Los Angeles Globalization Urbanization And Social Struggles World Cities Series:

Los Angeles Roger Keil, 1998-12-30 This book combines a historical narrative of urbanisation in Los Angeles with an examination of its changing social geography It provides a solid base from which to understand and explore the city further and a defined emphasis on recent developments It focuses on the role of local actors in the globalisation of Los Angeles and traces the ways in which local states boosters labour unions social movements neighbourhood and community organisations and other agents participate in negotiated world city formation

Social Power and the Urbanization of Water Erik Swyngedouw, 2004-03-11 Taking as his case study the city of Guayaquil in Ecuador where 600 000 people lack easy access to potable water Erik Swyngedouw aims to reconstruct theoretically and empirically the political social and economic conduits through which water flows and to identify how power relations infuse the metabolic transformation of water as it becomes urban These flows of water which are simultaneously physical and social carry in their currents the embodiment of myriad social struggles and conflicts The excavation of these flows narrates stories about the city's structure and development Yet these flows also carry the potential for an improved more just and more equitable right to the city and its water The flows of power that are captured by urban water circulation also suggest that the question of urban sustainability is not just about achieving sound ecological and environmental conditions but first and foremost about a social struggle for access and control a struggle not just for the right to water but for the right to the city itself

The Globalizing Cities Reader Xuefei Ren, Roger Keil, 2017-10-12 The newly revised Globalizing Cities Reader reflects how the geographies of theory have recently shifted away from the western vantage points from which much of the classic work in this field was developed The expanded volume continues to make available many of the original and foundational works that underpin the research field while expanding coverage to familiarize students with new theoretical and epistemological positions as well as emerging research foci and horizons It contains 38 new chapters including key writings on globalizing cities from leading thinkers such as John Friedmann Michael Peter Smith Saskia Sassen Peter Taylor Manuel Castells Anthony King Jennifer Robinson Ananya Roy and Fulong Wu The new Reader reflects the fact that world and global city studies have evolved in exciting and wide ranging ways and the very notion of a distinct global class of cities has recently been called into question The sections examine the foundations of the field and processes of urban restructuring and global city formation A large number of new entries focus on the emerging urban worlds of Asia Latin America and Africa including Beijing Bogota Cairo Cape Town Delhi Istanbul Medellin Mumbai Phnom Penh Rio de Janeiro Sao Paulo and Shanghai The book also presents cases off the conventional map of global cities research such as smaller cities and less known urban regions that are undergoing processes of globalization The book is a key resource for students and scholars alike who seek an accessible compendium of the intellectual foundations of global urban studies as well as an overview of the emergent patterns of early 21st century urbanization and associated sociopolitical contestation around the world

Disrupted Cities Stephen Graham, 2010-06-10 Bringing together leading

researchers from geography political science sociology public policy and technology studies *Disrupted Cities* exposes the politics of well known disruptions such as devastation of New Orleans in 2005 the global SARS outbreak in 2002 3 and the great power collapse in the North Eastern US in 2003 But the book also excavates the politics of more hidden disruptions the clogging of city sewers with fat the day to day infrastructural collapses which dominate urban life in much of the global south the deliberate devastation of urban infrastructure by state militaries and the ways in which alleged threats of infrastructural disruption have been used to radically reorganize cities as part of the war on terror Accessible topical and state of the art *Disrupted Cities* will be required reading for anyone interested in the intersections of technology security and urban life as we plunge headlong into this quintessentially urban century The book's blend of cutting edge theory with visceral events means that it will be particularly useful for illuminating urban courses within geography sociology planning anthropology political science public policy architecture and technology studies

DiverCity - Global Cities as a Literary Phenomenon Melanie U. Pooch, 2016-02-15 Based on the structured analysis of selected North American novels this work examines global cities as a literary phenomenon *DiverCity* By analyzing Dionne Brand's *Toronto What We All Long For* 2005 Chang rae Lee's *New York Native Speaker* 1995 and Karen Tei Yamashita's *Los Angeles Tropic of Orange* 1997 Melanie U Pooch provides the connecting link for exploring the triad of globalization and its effects global cities as cultural nodal points and cultural diversity in a globalizing age as a literary phenomenon Thus she contributes to a global interdisciplinary and multi perspectival understanding of literature culture and society

The Fabric of Space Matthew Gandy, 2014-11-07 A study of water at the intersection of landscape and infrastructure in Paris Berlin Lagos Mumbai Los Angeles and London Water lies at the intersection of landscape and infrastructure crossing between visible and invisible domains of urban space in the tanks and buckets of the global South and the vast subterranean technological networks of the global North In this book Matthew Gandy considers the cultural and material significance of water through the experiences of six cities Paris Berlin Lagos Mumbai Los Angeles and London Tracing the evolving relationships among modernity nature and the urban imagination from different vantage points and through different periods Gandy uses water as a lens through which to observe both the ambiguities and the limits of nature as conventionally understood Gandy begins with the Parisian sewers of the nineteenth century captured in the photographs of Nadar and the reconstruction of subterranean Paris He moves on to Weimar era Berlin and its protection of public access to lakes for swimming the culmination of efforts to reconnect the city with nature He considers the threat of malaria in Lagos where changing geopolitical circumstances led to large scale swamp drainage in the 1940s He shows how the dysfunctional water infrastructure of Mumbai offers a vivid expression of persistent social inequality in a postcolonial city He explores the incongruous concrete landscapes of the Los Angeles River Finally Gandy uses the fictional scenario of a partially submerged London as the starting point for an investigation of the actual hydrological threats facing that city

