Kenya Atlas Of Our Changing Environment:

Kenya United Nations Environment Programme, 2009 This newest in a suite of the United Nations Environment Programme's UNEP Atlases have inspired decision makers to action through the power of photographs This Atlas does two unique things it assesses Kenya's progress towards its own goals of improving the environment to achieve development goals and delivers a stunning bird's eye view of environmental change through the use of paired satellite images taken years apart The Atlas will serve as an important educational tool to improve local national and international knowledge about environmental change in Kenya and to stimulate action at all levels to protect the rich resources that are the base of its culture economy and human well being **The Atlas of Environmental Migration** Dina Ionesco, Daria Mokhnacheva, François Gemenne, 2016-11-25

As climate change and extreme weather events increasingly threaten traditional landscapes and livelihoods of entire communities the need to study its impact on human migration and population displacement has never been greater The Atlas of Environmental Migration is the first illustrated publication mapping this complex phenomenon It clarifies terminology and concepts draws a typology of migration related to environment and climate change describes the multiple factors at play explains the challenges and highlights the opportunities related to this phenomenon Through elaborate maps diagrams illustrations case studies from all over the world based on the most updated international research findings the Atlas guides the reader from the roots of environmental migration through to governance In addition to the primary audience of students and scholars of environment studies climate change geography and migration it will also be of interest to researchers and students in politics economics and international relations departments

Kenya: A Natural Outlook Andreas B. Brink, Catherine Bodart, Graeme Buchanan, Marco Clerici, François Donnay, George Eshiamwata, Jean-Marie Gregoire, Bernard K. Kirui, Andrea Lupi, Ilaria Palumbo, Jean-François Pekel, 2013-10-22 Monitoring vegetation dynamics and land cover change in Kenya are essential for the sustainable management of natural resources and biodiversity conservation However accurate status of seasonal variation in vegetation and long term land cover change data valid at the regional and country level generally do not exist or are hard to obtain Here we describe the various ecological regions of Kenya and the associated rainfall and land cover patterns of each ecological zone This includes the use of low resolution satellite data time series to characterise for each ecoregion and land cover type the interannual variability of the vegetation cycle including the start mid and end of the growing season Seasonal variation in vegetation phenology is mapped to highlight the areas of greatest interannual variation and compared to rainfall patterns over the focal study period Statistical estimates of land cover change are produced for six broad classes for the years 1990 2000 and 2010 based on detailed land cover change assessed by a systematic sampling of high resolution satellite imagery Rates of change for Kenya are presented and discussed in light of the low resolution time series analysis Results highlight information on land cover change processes such as vegetation dynamics and deforestation These are discussed within the

context of the drivers of changes to the natural ecosystem their potential impact on land availability for human activities such as agriculture and logging for timber and fire wood production on the one side and habitat and biodiversity conservation on the other side Finally biodiversity and habitat value ecosystems and threats are analysed for Kenya s conservation and protected areas so as to identify the status of and pressures on the country s protected areas Six indicators of species irreplaceability habitat irreplaceability and the level of perceived threat to a protected area s habitat and species from agriculture and human population are analysed In addition high resolution satellite images taken over conservation areas are used for assessing land cover changes inside protected areas and in the surrounding 20km buffer zone The results show the importance and effectiveness of protected areas in reducing the loss of natural vegetation and hence protecting the habitats and biodiversity

Kenya: A Natural Outlook, 2013-10-22 Kenya is a thriving country in East Africa its economy is largely based on the natural environment that frames the tourism sector mainly through safaris and holidays on the coast The natural environment also underpins the second largest industry agriculture Kenya s social technological and industrial developments are a reference for many neighboring countries Kenya plays a leading role in Africa and attracts huge amounts of investments Furthermore the humanitarian community has made Nairobi its base for international headquarters and regional offices This makes Kenya a possible model for development and investment in its widest sense This book aims at updating the holistic view on Kenya s natural environment and resources It provides a sound scientific introduction to this country s physical and socioeconomic setting and its evolution through time and will appeal to a broad audience of students in Kenya and abroad as well as those working in the development and humanitarian sectors and to international donors looking for a scientific compendium on Kenya s environment Its structure and references allow the reader to deepen his or her knowledge of every theme touched on in the book Combines different aspects of physical geography water and soil resources and their management strategies Written by a blend of international and national experts Includes specific case studies

