Monti, 2006-06-14 From the emergence of clinical sleep medicine marked by the establishment of the harbinger Stanford Sleep Disorders Clinic in the mid 1970s offspring sleep disorders clinics and centers have grown exponentially with the recognition of the unmet diagnostic and treatment needs of the reservoir of patients suffering from symptoms of what are now recognized and classified as the nosology of human sleep disorders Important in the growing armamentarium of treatment options for the sleep practitioner are both traditional and newer pharmacological agents including over the counter non traditional and prescription types that are all used to treat sometimes adjunctively most clinically recognized sleep disorders Although there are numerous academic treatises and reviews dealing with individual treatment alternatives for the diversity of recognized sleep disorders no one comprehensive resource extant

has dealt with pharmacological treatment options and strategies for the major human sleep disorders associated with a panoply of symptomatic conditions. The present volume and its series of chapters individually focusing on a range of human conditions from pediatric sleep disorders to sleep related disorders of individuals suffering from Alzheimer's dementia uniquely cover the wide range of human medical conditions amenable to thoughtfully sleep related applied drug therapy. The Editors have brought together a superb group of internationally respected sleep clinicians and researchers that provide state of the art analysis of the current basic and clinical perspective regarding the most common sleep disorders that are amenable to pharmacological treatment. In each chapter the authors outline a thorough historical background of the particular disorder and review the basic pre-clinical studies leading to current treatment options.
