Johnson,1997 Jacques Louis David s brilliant painting of the young lovers Telemachus and Eucharis was created during the artist s last years when the defeat of Napoleon and the return of the monarchy in France forced him into exile in Brussels Several of his paintings from this period show his preoccupation with the psychology of love but none depicts the emotions of parting more tenderly than this painting from 1818 Dorothy Johnson discusses how David s political involvement affected his personal life and career taking him from history painter to revolutionary to living in exile The effects of these experiences came together at the end of his life in the creation of some of his richest and most complex works **Artful Science**

Barbara Maria Stafford,1994 Reveals the magic of learning in the 18th century This text draws on historical sources and popular imagery to make the case for the pedagogical opportunities suggesting ways of putting intelligence enjoyment and communicative power back into thinking with images **The Red Flag** David Priestland,2016-05-03 The best and the most accessible one volume history of communism now available A far reaching vividly written account Foreign Affairs In The Red Flag Oxford professor David Priestland tells the epic story of a movement that has taken root in dozens of countries across two hundred years from its birth after the French Revolution to its ideological maturity in nineteenth century Germany to its rise to dominance and subsequent fall in the twentieth century Beginning with the first modern Communists in the age of Robespierre Priestland examines the motives of thinkers and leaders including Marx Engels Lenin Stalin Castro Che Guevara Mao Ho Chi Minh Gorbachev and many others Priestland also shows how Communism in all its varieties appealed to different societies for different reasons in some as a response to inequalities and in others more out of a desire to catch up with the West But paradoxically while destroying one web of inequality Communist leaders were simultaneously weaving another It was this dynamic together with widespread economic failure and an escalating loss of faith in the system that ultimately destroyed Soviet Communism itself At a time when global capitalism is in crisis and powerful new political forces have arisen to confront Western democracy The Red Flag is essential reading if we are to apply the lessons of the past to navigating the future Detailed and scholarly but written in lively prose this is a rich satisfying account of the most successful utopian political movement in history Publishers Weekly starred review [Science and Polity in France](#) Charles Coulston Gillispie,2014-10-20 From the 1770s through the 1820s the French scientific community predominated in the world to a degree that no other scientific establishment did in any period prior to the Second World War In his classic Science and Polity in France The End of the Old Regime Charles Gillispie analyzed the cultural political and technical factors that

encouraged scientific productivity on the eve of the Revolution In the present monumental and elegantly written sequel to that work which Princeton is reissuing concurrently he examines how the revolutionary and Napoleonic context contributed to modernization both of politics and science In politics argues Gillispie the central feature of this modernization was conversion of subjects of a monarchy into citizens of a republic in direct contact with a state enormously augmented in power To the scientific community attainment of professional status was what citizenship was to all Frenchmen in the republic proper namely the license to self governance and dignity within the respective contexts Revolutionary circumstances set up a resonance between politics and science since practitioners of both were future oriented in their outlook and scornful of the past Among the creations of the First French Republic were institutions providing the earliest higher education in science From them emerged rigorously trained people who constituted the founding generation in the disciplines of mathematical physics positivistic biology and clinical medicine That scientists were able to achieve their ends was owing to the expertise they provided the revolutionary and imperial authorities in education medicine warfare empire building and industrial technology

Visions of War David D. Perlmutter, 2025-09-23 *Visions of War* provides a historical survey an anatomy an interpretation and a polemic about the ways human beings have created pictures of battle and conflict from the Stone Age to the Gulf War From the dawn of time to the present from the days of mammoth hunting to the era of Scud busting pictures of war constitute the most persistent genre of images human beings have created In fact human beings are the only creatures who engage in these two activities organized violence and the making of pictorial images and the author shows how both art and war emerge from the same source the hunter s eye David D Perlmutter s *Visions of War* explores and analyzes the thirteen thousand year legacy of pictures of war from various cultures over the centuries from the Stone Age cave paintings and monumental sculpture of the ancient Near East to the art of the classical period and the Middle Ages from pre contact Mesoamerican imagery to Napoleonic propaganda and totalitarian art and on to the instantaneous images of the Gulf War

A Time-Release History of the Opioid Epidemic J.N.

Campbell, Steven M. Rooney, 2018-06-09 This Brief takes the reader on a chemical journey by following the history for over two centuries of how an opiate became an opioid thus spawning an empire and a series of crises These imperfect resemblances of alkaloids are both natural and synthetic substances that particularly in America are continually part of a growing concern about overuse This seemed an inviting prospect for those in pain but as the ubiquitous media coverage continues to lay bare the levels of abuse point to the fact that perhaps an epidemic is upon us if not a culture war Seeking

answers to how and why this addiction crisis transpired over two hundred years of long development this Brief examines the role that the chemistry laboratory played in turning patients into consumers By utilizing a host of diverse sources this Brief seeks to trace the design and the production of opioids and their antecedents over the past two centuries From the isolation and development of the first alkaloids with morphine that relieved pain within the home and on the battlefield to the widespread use of nostrums and the addiction crisis that ensued to the dissemination of drugs by what became known as Big Pharma after the World Wars and finally to competition from home made pharmaceuticals the progenitor was always in some form a type of chemistry lab At times the laboratory pressed science to think deeply about society s maladies such as curing disease and alleviating pain in order to look for new opportunities in the name of progress Despite the best intentions opioids have created a paradox of pain as they were manipulated by creating relief with synthetic precision and influencing a dystopian vision Thus influence came in many forms from governments from the medical community and from the entrepreneurial aspirations of the general populace For better but mostly for worse all played a role in changing forever the trajectory of what started with the isolation of a compound in Germany Combining chemistry and history in a rousing new long form narrative that even broadens the definition of a laboratory the origins and future of this complicated topic are carefully examined

Images of Childhood Paul Duncum,2023-07-13 Drawing on a rich legacy of pictorial evidence Images of Childhood examines historical constructions of childhood and how they reinforce or challenge the prevailing view of childhood as a state of innocence Each chapter explores how visual elements such as framing points of view and lighting as well as clothes accessories and body language help to construct our many different conceptions of children from members of the family unit and assumed gender roles to schooling and aesthetic objects through to their economic value and use in political propaganda Skillfully navigating a multitude of perspectives on this topic Paul Duncum considers both how our ideas beliefs and values have changed throughout history and how some have remained unchanged He also explores the cultural notion of the child within and how this has contributed to the way adults perceive children The result is a text far broader in scope than any other in its field as art history is interweaved with contemporary popular culture to explore how we visually represent childhood In doing so the book highlights the real life implications that these representations have on children s rights
