The Sharing Economy Maria Regina Redinha, Maria Raquel Guimarães, Francisco Liberal Fernandes, 2018-11-21 The sharing economy is just one of several possible expressions to designate the complex model of social and economic relationships based on the intensive use of digital technology Constant permutations and combinations allow these relationships to be established through the intervention of a third party making traditional contractual positions flexible in such a way that today s employee is tomorrow s entrepreneur or today s consumer is tomorrow s supplier of goods and services The current legal framework is in many respects unable to accommodate such big changes and new legal regulations are required where adaptation of the existing ones proves to be inadequate This book highlights where changes are needed and where adaptations are required with a particular focus on the Portuguese Spanish Italian British and Brazilian contexts For that four different approaches are undertaken namely the meta legal macro legal micro legal and transnational approaches The study that results from these different approaches enables readers to acquire a general view on the current legal problems arising from the sharing

economy and was a direct result of a research project of the Centre for Legal and Economic Research at the University of Porto funded by Funda o para a Ci ncia e Tecnologia
