Kentucky Countryside Transition Middle Class Louisville:

Kentucky Countryside in Transition Stephanie Bower, 2024-01-12 Kentucky Countryside in Transition charts the rise of the American middle class at the turn of the twentieth century by examining the migration from the Kentucky countryside to the city and subsequently the suburbs of Louisville. The formation of the middle class in Louisville was fostered by two factors: a boom in white collar employment and the electric streetcar, an innovation that fundamentally changed the urban landscape. Ultimately, a narrative of industrialization and modernity, this study focuses on a group of forty-two families who lived at the end of the Broadway Trolley line in an area that came to be known as the Cherokee Triangle. This suburban neighborhood was dominated by white collar commuters who were driven to Louisville by a desire to get ahead but continued to embrace a nostalgia for country life. In this meticulous three-generation study, Stephanie Bower follows this group of families as they make the transition from rural farmers and cultivators to city laborers and white collar workers. By mining census records, city directories, and county records, Bower carefully reconstructs the biographical details of residents in an effort to paint a picture of life in this streetcar suburb during this important period of transformation. Regional studies of the middle class during this pivotal era are often overlooked in contemporary scholarship. Consequently, this analysis will be of interest to those researching Louisville middle class formation and suburbanization as well as to local genealogists tracing their family histories. Stephanie Bower is professor emerita of history at the University of Indiana Southeast. She is the author of *Famism: The Impact of Demographic Factors on Family Structure* and her articles have appeared in *Hispanic American History Review*, *The Americas*, *LOCUS*, and *Historical Methods*. **Between Bohemia and Suburbia** William J. Weston, 2019-04-16 This book identifies a distinctive kind of urban neighborhood that is on the rise throughout the USA: the dense, walkable, mixed-use bourgeois bohemian suburb, or the boburb. It looks at case studies of areas to live in Louisville, Kentucky. Based on scores of interviews with college graduates, backed by survey data and Census figures, it provides a clear historical account of how these spaces arose. Chapters depict, analyze, and compare the Highlands neighborhood with other Louisville boburbs, contrasting them with the ephemeral bohemian quarters and the many suburban subdivisions. The Highlands are also compared with five other boburbs around the USA. Attention is given to the influence of transportation systems in shaping residential community and commercial spaces. Deeper cultural reasons for choosing the boburbs or the suburbs are also explored, including the political big sort between liberal and conservative places and Bourdieu's account of how the distinction between economic and cultural capital shapes how people choose to live where they live. This book will appeal to those interested in the evolution and distinctions among urban neighborhoods. It is ideal for academics and students within urban geography, urban gentrification, cities, and population. **Kentucky Countryside in Transition** Stephanie Bower, 2016 This book studies the microcosm of Louisville and its surrounding rural counties and the intersection of two characteristics associated with the formation of the middle class suburban residence and white collar employment.
