continents through most of the Age of Dinosaurs from about 220 to 65 million years ago They reached incredible sizes giving rise to the question Why were they so big Early guesses suggested that they gained protection from predators by virtue of their size which also allowed them to reach the tops of trees in order to eat leaves and conifer needles More recent hypotheses hold that they needed a long and complicated digestive tract due to their consumption of low nutrient food sources size was an offshoot of that need Whatever the explanation there is little doubt that natural selection produced something extraordinary when the Sauropoda diversified into a wide variety of species This book combines majestic artwork and the best of paleontological research to resurrect the lives of sauropods The Sauropod Dinosaurs shows how these amazing creatures raised and defended their young traveled in groups and interacted with the rich diversity of Mesozoic plants and animals Beautiful enough to sit on the coffee table the book also serves as the best reference available on these bygone giants Anyone with a passion for dinosaurs or prehistoric life will cherish this once in a generation masterpiece The book includes the following features Over 200 full color illustrations More than 100 color photographs from museums field sites and collections around the world Thoughtfully placed drawings and charts Clearly written text reviewed by major sauropod researchers Descriptions of the latest sauropod concepts and discoveries A field guide to major groups of sauropods Detailed skeletal reconstructions and anatomical restorations A comprehensive glossary

young generation This book will restore faith in the Word of God as it connects the Bible with science Read and discover how dinosaurs are part of God s creative glory
