Governance Without Government Governance Without Government:

Governance Without a State? Thomas Risse, 2013-10-01 Governance discourse centers on an ideal type of modern statehood that exhibits full internal and external sovereignty and a legitimate monopoly on the use of force Yet modern statehood is an anomaly both historically and within the contemporary international system while the condition of limited statehood wherein countries lack the capacity to implement central decisions and monopolize force is the norm Limited statehood argue the authors in this provocative collection is in fact a fundamental form of governance immune to the forces of economic and political modernization Challenging common assumptions about sovereign states and the evolution of modern statehood particularly the dominant paradigms supported by international relations theorists development agencies and international organizations this volume explores strategies for effective and legitimate governance within a framework of weak and ineffective state institutions Approaching the problem from the perspectives of political science history and law contributors explore the factors that contribute to successful governance under conditions of limited statehood These include the involvement of nonstate actors and nonhierarchical modes of political influence Empirical chapters analyze security governance by nonstate actors the contribution of public private partnerships to promote the United Nations Millennium Goals the role of business in environmental governance and the problems of Western state building efforts among other issues Recognizing these forms of governance as legitimate the contributors clarify the complexities of a system the developed world must negotiate in the coming century *Governance Without Government* James N. New Modes of Governance in Europe A. H  ritier, M. The Limits of Legal Reasoning and the European Court of Justice Gerard Conway, 2012-01-12 The European Court of Justice is widely acknowledged to have played a fundamental role in developing the constitutional law of the EU, having been the first to establish such key doctrines as direct effect, supremacy, and parallelism in external relations. Traditionally, EU scholarship has praised the role of the ECJ, with more critical perspectives being given little voice in mainstream EU studies. From the standpoint of legal reasoning, Gerard Conway offers the first sustained critical assessment of how the ECJ engages in its function and offers a new argument as to how it should engage in legal reasoning. He also explains how different approaches to legal reasoning can fundamentally change the outcome of case law and how the constitutional values of the EU justify a different approach to the dominant method of the ECJ.

Modernising School Governance Andrew Wilkins, 2016-06-10 Modernising School Governance examines the impact of recent market based reforms on the role of governors in the English state education system. A focus of the book concerns how government and non government demands for strong governance have been translated to mean improved performance management of senior school leaders and greater monitoring and disciplining of governors. This book addresses fundamental questions about the neoliberal logic underpinning these reforms and how governors are being trained and responsibilised in new ways to enhance the integrity of these developments. Drawing on large scale research conducted over three years, the book examines the impact of these reforms on the day to day practices of governors and the diminished role of democracy in these contexts.

Wilkins also captures the economic and political rationalities shaping the conduct of governors at this time and traces these expressions to wider structural developments linked to depoliticisation decentralisation and disintermediation This book addresses timely and original issues concerning the role of corporate planning and expert handling to state education at a time of increased school autonomy shrinking local government support oversight and tight centralised accountability It will appeal to researchers and postgraduate students in disciplines of education sociology political science public policy and management It will also be of interest to researchers and policy makers from countries with similar or emerging quasi market education systems

Responses to Governance John C. Dixon, 2003-04-30 Dixon and his colleagues provide a behaviorist perspective on governance Their concern is with the governed's responses to those who seek to govern them their governors and the counter responses that they induce from the governors They take as axiomatic that the governed are not a homogenized and amorphous them in the them us dichotomy reduced to what Carlyle called a dead logic formula thereby for the purpose of this analysis leave begging all the relevant questions The governed are not a disembodied abstraction they are an aggregate of men and women of flesh and blood In a corporation they are corporate directors whose governors are those who own or perhaps have a stake in that corporation corporate managers

whose governors are the corporate directors corporate employees whose governors are the corporate managers In a society they are individuals or groups of individuals perhaps in corporations located within its jurisdiction whose governors are the members of societal political and administrative elites At the global level they are individuals or groups of individuals in countries and corporations within the jurisdiction of international governmental organizations and international regimes whose governors are those who seek to control those global governance mechanisms Whether the governed's response to their governors processes is one of compliance or antagonism and how the governors response to any antagonism has implications for governance capacity good governance and governability A provocative study that will be of interest to students and scholars of political theory international relations and management and organizational theory as well as those who are concerned with issues of governance at all levels corporate societal and global

Dyck,2008-04-01 The pursuit and practice of discipline have become near ubiquitous elements of contemporary social life and parlance as discipline has become a commonplace and ever sought after social technology From the celebrated discipline of the market proclaimed by neo liberal politicians to self actualizing experiences of embodied discipline proffered by martial arts instructors this volume showcases highly varied and complex disciplinary practices and relationships in a set of ethnographic studies Interrogating the respective fields of work religion governance leisure education and child rearing together the essays in this volume explore and offer new ways of thinking about discipline in everyday life Governing

