Featuring the wise counsel of more than 50 deans of admission, no other guide has such thorough, expert, compassionate, and professional advice. Let's be honest: applying to college can be stressful for students and parents. But here's the good news: you can get in. Robin Mamlet has been dean of admission at three of America's most selective colleges and journalist and parent. Christine VanDeVelde has been through the process first-hand. With this book, you will feel like you have both a dean of admission and a parent who has been there at your side. Inside this book, you'll find clear, comprehensive, and expert answers to all your questions along the way to an acceptance letter. The role of extracurricular activities. What it means to find a college that's the right fit. What's more important: high grades or tough courses? What role does testing play? The best candidates for early admission. When help from parents is too much help. Advice for athletes, artists, international students, and those with learning differences. How wait lists work. Applying for financial aid. This will be your definitive resource during the sophomore, junior, and senior years of high school.

Acing the College Application Michele Hernandez, 2007-08-28 With so many qualified applicants, competition for college admissions is fiercer than ever. Now you can put yourself ahead of the pack by making your application flawless. When applying for college, good grades and high standardized test scores are not always enough to guarantee admission. What sets you apart, argues Michele Hernandez, is the way you describe yourself in your application. But how do you present yourself with flair and highlight all your talents, skills, and passions in just a few pages? A former assistant director of admissions at Dartmouth College, Dr. Hernandez takes you step by step through the entire application process, revealing the details that make or break an applicant. From the multitude of short and longer essays to the myriad of charts, lists, and personal data sections, she offers essential advice, useful anecdotes, and vivid examples. Included are: A line-by-line look at the common application. The truth about the essays, with samples of those that made the grade. The best way to ask for teacher and guidance counselor recommendations. When to provide colleges with optional essays and peer evaluations. The ten common myths and misconceptions of the on-campus interview. The most meaningful academic subjects, work experience, and extracurricular activities to mention. Early action versus early decision: the trade-offs. With this helpful, savvy book, prospective college students and their parents and counselors can now vastly improve their chances of getting into the college of their choice. Want to scale the Ivy wall? Michele Hernandez gives you the tools to do it. This brisk, no-nonsense book is built on inside dope, and Hernandez's experience allows her to challenge conventional admissions thinking.

Sternberg,2010-10-01 SATs ACTs GPAs Everyone knows that these scores can t tell a college everything that s important about an applicant But what else should admissions officers look for and how can they know it when they see it In *College Admissions for the 21st Century* a leading researcher on intelligence and creativity offers a bold

and practical approach to college admissions testing Standardized tests are measures of memory and analytical skills But the ever changing global society beyond a college campus needs more than just those qualities argues Robert Sternberg Tomorrow's leaders and citizens also need creativity practicality and wisdom How can the potential for those complex qualities be measured One answer is Kaleidoscope a new initiative in undergraduate admissions first used at Tufts University Its open ended questions for applicants and the means used to score the answers gives applicants and admissions officers the chance to go beyond standardized tests Does it work As Sternberg describes in detail Kaleidoscope measures predicted first year academic success over and above SATs and high school GPAs and predicted first year extracurricular activities leadership and active citizenship as well And every year that Kaleidoscope measures were used the entering class's average SATs and high school GPAs went up too What worked at Tufts can work elsewhere New kinds of assessments like Kaleidoscope can liberate many colleges and students from the narrowness of standardized tests and inspire new approaches to teaching for new kinds of talented motivated citizens of the world
