same time culture is nowadays seen as the world's key intellectual resource possessing new creative weight in sociological economic and environmental terms This book argues that in the light of this cultural turn there is the opportunity to reposition planning and proposes an original practical and robust system of culturisation Culturisation is defined as the ethical critical and reflexive integration of culture into planning and potentially other areas such as public administration corporate strategy and development thinking Cultural theory planning theory global governance policy and recent innovative culturised practices are all explored to this end The new theoretical and practical approach put forward shows how deeper richer and more relevant ideas about culture can be utilized in planning and is illustrated with international examples and two major case studies detailing new vistas for a refurbished planning

Housing as Governance Astrid Ley,2010 This book explores the dynamic roles and linkages of public sector institutions and civil society actors in housing provision for the urban poor in South Africa Based on actor centred and network theories two cases of civil society alliances are analysed The book reveals that existing civil society structures are hybrids that can oscillate between networks and organisations Moreover they establish informal governance spaces with state actors outside the institutional channels provided by government The emergence of oscillating structures and the informalisation of horizontal governance represent new challenges for local decision making processes Co operation and action oriented approaches in housing seemingly need to be based on a more detailed understanding of the complex interfaces which go far beyond the conventional ideal of partnerships and participation between sectors
