The Future of

High-Cost Credit Jodi Gardner, 2022-07-14 This book proposes a new way of thinking about the controversial and complex challenges associated with the regulation of high cost credit specifically payday lending These products have received significant attention in both the media and political arena The inadequacy of regulatory interventions has created ongoing problems with the provision of high cost credit particularly for consumers with lesser bargaining power and who are already financially vulnerable The book tackles two specific gaps in the existing literature The first involves inadequate analysis of the relevant philosophical concepts around high cost credit which can result in an over simplification of what are particularly complex issues The second is a lack of engagement in both the market and lived experience of borrowers resulting in limited understanding of those who use these financial products The Future of High Cost Credit explores the theoretical grounding policy initiatives and interdisciplinary perspectives associated with high cost credit making a novel and insightful contribution to the existing literature The problems with debt extend far beyond the legal sphere and the book will therefore be of interest to many other academic disciplines as well as for those working in public policy and the third sector

Holocaust Archaeologies Caroline Sturdy Colls, 2015-02-28 Holocaust Archaeologies Approaches and Future Directions aims to move archaeological research concerning the Holocaust forward through a discussion of the variety of the political social ethical and religious issues that surround investigations of this period and by considering how to address them It considers the various reasons why archaeological investigations may take place and what issues will be brought to bear when fieldwork is suggested It presents an interdisciplinary methodology in order to demonstrate how archaeology can uniquely contribute to the history of this period Case examples are used throughout the book in order to contextualise prevalent themes and a variety of geographically and typologically diverse sites throughout Europe are discussed This book challenges many of the widely held perceptions concerning the Holocaust including the idea that it was solely an Eastern European phenomena centred on Auschwitz and the belief that other sites connected to it were largely destroyed or are well known The typologically temporally and spatial diverse body of physical evidence pertaining to this period is presented and future possibilities for investigation of it are discussed Finally the volume concludes by discussing issues relating to the representation of the Holocaust and the impact of this on commemoration heritage management and education This discussion is a timely one as we enter an age without survivors and questions are raised about how to educate future generations about these events in their absence