Global Metropolitan John Rennie-Short, 2013-01-11 The force of globalization is making cities

change all around the world Short's study explores how the discourse of globalization has become a major narrative in the restructuring of cities in many parts of the world Global City Challenges M. Acuto, W. Steele, 2013-10-31 The contributors illustrate what twin analytical and practical challenges emerge from juxtaposing cultural economic historical postcolonial virtual architectural literary security and political stances to the concept of the global city *Technonatures* Damian F. White, Chris Wilbert, 2010-04-05 Environmentalism and social sciences appear to be in a period of disorientation and perhaps transition In this innovative collection leading international thinkers explore the notion that one explanation for the current malaise of the politics of ecology is that we increasingly find ourselves negotiating technonatural space times International contributors map the political ecologies of our technonatural present and indicate possible paths for technonatural futures The term technonatures is in debt to a long line of environmental cultural theory from Raymond Williams onwards problematizing the idea that a politics of the environment can be usefully grounded in terms of the rhetoric of defending the pure the authentic or an idealized past solely in terms of the ecological or the natural In using the term technonatures as an organizing myth and metaphor for thinking about the politics of nature in contemporary times this collection seeks to explore one increasingly pronounced dimension of the social natures discussion Technonatures highlights a growing range of voices considering the claim that we are not only inhabiting diverse social natures but that within such natures our knowledge of our worlds is ever more technologically mediated produced enacted and contested *Suburban Planet* Roger Keil, 2017-12-01 The urban century manifests itself at the peripheries While the massive wave of present urbanization is often referred to as an urban revolution most of this startling urban growth worldwide is happening at the margins of cities This book is about the process that creates the global urban periphery suburbanization and the ways of life suburbanisms we encounter there Richly detailed with examples from around the world the book argues that suburbanization is a global process and part of the extended urbanization of the planet This includes the gated communities of elites the squatter settlements of the poor and many built forms and ways of life in between The reality of life in the urban century is suburban most of the earth's future 10 billion inhabitants will not live in conventional cities but in suburban constellations of one kind or another Inspired by Henri Lefebvre's demand not to give up urban theory when the city in its classical form disappears this book is a challenge to urban thought more generally as it invites the reader to reconsider the city from the outside in

Urban Theory and the Urban Experience Simon Parker, 2003-11-06 For the first time Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies and the often unacknowledged debt that empirical and theoretical perspectives on the city owe to one another Both students and urban scholars will appreciate the critical way in which classical and contemporary debates on the nature of the city are presented Extensive use is made throughout of documentary literary and cultural sources to bring the different theoretical perspectives to life Discussion points introduce and explain key concepts and intellectual histories in a

jargon free manner End of chapter further readings have also been annotated to encourage additional study

Handbook of Neoliberalism Simon Springer, Kean Birch, Julie MacLeavy, 2016-07-07 Neoliberalism is easily one of the most powerful discourses to emerge within the social sciences in the last two decades and the number of scholars who write about this dynamic and unfolding process of socio spatial transformation is astonishing Even more surprising though is that there has until now not been an attempt to provide a wide ranging volume that engages with the multiple registers in which neoliberalism has evolved The Routledge Handbook of Neoliberalism seeks to offer a comprehensive overview of the phenomenon of neoliberalism by examining the range of ways that it has been theorized promoted critiqued and put into practice in a variety of geographical locations and institutional frameworks With contributions from over 50 leading authors working at institutions around the world the volumes seven sections will offer a systematic overview of neoliberalism s origins political implications social tensions spaces natures and environments and aftermaths in addressing ongoing and emerging debates The volume aims to provide the first comprehensive overview of the field and to advance the established and emergent debates in a field that has grown exponentially over the past two decades coinciding with the meteoric rise of neoliberalism as a hegemonic ideology state form policy and program and governmentality It includes a substantive introductory chapter and will serve as an invaluable resource for undergraduates graduate students and professional scholars alike

Public Los Angeles Don Parson, 2019-11-15 Public Los Angeles is a collection of unpublished essays by scholar Don Parson focusing on little known characters and histories located in the first half of twentieth century Los Angeles An infamously private city in the eyes of outside observers structured around single family homes and an aggressively competitive regional economy Los Angeles has often been celebrated or caricatured as the epitome of an American society bent on individualism entrepreneurialism and market ingenuity But Don Parson presents a different vision for the vast Southern California metropolis one that is deftly illustrated by stories of sustained struggles for social and economic justice led by activists social workers architects housing officials and a courageous judge Public Los Angeles presents insights into LA s historic collectivism networks of solidarity and government policy A follow up to Parson s seminal Making a Better World Public Housing the Red Scare and the Direction of Modern Los Angeles 2005 this volume helps shape our understanding of public housing gender and housework judicial activism and race and class in modern day Los Angeles and asks us if history is repeating Parson s work anchors a collection of nine essays by friends and mentors who deepen the discussion of his themes Dana Cuff Mike Davis Steven Flusty Greg Goldin Jacqueline Leavitt Laura Pulido Sue Ruddick Tom Sitton Edward W Soja and Jennifer Wolch The book is richly illustrated Biographical and curatorial essays by the book s editors Roger Keil and Judy Brannaman provide background material and a coherent storyline for a mosaic of fresh Los Angeles research
