Women serve in help finance and give permission for the activities of this country's armed forces yet those who serve remain unknown and those who are accountable often forget their responsibility **Gendering Global Conflict** Laura Sjoberg, 2013-08-13 Laura Sjoberg positions gender and gender subordination as key factors in the making and fighting of global conflict Through the lens of gender she examines the meaning causes practices and experiences of war building a more inclusive approach to the analysis of violent conflict between states Considering war at the international state substate and individual levels Sjoberg's feminist perspective elevates a number of causal variables in war decision making These include structural gender inequality cycles of gendered violence state masculine posturing the often overlooked role of emotion in political interactions gendered understandings of power and states mistaken perception of their own autonomy and unitary nature *Gendering Global Conflict* also calls attention to understudied spaces that can be sites of war such as the workplace the household and even the bedroom Her findings show gender to be a linchpin of even the most tedious and seemingly bland tactical and logistical decisions in violent conflict Armed with that information Sjoberg undertakes the task of redefining and reintroducing critical readings of war's political economic and humanitarian dimensions developing the beginnings of a feminist theory of war **Frontline Feminisms** Marguerite Waller, Jennifer Rycenga, 2004-11-23 First published in 2001 Routledge is an imprint of Taylor Francis an informa company **A Companion to Women's Military History**, 2012-08-17 Military institutions have everywhere and always shaped the course of history but women's near universal participation in them has largely gone unnoticed This volume addresses the changing relationships between women and armed forces from antiquity to the present The eight chapters in Part I present broad scholarly reviews of the existing literature to provide a clear understanding of where we stand An extended picture essay documents visually women's military work since the sixteenth century The book's second part comprises eight exemplary articles more narrowly focused than the survey articles but illustrating some of their major themes Military history will benefit from acknowledging women's participation as will women's history from recognizing military institutions as major factors in molding women's lives Contributors include Jorit Wintjes Mary Elizabeth Ailes John A Lynn Barton C Hacker Kimberly Jensen Margaret Vining D Ann M Campbell Carol B Stevens Jan Noel Elizabeth Prelinger Donna Alvah Karen Hagemann Yehudit Kol Inbar Dorotea Gucciardo and Megan Howatt and Judith Hicks Stiehm **Women Representatives in Britain, France, and the United States** Harriet B. The twentieth century has been a century of wars, genocides and violent political conflict; a century of militarization and massive destruction. It has simultaneously been a century of feminist creativity and struggle worldwide, witnessing fundamental changes in the conceptions and everyday practices of gender and sexuality. What are some of the connections between these two seemingly disparate characteristics of the past century? And how do collective memories figure into these connections? Exploring the ways in which wars and their memories are gendered, this book contributes to the feminist search for new words and new methods in understanding the intricacies of war and memory. From the Italian and Spanish Civil Wars to military regimes in Turkey and Greece, from the Armenian genocide and the Holocaust to the wars in Abkhazia, East Asia, Iraq, Afghanistan, former Yugoslavia, Israel and Palestine, the chapters in this book address a rare selection of contexts and geographies from a wide range of disciplinary perspectives. In recent years, feminist scholarship has fundamentally changed the ways in which pasts, particularly violent pasts, have been conceptualized and narrated. Discussing the participation of women in war, sexual violence in times of conflict, the use of visual and dramatic representations in memory research, and the creative challenges to research and writing posed by feminist scholarship, *Gendered Wars, Gendered Memories* will appeal to scholars working at the intersection of military war memory and gender studies, seeking to chart this emerging territory with feminist curiosity.

Gender Integration in NATO Military Forces Lana Obradovic, 2016-04-15 Numerous states have passed gender integration legislation permanently admitting women into their military forces As a result states have dramatically increased women s numbers and improved gender equality by removing a number of restrictions Yet despite changes and initiatives on both domestic and international levels to integrate gender perspectives into the military not all states have improved to the same extent Some have successfully promoted gender integration in the ranks by erasing all forms of discrimination but others continue to impede it by setting limitations on equal access to careers combat and ranks Why do states abandon their policies of exclusion and promote gender integration in a way that women s military participation becomes an integral part of military force By examining twenty four NATO member states this book argues that civilian policymakers and military leadership no longer surrender to parochial gendered division of the roles but rather support integration to meet the recruitment numbers due to military modernization professionalization and technological advancements Moreover it proposes that increased pressure by the United Nations to integrate gender into security and NATO seeking standardization and consistency on the international level and women s movements on the domestic level are contributing to greater gender integration in the military Winner of the 2015 ERGOMAS Best Book in Civil Military Relations Award

research Janet McIntosh meticulously traces the nuances of military kill talk as it permeates the vast nervous system of the military from the first exposure to yelling in Marine Corps basic training to the dark humor and nihilistic expressions found in war zones in Vietnam and the Middle East McIntosh reveals how military trainers use language to deindividuate toughen and masculinize recruits while infantry soldiers develop distinct linguistic repertoires and attitudes to suppress empathy dehumanize and racialize the enemy cope with loss and dwell in a moral gray zone Kill Talk also addresses national debates over language use in a diverse world exploring tensions between calls for sensitivity and restraint in military speech and the perception that these can threaten national security The book highlights the contradictions between the rhetoric of military honor and moral integrity and the harsh sometimes depraved language of combatants suggesting that these paradoxes enable military violence yet contribute to moral injury It concludes with an exploration of veteran poets and artists who have found innovative ways to use language and other forms of expression to critique military institutions and begin the process of demilitarizing their psyches

On the Origins of Gender Inequality Joan Huber, 2015-12-03 In our fast paced world of technology and conveniences the biological origins of women s inequality can be forgotten This book offers a richer understanding of gender inequality by explaining a key cause women s reproductive and lactation patterns Until about 1900 infants nursed every fifteen minutes on average for two years because very frequent suckling prevented pregnancy The practice evolved because it maximized infant survival If a forager child was born before its older sibling could take part in the daily food search the older one died This practice persisted until the modern era because until after the discovery of the germ theory of disease human milk was the only food certain to be unspoiled Lactation patterns excluded women from the activities that led to political leadership During the twentieth century the ancient mode declined and women entered the labor market en masse Joan Huber challenges feminists toward a richer understanding of biological origins of inequality knowledge that can help women achieve greater equality today

McFarlane, 2021-04-08 The rights of pregnant workers as well as the lack of paid maternity leave have increasingly become topics of a major policy debate in the United States Yet few discussions have focused on the U S military where many of the latest policy changes focus on these very issues Despite the armed forces increases to maternity related benefits servicewomen continue to be stigmatized for being pregnant and taking advantage of maternity policies In an effort to understand this disconnect Megan McFarlane analyzes military documents and conducts interviews with enlisted servicewomen and female officers She finds a policy culture disparity within the military that pregnant servicewomen themselves often co construct making the policy changes significantly less effective McFarlane ends by offering suggestions

for how these policy changes can have more impact and how they could potentially serve as an example for the broader societal debate