Urban Environments in Africa Myers, Garth, 2016-02-24 Africa s urban populations are growing rapidly raising numerous environmental concerns as the pace of change stretches local resources and generates hazardous and unhealthy living conditions Because these urban areas are also linked to the extremes of both poverty and wealth they offer a unique opportunity for analyzing the many aspects of environmental politics Drawing on fieldwork data map analysis place name study interviews and fiction studies Garth Myers explores African environmentalism from a variety of perspectives By acknowledging the clash between Western planning mindsets that focus on sustainable development and the lived realities of residents in often poor informal settlements this important book marks a critical advance in the study of Africa s urban environments It will have a profound impact across disciplines from geography to urban development environmental and African studies

Building Global Infrastructure Dale S. Rothman, Mohammad T. Irfan, Barry B. Hughes, Eli Margolese-Malin, Jonathan D. Moyer, 2015-12-03 Building Global Infrastructure is the fourth in a series of volumes Patterns of

Potential Human Progress that uses the International Futures IFs simulation model to explore prospects for human development how development appears to be unfolding globally and locally how we would like it to evolve and how better to assure that we move it in desired directions Earlier volumes addressed the reduction of global poverty the advance of global education and the improvement of global health Volume 4 sets out to tell the story of the future of global infrastructure The approach used in this book focuses on the question of whether individual societies will be able to meet future infrastructure demands Related questions include the following What is the range of realistically conceivable futures for infrastructure considering both demand and supply How are the demands for infrastructure balanced with the ability to meet these demands thereby linking the physical and financial treatment of infrastructure What are the effects of providing for infrastructure on issues such as economic productivity and health

Christian Faith and Environmental Stewardship Daniel K. Lagat, 2019-03-15 This book covers the contribution of Christianity in the care stewardship and management of the environment It uses ideas from the logical position of a Christian created in God's image redeemed by God and given responsibility to subdue and keep the earth arguing that a Christian has the responsibility and mandate to care for the environment It shows that successful stewardship happens when a Christian is aware of God's intention for creation exerts effort to increase it and is expected to give an

account to God for their actions toward it The book presents environmental concerns in Kenya as an opportunity for change describing situations and why they could become opportunities for change Seven worldviews are presented that discourage Christians who want to do environmental stewardship and Christian theological doctrines are discussed that could be used to cause ecclesial participation in environmental stewardship Finally the book envisions a Conserving Church with specific activities the church can do to successfully influence people to do environmental stewardship

Land Degradation and Socio-Economic Development Padmini Pani, 2020-05-19 This book offers an overview of recent literature on land degradation and its interrelationship with socio economic development processes in the developing world It provides an in depth analysis of land degradation as a physical process with an emphasis on the local and regional scales The volume contains a detailed case study of ravine formation processes in the Chambal valley a unique but least studied part of the world Using multi scale and multi disciplinary approaches and combining spatial socio economic data with remote sensing data this book provides an in depth analysis of the causes and implications of land degradation

Africa Water Atlas United Nations Environment Programme, 2010 This Africa Water Atlas is a visual account of Africa s endowment and use of water resources revealed through 224 maps and 104 satellite images as well as some 500 graphics hundreds of compelling photos plus a brief profile of the water situation in every country These visual elements vividly illustrate a succinct narrative describing and analysing Africa s water issues and exemplifying them through the judicious use of case studies The Atlas tells the paradoxical story of a continent with adequate renewable water resources but unequal access because the water is either abundant or scarce depending on the season or the place it explores the opportunities to develop Africa s untapped water resources and human capacities to deliver safe drinking water and sanitation services to achieve the water related Millennium Development Goals As well as hydropower and irrigation services that help support livelihoods and boost economic development

Birth of a New Earth Adrian Parr, 2017-10-24 In response to unprecedented environmental degradation activists and popular movements have risen up to fight the crisis of climate change and the ongoing devastation of the earth The environmental movement has undeniably influenced even its adversaries as the language of sustainability can be found in corporate mission statements government policy and national security agendas However the price of success has been compromise prompting soul searching and questioning of the politics of environmentalism Is it a revolutionary movement that opposes the current system Or is it reformist changing the system by working within it In *Birth of a New Earth* Adrian Parr argues that this is a false choice calling for a shift from an opposition between revolution and incremental change to a renewed collective imagination Parr insists that environmental destruction is at its core a problem of democratization and decolonization It requires reckoning with militarism market fundamentalism and global inequality and mobilizing an alternative political vision capable of freeing the collective imagination in order to replace an apocalyptic mindset frozen by the spectacle of violence *Birth of a New Earth* locates the emancipatory work of environmental politics in solidarities that can bring together different

constituencies fusing opposing political strategies and paradigms by working both inside and outside the prevailing system She discusses experiments in food sovereignty collaborative natural resource management and public interest design initiatives that test new models of economic democratization Ultimately Parr proclaims environmental politics is the refusal to surrender life to the violence of global capitalism corporate governance and militarism This defiance can serve as the source for the birth of a new earth
