Handbook of BRICS and Emerging Economies P. B. Anand, Shailaja Fennell, Flavio Comim, 2021 Ever since Jim O'Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes The Handbook of BRICS and Emerging Economies presents a comprehensive and multi faceted analysis of the BRICS countries and other emerging economies exploring their economic social environmental and governance

Varraich,2017-02-27 Corruption is a serious threat to prosperity democracy and human well being with mounting empirical evidence highlighting its detrimental effects on society Yet defining this threat has resulted in profound disagreement producing a multidimensional concept Tackling this important and provocative topic the authors provide an accessible and systematic analysis of how our understanding of corruption has evolved They identify gaps in the research and make connections between related concepts such as clientelism patronage patrimonialism particularism and state capture A fundamental issue discussed is how the opposite of corruption should be defined By arguing for the possibility of a universal understanding of corruption and specifically what corruption is not an innovative solution to this problem is presented This book provides an accessible overview of corruption allowing scholars and students alike to see the far reaching place it has within academic research **The African Affairs Reader** Nic Cheeseman,Lindsay Whitfield,Carl Death,2017-05-19 African

Affairs is the top journal in African Studies and has been for some time This book draws together some of the most influential important and thought provoking articles published in its pages over the last decade In doing so it collates essential cutting edge research on Africa and makes it easily available for students teachers and researchers alike The African Affairs Reader is broken down into four sections that cover some of the biggest themes and questions facing the continent today including the African State the Political Economy of Development Africa s Relationship with the World and Elections Representation Democracy Within each section articles deal with some of the most significant recent trends and events such as the prospects for democratization in Ghana and Nigeria the factors underpinning Rwanda s economic success the rise of political corruption in South Africa the spread of the drugs trade the struggle against gender based violence and the growing influence of China Each section is introduced by a new purpose written essay by the journal s editors that explains the evolution of the wider debate highlights key contributions and suggests new ways in which the discussion can be taken forward Taken together the essays and articles included in the volume provide both a coherent introduction to the study of Africa and a compelling commentary on the current state of play on the continent **Working with the Grain** Brian

organizations and compassionate individuals descended on Africa from faraway places to offer their help and save lives A Fraught Embrace shows how the dreams of these altruists became entangled with complex institutional and human relationships Ann Swidler and Susan Cotts Watkins vividly describe the often mismatched expectations and fantasies of those who seek to help of the villagers who desperately seek help and of the brokers on whom both Western altruists and impoverished villagers must rely Based on years of fieldwork in the heavily AIDS affected country of Malawi this powerful book digs into the sprawling AIDS enterprise and unravels the paradoxes of AIDS policy and practice All who want to do good from idealistic volunteers to world weary development professionals depend on brokers as guides fixers and cultural translators These irreplaceable but frequently unseen local middlemen are the human connection between altruists dreams and the realities of global philanthropy The mutual misunderstandings among donors brokers and villagers each with their own desires and moral imaginations create all the drama of a romance longing exhilaration disappointment heartache and sometimes an enduring connection Personal stories public scandals and intersecting sometimes clashing fantasies bring the lofty intentions of AIDS altruism firmly down to earth Swidler and Watkins ultimately argue that altruists could accomplish more good not by seeking to transform African lives but by helping Africans achieve their own goals A Fraught Embrace unveils the tangled relations of those involved in the collective struggle to contain an epidemic

Housing in the Aftermath of the Fast Track Land Reform Programme in Zimbabwe Lovemore Chipungu, Hangwelani Hope Magidimisha, 2020-12-10 This book delves into the Fast Track Land Reform Programme FTLRP in Zimbabwe to provide insight into how it facilitated the delivery of housing for low income urban households It highlights the politics of land reforms and the power of community engagement in housing development in urban areas Prior to the FTLRP the Zimbabwean governments had never embraced popular modes of housing production as key factors in urban development In the area of low income housing informal housing schemes have always been treated with apathy and indifference This left the conventional mode of housing production to be the only legitimate means to house low income households despite its shortcomings However the onset of the FTLRP in 2000 resulted in homeless urban households grasping the opportunity to invade farms for housing development Through the lenses of Marxism and Neoliberalism this book analyses housing schemes that emerged and the overall impact of the FTLRP on housing and land delivery in Harare This analysis is based on empirical evidence obtained from key informants and household surveys conducted in Harare The authors argue that the FTLRP provided a platform for innovativeness by households supported by the unpronounced national urban vision and prowess of the political leadership Hence the success of these housing schemes can be measured by acquisition of land which guarantees households access to the city However some of these housing schemes pose challenges key among them being lack of infrastructure The book concludes by presenting a new model for effective delivery of land and

housing for the urban poor This is envisaged as a useful policy tool for urban planners housing experts land economists urban and regional geographers as well as sociologists political scientists and social workers engaged in public administration of land and housing

World Development Report 2015 World Bank, 2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberatively and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The *World Development Report 2015* offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It

demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community
