The Medici: Portraits and Politics 1512-1570 Keith Christiansen, Carlo Falciani, Andrea Bayer, Elizabeth Cropper, Davide Gasparotto, Sefy Hendler, Antonella Fenech Kroke, Tommaso Mozzi, Elizabeth Pilliod, Julia Simon, Linda Wolk-Simon, 2021-04-19 Between 1512 and 1570 Florence underwent dramatic political transformations As citizens jockeyed for prominence portraits became an essential means not only of recording a likeness but also of conveying a sitter's character social position and cultural ambitions This fascinating book explores the ways that painters including Jacopo Pontormo Agnolo Bronzino and Francesco Salviati sculptors such as Benvenuto Cellini and artists in other media endowed their works with an erudite and self consciously stylish character that made Florentine portraiture distinctive The Medici family had ruled Florence without interruption between 1434 and 1494 Following their return to power in 1512 Cosimo I de' Medici who became the second Duke of Florence in 1537 demonstrated

a particularly shrewd ability to wield culture as a political tool in order to transform Florence into a dynastic duchy and give Florentine art the central position it has held ever since Featuring more than ninety remarkable paintings sculptures works on paper and medals this volume is written by a team of leading international authors and presents a sweeping penetrating exploration of a crucial and vibrant period in Italian art *Catalogues of the Berenson Library of the Harvard University Center for Italian Renaissance Studies at Villa I Tatti, Florence, Italy* Berenson Library, Villa I Tatti (Florence, Italy), 1972

Catalogues of the Berenson Library of the Harvard University Center for Italian Renaissance Studies at Villa I Tatti, Florence, Italy: Subject catalogue. 2 v Berenson Library, 1972 *Rethinking the High Renaissance* Jill Burke, 2017-07-05 The perception that the early sixteenth century saw a culmination of the Renaissance classical revival only to degrade into mannerism shortly after Raphael's death in 1520 has been extremely tenacious but many scholars agree that this tidy narrative is deeply problematic Exploring how we can reconceptualize the High Renaissance in a way that reflects how we research and teach today this volume complicates and deepens our understanding of artistic change Focusing on Rome the paradigmatic centre of the High Renaissance narrative each essay presents a case study of a particular aspect of the culture of the city in the early sixteenth century including new analyses of Raphael's stanze Michelangelo's Sistine Ceiling and the architectural designs of Bramante The contributors question notions of periodization reconsider the Renaissance relationship with classical antiquity and ultimately reconfigure our understanding of high Renaissance style **Handbook to Life in the Medieval World, 3-Volume Set** Madeleine Pelter Cosman, Linda Gale Jones, 2009 Presents a three volume set that examines the medieval civilizations of the Muslims Jews and Christians including history economics medicine technology art literature and clothing *Renaissance Art* Irene Earls, 1987-11-13 This dictionary is a quick and useful reference source for identifying and understanding the Renaissance art of Italy and northern Europe Arranged in alphabetical sequence the more than eight hundred entries provide basic information about topics that were common subjects in painting sculpture and decorative arts of the period Additionally entries on characteristic schools techniques media and other terminology have been included as background information as well as to provide an art history vocabulary necessary for comprehending or clarifying certain topics Supplemental information on various related topics is cross referenced for easy access and the reader is provided with an even more complete location of topics and other entries with see references and a subject index As an aid to further study a list of northern and Italian Renaissance artists which includes life dates and nationalities has been included A bibliography is also provided for further reference **Young Michelangelo** John T. Spike, 2012-08-01 In this biography the author of the acclaimed *Caravaggio* examines the relationships that shaped Michelangelo's first thirty years In this compelling account renowned art historian John Spike paints a vivid portrait of one of the world's greatest artists and the places and people Lorenzo de' Medici Leonardo Machiavelli that inspired and defined his early life and career Spike's masterful text probes the thinking evolution and desires of a young man whose awareness of his exceptional talent never

wavered Michelangelo's complex personality is revealed through lively examinations of the Pietà, the David and all other major works. Drawing on a rich background of Italian Renaissance politics and culture, Spike deftly navigates the fiery Florentine master's struggle to surpass da Vinci's artistic mastery and his troubled relationships with Julius II and other key figures of the era. Praise for Young Michelangelo: Spike, an art historian, curator, and critic, has done some impressive research to flesh out the early years of the artist's life right up until his return to Rome in 1508 to focus on a commission in the Sistine Chapel. The young sculptor's daunting talent and quest to earn as much money as possible are woven into the story of the Italian Renaissance and the outsized figures of the age. The Washington Post: Spike crystallizes historical detail into vivid, memorable imagery. Alternating between accounts of the turbulent political atmosphere and details of Michelangelo's most private moments in the sculpture studio, Spike creates a rich narrative that promises more intrigue than the best adventure novel. Publishers Weekly: Such a comprehensive account of the master's early life and rise to fame amid the political upheaval in the Papal States and Florentine Republic. Art Auction: *Italian and Spanish Sculpture* Peggy Fogelman, Peter Fusco, Marietta Cambareri, 2002-12-26. The catalogue is abundantly illustrated, including multiple views of each sculpture. The Oxford History of Western Art Martin Kemp, 2000. The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years, from the classical period to the end of the twentieth century. OHTWA is an innovative and challenging reappraisal of how the history of art can be presented and understood. None of the currently available general histories of art offers the wealth of perspectives and cross-media references of this book. Through a carefully devised modular structure, readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time. Here, uniquely, is not the simple linear story of art but a rich series of stories told from varying viewpoints. The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered. The 167 illustration groups, supported by explanatory text and picture captions, create a sequence of visual tours, not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated. The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience, allowing readers to become active participants in the process of interpretation and synthesis. Another key feature of the narrative is the redefinition of traditional period boundaries. Rather than relying on conventional labels such as Medieval, Renaissance, Baroque, etc., five major phases of significant historical change are established that unlock longer and more meaningful continuities: The art of classical antiquity from c. 600 BC to the fall of Rome in AD 410; The establishment of visual culture in Europe from 410 to 1527; the sack of papal Rome; European visual regimes from 1527 to 1770; The era of revolutions, 1770 to 1914; Modernism and after, 1914 to 2000. This new framework shows how the major religious and secular

functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

Failed Stone Patrick Loughran, 2006-11-21 Concrete and stone seem made to last forever But the fact is they develop problems It is not always as dramatic as the collapse of a section of the roof of the Paris Charles de Gaulle airport in 2004 Gradual changes also occur that may compromise the appearance and structural soundness of buildings constructed with these materials These changes can be created by efflorescence thermal stress weathering leakage and corrosion This book explains how to avoid typical kinds of failure With this in mind it systematically analyzes cases of damage in contemporary international architecture It also offers strategies for minimizing the risk of damage Examples include such high visibility structures as Finlandia Hall in Helsinki Parco della Musica in Rome and Vontz Center for Molecular Studies in Cincinnati In eight chapters typical kinds of damage are explained and illustrated with examples

Space, Image, and Reform in Early Modern Art Arthur J. DiFuria, Ian Verstegen, 2021-11-08 The essays in *Space Image and Reform in Early Modern Art* build on Marcia Hall's seminal contributions in several categories crucial for Renaissance studies especially the spatiality of the church interior the altarpiece's facture and affectivity the notion of artistic style and the controversy over images in the era of Counter Reform Accruing the advantage of critical engagement with a single paradigm this volume better assesses its applicability and range The book works cumulatively to provide blocks of theoretical and empirical research on issues spanning the function and role of images in their contexts over two centuries Relating Hall's investigations of Renaissance art to new fields *Space Image and Reform* expands the ideas at the center of her work further back in time further afield and deeper into familiar topics thus achieving a cohesion not usually seen in edited volumes honoring a single scholar

The Politics of Water in the

Art and Festivals of Medici Florence Felicia M. Else, 2018-07-27 This book tells the story of one dynasty's struggle with water to control its flow and manage its representation. The role of water in the art and festivals of Cosimo I and his heirs Francesco I and Ferdinando I de Medici informs this richly illustrated interdisciplinary study. Else draws on a wealth of visual and documentary material to trace how the Medici sought to harness the power of Neptune whether in the application of his imagery or in the control over waterways and maritime frontiers as they negotiated a place in the unstable political arena of Europe and competed with foreign powers more versed in maritime traditions and aquatic imagery.

The Color of Life J. Paul Getty Museum, 2008 There has been a persistent tradition of enlivening sculptures with color. This book presents five essays on polychromy in classical Greek through contemporary sculpture along with discussions of over 40 extraordinary polychrome sculptures.

Piero di Cosimo Dennis Geronimus, Michael Kwakkelstein, 2019-03-25 The study of Piero di Cosimo belongs no less to the history of the imagination than to the history of art. As was true for Giorgio Vasari five centuries ago, Piero's intensely personal visual language remains a moving target for modern scholars. Yet as surprising and strange as his pictorial solutions appear, we have never known as much about Piero as we do today. Freed from the powerful spell of Vasari's biography cum cautionary tale, the Piero that emerges is not solely a conjurer of the uncanny but a sensitive observer of the emotions, the natural and manmade worlds, humans and beasts, surfaces and coloristic effects, phenomena, material and ephemeral. The conference from which the thirteen essays in this volume spring provided a forum for international scholars to continue the ongoing conversation and to ask new questions. The latter address Piero's relationship to his artistic contemporaries north and south of the Alps, the master's Marian imagery, his intellectual engagement with classical traditions, the dual themes of naturalism and exoticism, and the latest technical findings. Topics of investigation thus range as broadly as Piero's own versatile production, uniting diverse fields and methods, traversing regional boundaries and often venturing far beyond Florence's city walls into the wild. Contributors are Ianthi Assimakopoulou, Marina Belozerskaya, Jean Cadogan, Elena Capretti, Alessandra Galizzi Kroegel, Dennis Geronimus, Guy Hedreen, Sarah Blake McHam, Anna Teresa Monti, Paula Nuttall, Roberta J. M. Olson, Lesley Stevenson, Lisa Venerosi Pesciolini, and Elizabeth Walmsley.

Tapestry in the Renaissance Thomas P. Campbell, Metropolitan Museum of Art (New York, N.Y.), 2002 Tapestries, the art form of kings, were a principal tool used by powerful Renaissance rulers to convey their wealth and might. From 1460 to 1560, courts and churches lavished vast sums on costly weavings in silk and gold thread from designs by leading artists. In this lavishly illustrated book, the first major survey of tapestry production of this period, contributors analyze some of these beautiful tapestries, examine the stylistic and technical development of tapestry production in the Low Countries, France, and Italy during the Renaissance, and discuss the contribution that the medium made to art, liturgy, and propaganda of the day.