Complex Systems Oran R. Young,2017-03-10 An exploration of the need for innovative mechanisms of governance in an era when human actions are major drivers of environmental change The onset of the Anthropocene an era in which human actions have become major drivers of change on a planetary scale has increased the complexity of socioecological systems Complex systems pose novel challenges for governance because of their high levels of connectivity nonlinear dynamics directional patterns of change and emergent properties Meeting these challenges will require the development of new intellectual capital In this book Oran Young argues that to achieve sustainable outcomes in a world of complex systems we will need governance systems that are simultaneously durable enough to be effective in guiding behavior and agile enough to adapt to rapidly changing circumstances While some insights from past research on governance remain valid in this setting Young argues that we need new social capital to supplement mainstream regulatory approaches that feature rule making with an emphasis on compliance and enforcement He explores the uses of goal setting as a governance strategy the idea of principled governance and the role of what is often called good governance in meeting the challenges of the Anthropocene Drawing on his long experience operating on the science policy frontier Young calls for more effective collaboration between analysts and practitioners in creating and implementing governance systems capable of producing sustainable outcomes in a world of complex systems *Urban Governance in Europe* Felix Eckhardt,Ingemar Elander,2011-06-28 Hauptbeschreibung

Handbook of Peacebuilding in Africa Tony Karbo,Kudrat Virk,2018-01-30 This handbook offers a critical assessment of the African agenda for conflict prevention peacemaking peacekeeping and peacebuilding the challenges and opportunities facing Africa s regional organisations in their efforts towards building sustainable peace on the continent and the role of external actors including the United Nations Britain France and South Asian troop contributing countries In so doing it revisits the

late Ali Mazrui's concept of Pax Africana calling on Africans to take responsibility for peace and security on their own continent. The creation of the African Union in 2002 was an important step towards realising this ambition and has led to the development of a new continental architecture for more robust conflict management. But as the volume's authors show, the quest for Pax Africana faces challenges. Combining thematic analyses and case studies, this book will be of interest to both scholars and policymakers working on peace, security and governance issues in Africa.

Shared Governance for Sustainable Working Landscapes Timothy M. Gieseke, 2016-08-05

Sustaining our agricultural landscapes is no longer just a technical, scientific or even political problem, but it has evolved into a socially complex, so-called wicked problem of conflicting social governance and economics. This creates an extreme economic obstacle where the value of ecosystem services remains low and diffuse and the transactions costs remain high and multiple. Using Uber-like business platform technology and a shared governance model, a symbiotic demand for environmental benefits is created. Enabling multi-sector transactions for environmental benefits, this platform innovation would remedy the tragedy of the commons, the economic nemesis to achieving landscape sustainability. In a nutshell, to sustain our agricultural landscapes, a transdisciplinary approach supported by a shared governance model housed within a multi-sided platform is needed. This book introduces an assessment framework identifying governance actors, styles and ratios for socio-ecological systems. The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks. It is aimed at anyone involved in sustainability science, agricultural policy planning or integrated landscape design.

The Constitution of Private Governance Harm Schepel, 2005-02-23

In quantity and importance, private standards are rapidly taking over the role of public norms in the international and national regulation of product safety. This book provides a comprehensive overview of the rise, role and status of these private product safety standards in the legal regulation of integrating markets. In international and regional trade law, as in European and American constitutional and administrative law, tort law and antitrust law, the book analyses the ways in which legal systems can and do recognise private norms as law. This sociological question of law's recognition of private governance is indissolubly connected with a normative question of democratic theory: can law recognize legal validity and democratic legitimacy outside the constitution without constitutional political institutions and beyond the nation state? Or can law constitute private transnational governance? The book offers the first systematic treatment of European, American and international standards law in the English language and makes a significant contribution to the study of the processes of globalization and privatization in social and legal theory. For the thesis on which this book was based, Harm Schepel was awarded the first EUI Alumni Prize for the best interdisciplinary and/or comparative thesis on European issues written at the EUI in recent years.

Governing Complex Societies J. Pierre, B. Peters, 2005-04-25

Western societies are becoming increasingly complex and challenging to govern, yet the modern state continues to play a central role in governance. This book presents a detailed analysis of the challenges confronting the

contemporary state and the processes through which the state addresses those challenges The notion of governing without government is critiqued instead Pierre and Peters argue that what is happening is more a matter of state transformation than state decline

Civil Society, the Third Sector and Social Enterprise Jean-Louis Laville, Dennis R. Young, Philippe Eynaud, 2015-04-24

If the twentieth century was only focused on the complementarity and the opposition of market and state the twenty first century has now to deal with the prominence of the third sector the emergence of social enterprises and other solidarity hybrid forms The concept of civil society organisations CSOs spans this diversity and addresses this new complexity The first part of the book highlights the organizational dimensions of CSOs and analyses the growing role of management models and their limits Too often the study of CSO governance has been centered on the role of the board and has not sufficiently taken into account the different types of accountability environments Thus the conversation about CSO governance rises to the level of networks rather than simple organizations per se and the role of these networks in setting the agenda in a democratic society In this perspective the second part emphasizes the institutional dimensions of CSO governance by opening new avenues on democracy First the work of Ostrom about governing the commons provides us new insights to think community self governance Second the work of Habermas and Fraser opens the question of deliberative governance and the role of public sphere to enlarge our vision of CSO governance Third the concepts of substantive rationality and economy proposed respectively by Ramos and Polanyi reframe the context in which the question can be addressed Lastly this book argues for a stronger intercultural approach useful for the renewal of paradigms in CSOs research This book has for objective to present a unique collective work in bringing together 33 authors coming from 11 countries to share perspectives on civil society governance and will be of interest to an international audience of researchers and policy makers
