*Governing China* Kenneth Lieberthal, 1995 Looks at the history of Chinese government from the original imperial system to the current communist government and describes some of the challenges China faces in the future [Higher Education as a Field of Study in China](#) Xin Wang, 2010-03-18 Higher Education as a Field of Study in China Defining Knowledge and Curriculum Structure concerns the complexity of higher education as an academic field the evolving nature of the field in light of the overall development of higher education in China It reviews how higher education as a field of study has evolved in China since 1978 and how the field has been shaped by political and social forces as well as institutional culture Xin Wang argues that higher education is becoming an interdisciplinary field rather than a subfield under the discipline of education especially when higher education has become an enterprise with such a broad scope in China Wang also expresses a belief that the field of higher education is being challenged by the professional need for preparing and training competent professionals for various administrative positions in China Higher education as a field will be professionalized with its own knowledge base and a set of skills in applying this knowledge to practical areas This book also provides an account of the U S model of higher education as an example how the field was formed and developed how it has evolved from a generalized area of inquiry into a professional specialization how programs of higher education are structured what classes they offer and what challenges they face The U S model presents a comparative perspective for Chinese scholars and program directors about higher education as a field of study *China Reconnects: Joining A Deep-rooted Past To A New World Order* Gungwu Wang, 2019-07-02 The book is engaging informative and provocative and can profitably be read by undergraduates and professors alike You do not have to agree with the dean of China studies to learn from him China Review International The book shows how the Chinese are now confident of their capacity to learn all they need from the developed world and are keen to know which parts of the past they would need to build a modern Chinese civilization They are very conscious of the challenges coming from the United States and are looking for ways and means to respond to a superpower that wants to preserve its dominant position in the international status quo The book seeks to explain what China is doing and what its immediate and long term interests are It is not to defend or judge China It does not employ theoretical frameworks that are not appropriate for describing Chinese conditions It calls for understanding why history is particularly relevant to the Chinese state and most of its people That way we also see how the present and hopes for the future changes our perspectives of the past Related Link s [Work Safety Regulation in China](#) Jie Gao, 2022-03-31 Fatality quotas implemented in China s industrial section and local governments are being used to promote work safety and therefore reducing the number of work related deaths Given the controversial nature of this policy Gao analyzes how the fatality quotas are functioning to aid the country in balancing economic growth and social stability The book also examines significant implications caused of this policy s implementation in the local regions and reveals how local officials attempt to handle these problems This is the first
