Solving Ordinary Differential Equations I Ernst Hairer, Syvert P. Nørsett, Gerhard Wanner, 2008-04-16 This book deals with methods for solving nonstiff ordinary differential equations The first chapter describes the historical development of the classical theory and the second chapter includes a modern treatment of Runge Kutta and extrapolation methods Chapter three begins with the classical theory of multistep methods and concludes with the theory of general linear methods The reader will benefit from many illustrations a historical and didactic approach and computer programs which help him/her learn to solve all kinds of ordinary differential equations This new edition has been rewritten and new material has been included

FORMAT II - Second Version of Fortran Matrix Abstraction Technique R. C. Morris, 1967 A detailed description of the analytical approach development and use of a computer program which generates the matrices necessary for analysis of general aircraft structures for internal loads and deflections by the matrix force method is presented The Force Method Matrix Generator program is designed for use in conjunction with the FORMAT II system as a user coded subroutine and as such will accommodate matrices of the order 2000 X 2000 Up to six degrees of freedom may be considered at each joint in the structure which is idealized as an assembly of bar elements capable of resisting axial bending and torsional forces and rectangular or near rectangular panel elements resisting shearing forces and which is supported by discrete translational and rotational forces acting at the joints Applied loading may be any combination of mechanical loads at the joints thermal loads resulting from bar element elongation due to temperature change and initial joint displacements The report includes a detailed description of the computer program operation and coding and a review of the matrix equations which employ the generated matrices and which are subsequently processed and solved by the FORMAT II system to give internal loads and deflections

Macs in the Ministry David Lang, 2010 Macs in the Ministry Your ministry demands your time energy creativity passion and commitment But you ve got a Mac so you have a tool that can save you time and energy spark your creativity and enable you to keep your commitments without losing your passion Find out how to harness the programs you already have along with additional resources you may want to consider to help you in nearly every aspect of your ministry Part One of this book is about Inspiration about

discovering what's possible. Learn how to use online resources or Bible software to prepare a lesson or sermon. Discover the variety of ways you can present your message to a congregation or audience using video created in iMovie, photo slide shows prepared in iPhoto, original music recorded in GarageBand, and more elaborate presentations using Keynote or specialized worship software. Learn how you can publish your message to a wider audience through flyers, handouts, and other print publications by creating podcasts and vodcasts, video podcasts, and distributing them through iTunes by creating your own professional quality CDs and DVDs by making your videos available through websites like YouTube or by developing your own great looking websites using iWeb and Apple's MobileMe service. Once you're pumped about all the exciting ways you can present and publish your message, you'll probably need to enlist some help from others. Use the Mac to get members of your congregation or church youth group participating in your ministry. With so many different ways to use Macs in ministry, there are countless opportunities to get people using their gifts in service to the kingdom. Going one step further, you'll even see how the Mac can be used to meet practical needs. Forget car washes to raise money for youth retreats and mission trips. Why not develop and sell personalized greeting cards, calendars, audio CDs, or video DVDs? How about starting a ministry to train people in the community to do basic video editing, page layout, or web design? With a little creativity, you can use your Mac to minister to people's practical needs as well as to present a polished message. Part Two of this book is about perspiration about actually making these things happen. Here you'll find a series of projects that will show you how to do all the things you're now inspired to do. Get step-by-step instructions for creating an iMovie, developing slide shows, and print projects in iPhoto, recording and publishing podcasts, producing a DVD, and developing a web site in iWeb. See what you can do using other applications like Pages, Keynote, Bible study software, and worship presentation software. Where Part One will get your wheels turning, Part Two will actually get you moving.

Computer-Aided Modeling of Reactive Systems Warren E. Stewart, Michael Caracotsios, 2008-03-17

Learn to apply modeling and parameter estimation tools and strategies to chemical processes using your personal computer. This book introduces readers to powerful parameter estimation and computational methods for modeling complex chemical reactions and reaction processes. It presents useful mathematical models, numerical methods for solving them, and statistical methods for testing and discriminating candidate models with experimental data. Topics covered include Chemical reaction models, Chemical reactor models, Probability and statistics, Bayesian estimation, Process modeling with single response data, Process modeling with multi response data, Computer software: Athena Visual Studio is available via a related Web site <http://www.athenavisual.com> enabling readers to carry out parameter estimation based on their data and to carry out process modeling using these parameters. As an aid to the reader, an appendix of example problems and solutions is provided.

Computer Aided Modeling of Reactive Systems is an ideal supplemental text for advanced undergraduates and graduate students in chemical engineering courses while it also serves as a valuable resource for practitioners in industry who want to keep up to date on the most current tools and strategies available.

Solving Ordinary Differential Equations II Ernst Hairer, Gerhard Wanner, 2013-03-14. Whatever regrets may be we have done our best. Sir Ernest Shackleton turning back on 9 January 1909 at 88° 23' South. Brahms struggled for 20 years to write his first symphony. Compared to this, the 10 years we have been working on these two volumes may even appear short. This second volume treats stiff differential equations and differential algebraic equations. It contains three chapters: Chapter IV on one step Runge Kutta methods for stiff problems, Chapter V on multistep methods for stiff problems, and Chapter VI on singular perturbation and differential algebraic equations. Each chapter is divided into sections. Usually the first sections of a chapter are of an introductory nature, explain numerical phenomena, and exhibit numerical results. Investigations of a more theoretical nature are presented in the later sections of each chapter. As in Volume I, the formulas, theorems, tables, and figures are numbered consecutively in each section and indicate in addition the section number. In cross references to other chapters, the Latin chapter number is put first. References to the bibliography are again by author plus year in parentheses. The bibliography again contains only those papers which are discussed in the text and is in no way meant to be complete.
