Who's who in Economics

Mark Blaug,1986 This edition includes 337 more entries bringing the total to over 1 400 thumbnail sketches of economists who have contributed to the literature

over the past three centuries *Does Economic Space Matter?* Hiroshi Ohta, 1993-09-15 This is a Festschrift to honour Professor Melvin Greenhut who has long toiled on spatial economics The book accordingly focuses on a single question in what sense economic space matters in economic theory Space in economics is an elusive concept apparently separating and embracing economic agents at the same time This is why adding it to already overly complicated economic agents at the same time This is why adding it to already overly complicated economic models may not necessarily help economics to become sufficiently realistic In this book leading scholars of international stature try to find ways of introducing space in economic theory which will make it simpler and more realistic analysing theoretical and historical issues of contemporary relevance such as land use congestion and public goods location theory and spatial competition
