Knowledge Power And International Policy Coordination Studies In International Relations:

Knowledge, Power, and International Policy Coordination Peter M. Haas, 1997 Demonstrates that control over knowledge information is an important determinant of international policy coordination the difficulty of achieving it **International Legitimacy and the Politics of Security** Alan Craig, 2013-06-20 Delegitimation has become the new battleground for Israel and the critics of Israeli military operations But the Israeli experience reveals a more general engagement where all states act strategically to build legitimacy for their policies and all resist attempts at delegitimation To understand these processes it is necessary to see how politicized moral and legal judgments shape both the use of force by states and our judgments about the means and the outcomes This is a book about legitimacy military lawyers and security More particularly it is about how the legitimacy of Israel's asymmetric military operations cannot be detached from the politics of law and ethics Sometimes it is enough that states respect the laws of armed conflict but at other times they may be held to a higher standard This does not happen in a vacuum Rather it is the product of political engagement in the murky politics of international legitimacy where standards are negotiable and some states get a harder time than others There is a strong theoretical analysis underpinning a discussion that constantly returns to the practical problems of modern armed conflict where combatants hide among civilians and states complain about the unrealistic expectations of human rights NGOs Here the law is unclear and there are choices to be made The book presents new research into the involvement of Israeli military lawyers in operational targeting decision making that has life and death consequences The case studies concern targeted killing during the Second Intifada Israel's 2006 Lebanon War the 2009 Operation Cast Lead in Gaza and finally the 2010 Israeli maritime interception of the Turkish Flotilla to Gaza The investigation identifies a struggle between the proponents of human rights in war and those who promote the rights of states to deploy military force for the security of their citizens But not all parties to a military conflict are held to the same standards In fact the analysis maps a complex political deployment of law and ethics in the strategic calculation of legitimacy costs and the diplomatic processes whereby they are contested with policy implications for those in charge of the design and execution of military operations The Politics of Justifying Force Charlotte Peevers, 2013-11-07 What are the politics involved in a government justifying its use of military force abroad What is the role of international law in that discourse How and why is international law crucial to this process And what role does the media have in mediating the interaction of international law and politics This book provides a fresh and engaging answer to these questions It introduces different actors to the study of international law in this context in particular highlighting the importance of institutional actors and the role of the media It takes a theoretical approach informed by detailed empirical analysis of key case studies which challenges the traditional distinction between the spheres of the international and the domestic in global affairs and the role of international law in the making of public policy The book specifically critiques the idea of the politics of justification which argues that deploying international legal norms to justify governmental decisions

resulting in the use of force necessarily constrains government actions and leads to fewer instances of military intervention. The politics of justification on this account can be seen as a progressive practice through which international law can become embedded in domestic societies. The book investigates the actors engaged in this justification and the institutional contexts within which legal justification is articulated, interpreted, and contested. It provides a rich, detailed account of domestic British discourse in the crucial case studies of the Suez Crisis of 1956 and the Iraq War of 2003, making extensive use of archival material, newspaper and television reporting, Parliamentary debates, polling data, personal memoirs, and the declassified material provided to several Public Inquiries, including the Chilcot Inquiry. In light of these sources, it considers the concept of international law as a language and form of communication rather than a set of abstract norms. It argues that a detailed understanding of how that language is deployed both in private and in public is essential to gaining a deeper understanding of the role of international law in domestic politics. This book will be illuminating reading for scholars and students of the use of force in international law, historians, and media theorists.

Millennial Reflections on International Studies Michael Brecher, Frank P. Harvey, 2009-12-22. Collection of essays that debate the question of progress in the discipline.

History Education and International Relations Hirano Mutsumi, 2009-02-12. This is the first in-depth study to examine the implications of history education in the context of international relations, interstate and transnational, focusing on Japanese textbooks as the principal case study. The author argues that despite a widespread recognition that our grasp of history has some relevance to our views and attitudes towards foreign countries and peoples, ergo ultimately its impact on national policy, there appears to be little coherent discussion of such a significant topic and its practical applications in the field of International Relations. This study therefore develops a conceptual framework and directs attention to the factors which predetermine the perceptions and attitudes of the public and policy makers, and in doing so searches for the roots of their world view. The book addresses the following issues: Government Influence on the Domestic Educational Environment; The Domestic Environment and its Interaction with the External Environment; History Education in Practice: A case of Japan; The Japanese History Textbook Disputes in the Asian Context; Parts I and II: Twenty-five Years On: The Task of Coming to Terms with the Past.

