Shadow Pasts William D. Rubinstein,2014-09-11 For many intelligent people the stuff of history does not consist of the kind of dry as dust investigations of diplomatic economic or political history that most university historians research and write about but the famous topics of history s mysteries who was Jack the Ripper Was there a conspiracy to kill President Kennedy Did Richard III murder the Princes in the Tower What are the mysteries of the ancient Pyramids Not only have a great many books and articles been written on these and similar topics by so called amateur historians but they have generated societies conferences newsletters and television programmes Many

people who are not academic historians take a keen interest in these topics and have in some cases made themselves real experts on them with interesting theories of their own. Despite all of this however these topics are virtually ignored by academic historians and can be treated with contempt. In *Shadow Pasts* William D. Rubinstein, a well known and widely published history professor, examines seven of the most famous and interesting topics which have been discussed, debated, examined and written about by amateur historians. Each of these mysteries and the theories surrounding them are examined in detail with Professor Rubinstein presenting his own original and sometimes surprising conclusions about what really happened.

Gibson, 2014-11-28. *Serial Killers Around the World: The Global Dimensions of Serial Murder* compiles serial murder case studies from several countries from Australia to Great Britain and from Japan to Pakistan. The book highlights six dimensions of each case: the killer, the serial murders, other crimes, communication, the investigation, and trial and punishment of the accused. Readers both general and aspiring criminologists alike will find *Serial Killers Around the World* an interesting resource for critical information on serial murders committed in nations around the world.

Science Images and Popular Images of the Sciences Peter Weingart, Bernd Huppauf, 2012-10-12. What is a popular image of science and where does it come from? Little is known about the formation of science images and their transformation into popular images of science. In this anthology contributions from two areas of expertise: image theory and history, and the sociology of the sciences, explore techniques of constructing science images and transforming them into highly ambivalent images that represent the sciences. The essays, most of them with illustrations, present evidence that popular images of the sciences are based upon abstract theories rather than facts and equally images of scientists are stimulated by imagination rather than historical knowledge.
