaved Explores the impact of digital memorialisation post death Examines the ways in which digital media may be changing conceptions and theologies of death For many people digital afterlife and the spiritual realm largely remains an area that is both inchoate and confusing This book will begin to unravel some of this bafflement **Digital Legend and Belief** Andrew Peck, 2023-07-18 The internet brings new urgency to the study of folklore The digital networks we use every day amplify the capacity of legends to spread swiftly define threats and inform action Using the case of a particularly popular digital bogeyman known as the Slender Man Andrew Peck brings the study of legends into the twenty first century Peck explains not only how legends circulate in the digital swirl of the internet but also how the internet affects how legends seep into our offline lives and into the mass media we consume What happens he asks when legends go online How does the internet enable the creation of new legends How do these ideas go viral How

do tradition and technology interact to construct collaborative beliefs Peck argues that the story of the Slender Man is really a story about the changing nature of belief in the age of the internet Widely adopted digital technologies from smartphones to social media offer vast potential for extending traditional and expressive social behaviors in new ways As such understanding the online landscape of contemporary folklore is crucial for grasping the formation and circulation of belief in the digital age Ultimately Peck argues that advancing our comprehension of legends online can help us better understand how similar belief genres like fake news conspiracy theories hoaxes rumors meme culture and anti expert movements are enabled by digital media

Social Media Materialities and Protest Mette Mortensen, Christina Neumayer, Thomas Poell, 2018-12-07 Far from being neutral social media platforms such as Facebook Twitter YouTube and WeChat possess their own material characteristics which shape how people engage protest resist and struggle This innovative collection advances the notion of social media materialities to draw attention to the ways in which the wires and silicon data streams and algorithms user and programming interfaces business models and terms of service steer contentious practices and inversely how technologies and economic models are handled and performed by users The key question is how the tension between social media s techno commercial infrastructures and activist agency plays out in protest Addressing this the volume goes beyond singular empirical examples and focuses on the characteristics of protest and social media materialities offering further conceptualizations and guidance for this emerging field of research The various contributions explore a wide variety of activist projects protests and regions ranging from Occupy in the USA to environmental protests in China and from the Mexican Barrio N mada to the Copenhagen based activist television channel TV Stop 1987 2005

Glass Ceilings and Ivory Towers Rachael Johnstone, Bessma Momani, 2024-05-01 Even as Canadian universities suggest their gender issues have largely been resolved many women in academia tell a different story Systemic discrimination the underrepresentation of women in more senior and lucrative roles and the belief that gender related concerns will simply self correct with greater representation add up to a serious gender problem Although these issues are widely acknowledged reliable data is elusive Glass Ceilings and Ivory Towers fills this research gap with a cross disciplinary data driven investigation of gender inequality in Canadian universities Research presented in this book reveals for example that women are more likely to hold sessional teaching positions and to face difficulties obtaining funding They are also poorly represented at the upper echelons of the professoriate and must contend with a gender pay gap that widens as they move up the ranks Contributors consider the daily grind of academic life social structural and systemic challenges and the gendered dynamics of university leadership all with an eye to laying the groundwork for practical and meaningful institutional change
