 Veronica Vecchi,Ben Farr-Wharton,Rodney Farr-Wharton,Manuela Brusoni,2015-04-10 When globalization affects jobs and
 economies policy makers strive to plan design and implement actions to support their communities and businesses Ansell and
 Gash 2007 Furthermore local development policies are at the core of international cooperation programs or more in general
 represent a challenge for emerging countries They could refer to infrastructure entrepreneurship innovation or urban
 renewal However more frequently than not development policies which involve different institutional levels and public and
 private players fail due to poor implementation management This research book presents a managerial approach the so
 called Managerial Flow that could help the closure of gaps that hamper an efficient and effective policy execution The
 managerial flow model observes the phenomenon of policy implementation for economic development through managerial
 lens In the book the research team has empirically identified five gaps in practice whereupon public policy implementation
 falls down As a response Managerial Flow model outlines sets of managerial actions that can be adopted to facilitate a clear

flow from policy development through to implementation This book expands on the Managerial Flow model and acts as both a practical guide to stimulate evidence based policy implementation in governments and as theoretical contribution to policy and strategy execution Written for researchers and academics this book begins by outlining the theoretical foundations of Managerial Flow and moves to unpack application and cases based in different sectors and countries in order to discuss and show how the Managerial Flow approach can concretely support managers in the implementation of economic development policies It reviews and discusses how the managerial flow could be relevant in the implementation of a set of sectorial policies and uses the managerial flow concept to analyse cases of economic development and establish lessons for broader management scope

Urban Knowledge and Innovation Spaces Tan Yigitcanlar, Melih Bulu, 2018-10-19 The expansion of knowledge economy globalization and economic competitiveness has imparted importance of knowledge and innovation in local economies worldwide As a result integrating knowledge generation and innovation considerations in urban planning and development processes has become an important agenda for establishing sustainable growth and long term competitiveness of contemporary cities Today making space and place that concentrate on knowledge generation and innovation is a priority for many cities across the globe Urban knowledge and innovation spaces are integrated centres of knowledge generation learning commercialization and lifestyle In other words they are high growth knowledge industry and worker clusters and distinguish the functional activity in an area where agglomeration of knowledge and technological activities has positive externalities for the rest of the city as well as firms located there Urban knowledge and innovation spaces are generally established with two primary objectives in mind to be a seedbed for knowledge and technology and to play an incubator role nurturing the development and growth of new small high technology firms and to act as a catalyst for regional economic development that promotes economic growth and contributes to the development of the city as a knowledge or innovative city This book contains chapters reporting investigation findings on different aspects of urban knowledge and innovation spaces such as urban planning and design innovation systems urban knowledge management and regional science It was originally published as a special issue of the Journal of Urban Technology

Entrepreneurial Knowledge, Technology and the Transformation of Regions Charlie Karlsson, Börje Johansson, Roger Stough, 2013-06-26 In recent years policy makers have given much credence to the role of entrepreneurship in the transformation of regions As a result a new set of policy responses have emerged that focus on the support of new venture creation small business growth and idea generation and commercialization While there is a wealth of research about entrepreneurship in general less attention has been given to the development of new tools and programs in support of entrepreneurial activities and to the ways in which the emergence the character and the types of entrepreneurship policies might differ between countries In particular the transatlantic perspective is of special interest because of the pioneering role of the United States in this area and also due to the European Union s focus on economic competitiveness The contributions included in this book explore the

emergence of entrepreneurship policies from a transatlantic comparative perspective and address different aspects of entrepreneurship policies including local entrepreneurship policies and the relationship between knowledge based industries and entrepreneurship policies *Creating Communities of Practice* Oswald Jones, PingPing Meckel, David Taylor, 2021-02-01

This book introduces concepts of business incubation and suggests a learning process. This process begins with prior knowledge at the opportunity identification phase, progresses through the acquisition of new skills and knowledge necessary to develop an opportunity, and concludes with a transformation phase where new knowledge is acted upon. The book draws on extensive qualitative data and documentary evidence from a range of stakeholders associated with a University Business Incubator known as Innospace. The process of opportunity development within the business incubator is explored by combining experiential and social learning theories as heuristic tools. Presented implications for policy makers and incubator managers are that attention and scarce resources should be focused on providing relevant information and encouraging an atmosphere of learning and mutual support. Recruitment practices should be revised to include a more holistic appreciation of potential incubatees' contribution to the Business Incubation learning community as well as an assessment of their business plans. For policy makers, the book suggests that successful business incubators do not necessarily require a large financial investment in state-of-the-art premises and technology. Appropriate management training together with carefully selected incubatees can create an effective learning community where opportunities are developed and transformed into enterprises and individuals into entrepreneurs.
