Engendering Democracy in Africa Niamh Gaynor, 2022-06-01 This book investigates women s political participation in Africa Going beyond the formal institutions of electoral politics it explores a range of spaces where everyday politics take place at national and at local levels In recent years there have been significant improvements in the number of women elected to parliament in Africa However there is little indication that this is translating into better developmental outcomes and indeed there is mounting evidence that it could in fact help to bolster some authoritarian regimes Starting from the premise that politics is a far broader project than securing a seat in national or local legislatures alone this book explores the opportunities for women s political participation across a number of informal

spaces where women and men gather organise and interact in a more regular and systematic manner Combining insights from political science sociology and feminist theory and drawing on detailed cases from the Congo Kenya Malawi Nigeria and Rwanda it examines how power in its multiple dimensions circulates across a range of everyday political spaces while drawing attention to the links between domestic gender inequalities and the global political economy Inviting scholars practitioners and activists to broaden their focus beyond formal electoral institutions if they want to support women to become more politically active this book provides fresh insights into major issues at the heart of African studies development studies gender and development democratisation and international relations State Fragility, Business, and Economic Performance Belay Seyoum, 2024-01-02

 Jennifer M. Brinkerhoff, 2016-08-08 Externally promoted institutional reform even when nominally accepted by developing
 country governments often fails to deliver lasting change Diasporans immigrants who still feel a connection to their country
 of origin may offer an In Between Advantage for institutional reform which links problem understanding with potential
 solutions and encompasses vision impact operational and psycho social advantages Individuals with entrepreneurial
 characteristics can catalyzing institutional reform Diasporans may have particular advantages for entrepreneurship as they
 live both psychologically and materially between the place of origin they left and the new destination they have embraced
 Their entrepreneurial characteristics may be accidental cultivated through the migration and diaspora experience or innate
 to individuals personalities This book articulates the diaspora institutional entrepreneur In Between Advantage proposes a
 model for understanding the characteristics and motivational influences of entrepreneurs generally and how they apply to
 diaspora entrepreneurs in particular and presents a staged model of institutional entrepreneur actions I test these
 frameworks through case narratives of social institutional reform in Egypt economic institutional reform in Ethiopia and
 political institutional reform in Chad In addition to identifying policy implications this book makes important theoretical

contributions in three areas First it builds on existing and emerging critiques of international development assistance that articulate prescriptions related to alternative theories of change Second it fills an important gap in the literature by focusing squarely on the role of agency in institutional reform processes while still accounting for organizational systems and socio political contexts In doing so it integrates a more expansive view of entrepreneurship into extant understandings of institutional entrepreneurship and it sheds light on what happens in the frequently invoked black box of agency Third it demonstrates the fallacy of many theoretical frameworks that seek to order institutional change processes into neatly definable linear stages
