inference and the bootstrap is introduced Causal inference is illuminated using simulation data graphs and R code for applications with real economic examples covering experiments matching regression discontinuity difference in difference and instrumental variables The interplay of growth related data and models is presented before the book introduces the reader to time series data analysis with graphs simulation and examples Lastly two computationally intensive methods generalized additive models and random forests an important and versatile machine learning method are introduced intuitively with applications The book will be of great interest to economists students teachers and researchers alike who want to learn R It will help economics students gain an intuitive appreciation of applied economics and enjoy engaging with the material actively while also equipping them with key data science skills *Visas and Walls* Nazli Avdan,2019-02-01

Borders traditionally served to insulate nations from other states and to provide bulwarks against intrusion by foreign armies In the age of terrorism borders are more frequently perceived as protection against threats from determined individuals arriving from elsewhere After a deadly terrorist attack leaders immediately encounter pressure to close their borders As Nazli Avdan observes cracking down on border crossings and policing migration enhance security However the imperatives of globalization demand that borders remain open to legal travel and economic exchange While stricter border policies may be symbolically valuable and pragmatically safer according to Avdan they are economically costly restricting trade between neighbors and damaging commercial ties In *Visas and Walls* Avdan argues that the balance between economics and security is contingent on how close to home threats whether actual or potential originate When terrorist events affect the residents of a country or take place within its borders economic ties matter less When terrorist violence strikes elsewhere and does not involve its citizens the unaffected state's investment in globalization carries the day Avdan examines the visa waiver programs and visa control policies of several countries in place in 2010 including Turkey's migration policies analyzes the visa issuance practices of the European Union from 2003 until 2015 and explores how terrorism and trade affected states propensities to build border walls in the post World War II era Her findings challenge the claim that border crackdowns are a reflexive response to terrorist violence and qualify globalists assertions that economic globalization makes for open borders *Visas and Walls* encourages policymakers and leaders to consider more broadly the effects of economic interdependence on policies governing borders and their permeability **Annals of Entrepreneurship Education and Pedagogy - 2025** Susana C. Fundamentals of Board Busyness and Corporate Governance Vu Quang Trinh, 2021-11-25 This book delivers the essential concepts and theoretical perspectives of corporate governance and board busyness. It uses the unique context of a dual banking system to capture the potential effects of such aspects on corporate outcomes. Board busyness refers to a board with a substantial proportion of busy members who hold multiple directorships. In most cases, directors are overboarded, which means that they hold an excessive number of seats across different boards. The busyness of individuals is gauged to infer their monitoring and recommending abilities through their involvement efforts, knowledge, skills, and experience, and hence their behaviour in financial contexts. Yet, an assessment of board busyness and its effects is challenging and inconclusive concerning the two opposing arguments surrounding this board attribute: reputation and busyness. The book is the first to thoroughly discuss this up-to-date concept within the dual banking system, and it is designed to help new researchers in this field and students boost their research and academic careers.

Student Self-Assessment as a Process for Learning Zi Yan, 2022-08-08 Covering both higher education and school education, this book contributes to the field of assessment by providing a systematic account of student self-assessment based on a consistent conceptualisation. Yan advocates viewing self-assessment as an active and reflective process and using it as a learning strategy rather than an assessment method. He builds on a newly developed self-assessment model adopting a process perspective and synthesises a series of interrelated empirical investigations into the whole chain of student self-assessment research. The research encompassed in the volume spans from self-assessment practices and measurement through predictors of self-assessment, its interweaved relationship with self-regulated learning and feedback literacy, impact on student learning outcomes, to designing sustainable self-assessment interventions. The empirical evidence is from a wide range of current scholarship to ensure that the principles and implications conveyed are applicable internationally. Policymakers, students, and scholars in educational assessment, educational psychology, and teaching and instruction will find the theoretical explorations and empirical investigations contained within useful to show how student self-assessment could be better conceptualised, researched, and practised.

Econometrics for Daily Lives, Volume II Tam Bang Vu, 2018-02-25 This volume deals with advanced topics and specific problems in applied econometrics. Part III introduces advanced topics in econometric theory and contains three chapters.
