**Governing Death and Loss** Stephen Conway, 2011 Political economic social cultural and technological changes have led to profound transformations in the ways that death and loss are perceived and managed in contemporary society Over the last few decades the long term shift to chronic illness as a major causal factor has significantly increased the time scale of dying Most people die in institutions and care is typically medical Many communities and ordinary citizens now relinquish control and involvement to experts in the last stages of life However at global and local levels new institutional arrangements are emerging to govern the changing face of death and a new model is being developed to counter claims of the creeping medicalisation of death and dying Emphasising the international context of the issues involved this book illustrates the interlinking nature of society death and loss and gives examples of governance that promotes the empowerment participation and the increasing need for the involvement of ordinary people and communities in differing social and cultural contexts All chapters are written at an accessible level and will appeal to a wide readership Part 1 of the book provides a sociological understanding of the governance of death and loss in international and historical contexts and the implications for practice Part 2 provides examples of good practice drawing upon a sociological understanding

**How States Die** Douglas Lemke, 2025 When states die there are massive consequences for neighboring states and sometimes for the entire international system Somalia's death in 1991 created a safe haven for criminal non state actors and has unsettled the Horn of Africa for decades When the Iraqi state was dismantled in 2003 a similar set of consequences plagued the Middle East and the international system more broadly In *How States Die* Douglas Lemke provides a rigorous analysis of this phenomenon by reconceptualizing the definitions of the state and state death A state exists according to Lemke whenever a set of state like political entities exercise control over a populated territory This includes both sovereign states and territorial contenders which lack formal diplomatic recognition Conceiving statehood in this way vastly increases the population of states that have experienced state death which casts new light on the entire phenomenon This increased range not only expands the list of ways states can die it also provides insights into whether diplomatic recognition is associated with longer life and shows that state strength is not related to state death Similarly in contrast to the conventional wisdom victories in conflict do not coincide with longer state survival State death is one of the central questions within international relations and Lemke's reformulation of what a state is will transform our understanding of how and why these deaths happen

British Ruling Cases from Courts of Great Britain, Canada, Ireland, Australia and Other Divisions of the British Empire, Extensively Annotated, 1922 This series of reports is in a sense a continuation but with a decided expansion of the plan of the English ruling cases as it takes the cases from the British empire instead of from England only but it continues the English ruling cases in the sense that it will include the most important cases from the English courts decided since that series terminated Pref Future T/Issues Ruth Gehrmann, 2024-07-01 Transplant practices are discussed in the medical realm in fictional texts and in popular advertisement Yet how do these sectors intersect and influence each other How can the accounts of surgeons invested in transplant practice be brought into conversation with fictional voices Future T Issues positions transplantation at the intersection of natural science and the

humanities and adds to the discussion of organ transplantation by focusing on one specific aspect that is commonly overlooked the idea of speculation By engaging with speculative fiction in conversation with life writing it contributes to a more thorough understanding of transplantation as a cultural practice showcasing that transplantation is imagined as part of the future both within and beyond the literary sphere Hereby this book establishes the relationship between literary and medical narratives as reciprocal in effect eroding boundaries between the life sciences and literary studies As an interdisciplinary endeavor this study contributes to literary studies specifically to the fields of life writing speculative fiction and young adult fiction it offers insights for the study of transplantation in the popular realm and adds to the medical humanities

Robert Campbell, 1896 **The Virtues of Vulnerability** Sara Rushing, 2020-11-20 Within the liberal tradition the physical body has been treated as a focus of rights discussion and a source of economic and democratic value it needs protection but it is also one's dominion tool and property and thus something over which we should be able to exercise free will However the day to day reality of how we live in our bodies and how we make choices about them is not something over which we can exercise full control In this way embodiment mirrors life in a pluralist body politic we are interdependent and vulnerable exposed with and to others while desiring agency As disability feminist and critical race scholars have all suggested barriers to bodily control are often a problem of public and political will and social and economic structures that render relationality and caring responsibilities private invisible and low value These scholarly traditions firmly maintain the importance of bodily integrity and self determination but make clear that autonomy is not a matter of mere non interference but rather requires extensive material and social support Autonomy is thus totally intertwined with not opposed to vulnerability Put another way the pursuit of autonomy requires practices of humility Given this what do we learn about agency and self determination as well as trust self knowledge dependence and resistance under such conditions of acute vulnerability The Virtues of Vulnerability looks at the question of how we navigate choice and control over our bodies when it comes to conditions like birth illness and death particularly as they are experienced within mainstream medical institutions operating under the pressures of neoliberal capitalism There is often a deep disconnect between what people say they want in navigating birth

illness and death and what they actually experience through all of these life events Practices such as informed consent the birth plan advanced directives and the patient satisfaction survey typically offer a thin and unreliable version of self determination In reality choice in these instances is encumbered and often determined by our vulnerability at the most critical moments This book looks at the ways in which we navigate birth illness and death in order to think about how vulnerability and humility can inform political will Overall the book asks under what conditions vulnerability and interdependence enhance or diminish our sense of ourselves as agents In exploring this question it aims to produce a new vocabulary for democratic politics highlighting traits that have profound political implications in terms of how citizens aspire struggle relate to and persevere with each other Laws Regulating the Relative Rights and Duties of Masters, Servants, and Apprentices in the Cape Colony, Including the Workmen's Compensation Act, 1905 Cape of Good Hope (South Africa), Hercules Tennant, 1906 What Death Means Now Tony Walter, 2017-08-30 Though death is universal how we respond to it depends on when and where we live Dying and grieving continually evolve new preparations for dying new kinds of funerals new ways of handling grief and new ways to memorialise are developing all the time Bringing 25 years of research and teaching in the sociology of death and dying to this important book Tony Walter engages critically with key questions such as should we talk about death more and plan in advance How effective is this as more people suffer frailty and dementia How do physical migration and digital connection affect place bound deathbeds funerals and graves Is the traditional funeral still relevant Can burial and cremation be ecological And how should we grieve quietly openly or online
