society      **Geoffrey Chaucer in Context** Ian Johnson,2019-07-11 Provides a rich and varied reference resource illuminating the different contexts for Chaucer and his work      *Negotiating Boundaries in Medieval Literature and Culture* Valerie B. Johnson,Kara L. McShane,2022-03-21 Thomas Hahn's work laid the foundations for medieval romance studies to embrace the study of alterity and hybridity within Middle English literature His contributions to scholarship brought Robin Hood studies into the critical mainstream normalized the study of historically marginalized literature and peoples and encouraged scholars to view medieval readers as actively encountering others and exploring themselves This volume employs his methodologies careful attention to texts and their contexts cross cultural readings and theoretically informed analysis to highlight the literary culture of late medieval England afresh Addressing long established canonical works such as Chaucer Christine de Pizan and Malory alongside understudied traditions and manuscripts this book will be of interest to literary scholars of the later Middle Ages who like Hahn work across boundaries of genre tradition and chronology      [The Oxford History of Classical Reception in English Literature](#) Rita Copeland,2016-01-28 The Oxford History of Classical Reception in English Literature OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical analysis of literary texts It explores in detail the ways in which English writers' engagement with classical literature casts as much light on the classical originals as it does on the English writers' own cultural context This first volume and fourth to appear in the series covers the years c 800 1558 and surveys the reception and transformation of classical literary culture in England from the Anglo Saxon period up to the Henrician era Chapters on the classics in the medieval curriculum the trivium and quadrivium medieval libraries and medieval mythography provide context for medieval reception The reception of specific classical authors and traditions is represented in chapters on Virgil Ovid Lucan Statius the matter of Troy Boethius moral philosophy historiography biblical epics English learning in the twelfth century and the role of antiquity in medieval alliterative poetry The medieval section includes coverage of Chaucer Gower and Lydgate while the part of the volume dedicated to the later period explores early English humanism humanist education and libraries in the Henrician era and includes chapters that focus on the classicism of Skelton Douglas Wyatt and Surrey      **Humanism and Good Books in Sixteenth-Century England** Katherine C. Little,2023-02-23 This book explores sixteenth century humanism as an origin for the idea of literature as good even great books It argues that humanists located the value of books not only in the goodness of their writing their

eloquence but also in their capacity to shape readers in good and bad behavior thoughts and feelings in other words in their morality To approach humanism in this way by attending to its moral interests is to provide a new perspective on periodization the transition from the Middle Ages to the Renaissance early modern That is humanists did not so much rupture with medieval ideas about literature or with medieval models as they adapted and altered them offering a new confidence about an old idea the moral instructiveness of pagan classical texts for Christian readers This revaluation of literature was a double edged sword On the one hand humanist confidence inspired authors to invent their own good books good in style and morals in morality plays such as *Everyman* and the Christian Terence tradition and in educational treatises such as Sir Thomas Elyot's *Boke of the Governour* On the other hand humanism placed a new burden on authors requiring their work to teach and delight In the wake of humanism authors struggled to articulate the value of their work for readers returning to a pre humanist path that they associated with Geoffrey Chaucer This medieval inflected doubt pervades the late sixteenth century writings of the most prolific and influential Elizabethans Robert Greene George Gascoigne and Edmund Spenser

**Kingship and Masculinity in Late Medieval England** Katherine Lewis, 2013-09-05 *Kingship and Masculinity in Late Medieval England* explores the dynamic between kingship and masculinity in fifteenth century England with a particular focus on Henry V and Henry VI The role of gender in the rhetoric and practice of medieval kingship is still largely unexplored by medieval historians Discourses of masculinity informed much of the contemporary comment on fifteenth century kings for a variety of purposes to praise and eulogise but also to explain shortcomings and provide justification for deposition Katherine J Lewis examines discourses of masculinity in relation to contemporary understandings of the nature and acquisition of manhood in the period and considers the extent to which judgements of a king's performance were informed by his ability to embody the right balance of manly qualities This book's primary concern is with how these two kings were presented represented and perceived by those around them but it also asks how far Henry V and Henry VI can be said to have understood the importance of personifying a particular brand of masculinity in their performance of kingship and of meeting the expectations of their subjects in this respect It explores the extent to which their established reputations as inherently manly and unmanly kings were the product of their handling of political circumstances but owed something to factors beyond their immediate control as well Consideration is also given to Margaret of Anjou's manipulation of ideologies of kingship and manhood in response to her husband's incapacity and the ramifications of this for perceptions of the relational gender identities which she and Henry VI embodied together *Kingship and Masculinity in Late Medieval England* is an essential resource for students of gender and medieval history *Learning to Die in London, 1380-1540* Amy Appleford, 2015 Taking as her focus a body of writings in poetic didactic and legal modes that circulated in England's capital between the 1380s just a generation after the Black Death and the first decade of the English reformation in the 1530s Amy Appleford offers the first full length study of the Middle English art of dying *ars moriendi* An educated awareness of death

and mortality was a vital aspect of medieval civic culture she contends critical not only to the shaping of single lives and the management of families and households but also to the practices of cultural memory the building of institutions and the good government of the city itself In fifteenth century London in particular where an increasingly laicized reformist religiosity coexisted with an ambitious program of urban renewal cultivating a sophisticated attitude toward death was understood as essential to good living in the widest sense The virtuous ordering of self household and city rested on a proper attitude toward mortality on the part both of the ruled and of their secular and religious rulers The intricacies of keeping death constantly in mind informed not only the religious prose of the period but also literary and visual arts In London's version of the famous image text known as the Dance of Death Thomas Hoccleve's poetic collection *The Series* and the early sixteenth century prose treatises of Tudor writers Richard Whitford Thomas Lupset and Thomas More death is understood as an explicitly generative force one capable if properly managed of providing vital personal social and literary opportunities