The Global Politics of Science and Technology - Vol. 1 Maximilian Mayer, Mariana Carpes, Ruth Knoblich, 2014-08-20. An increasing number of scholars have begun to see science and technology as relevant issues in International Relations (IR), acknowledging the impact of material elements, technical instruments, and scientific practices on international security, statehood, and global governance. This two-volume collection brings the debate about science and technology to the center of International Relations. It shows how integrating science and technology translates into novel analytical frameworks, conceptual approaches, and empirical puzzles, and thereby offers a state-of-the-art review of various methodological and theoretical ways in which sciences and technologies matter for the study of international affairs and world politics. The authors not only offer a set of practical examples of research frameworks for experts and students alike but also propose a

conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology This first volume summarizes various time tested approaches for studying the global politics of science and technology from an IR perspective It also provides empirical theoretical and conceptual interventions from geography history innovation studies and science and technology studies that indicate ways to enhance and rearticulate IR approaches In addition several interviews advance possibilities of multi disciplinary collaboration

International Relations Theory

Mark V. Kauppi,Paul R. Viotti,2019-08-27 Theory meets intellectual history in this new and expanded edition of International Relations Theory Long known for its concise presentation of the various images and interpretive understandings of how to approach the complexity of international politics this edition devotes a significant portion of the book to the intellectual precursors who have informed current perspectives on international relations The discussion moves well beyond the usual cannon of Thucydides Machiavelli and Hobbes by linking them and other writers to present day IR theory realism liberalism economic structuralism and English School images as well as constructivist feminist postmodern and critical theory lenses This unique approach enhances our abilities to think conceptually and critically not only about how our 21st century world of diverse state and non state actors works but also the implications of the changes we observe domestically and globally

Susanna Campbell,David Chandler,Meera Sabaratnam,2011-11-10 Moving beyond the binary argument between those who buy into the aims of creating liberal democratic states grounded in free markets and rule of law and those who critique and oppose them this timely and much needed critical volume takes a fresh look at the liberal peace debate In doing so it examines the validity of this critique in contemporary peacebuilding and statebuilding practice through a multitude of case studies from Afghanistan to Somalia Sri Lanka to Kosovo Going further it investigates the underlying theoretical assumptions of liberal peacebuilding and statebuilding as well as providing new theoretical propositions for understanding current interventions Written by some of the most prominent scholars in the field alongside several new scholars making cutting edge contributions this is an essential contribution to a rapidly growing interdisciplinary area of study

Theorizing Southeast Asian Relations Amitav Acharya,Richard Stubbs,2013-10-31 The recent proliferation of theories of international relations has transformed analyses of Southeast Asia s international affairs A new generation of scholars has promoted a lively and illuminating debate which has seen the traditional realist neorealist approach which continues to hold centre stage challenged by constructivist analyses In turn constructivists have found themselves under fire from an array of competing approaches This collection engages this emerging debate It underscores the point that Southeast Asia is now an important site for applying new theories of international relations It also demonstrates that theoretical frameworks originally developed in North America and Europe have to be adapted to the specific circumstances found in places like Southeast Asia and that this process can enrich theory building The chapters in this book focus on the realist neorealist constructivist English School and critical approaches The resulting debate helps to shed light on ways of analysing

Giovanni Faleg,2016-11-01 This book accounts for transformations in the EU s Common Security and Defence Policy CSDP during fifteen years of operations 2001 2016 and argues that the EU evolved into a softer and more civilian security provider rather than a military one This learning process was driven by transnational communities of experts and practitioners which acted as engines of change Giovanni Faleg analyses two innovative concepts introduced in the EU security discourse since the late 1990s security sector reform SSR and civilian crisis management CCM Both stem from a new understanding of security involving the development of non military approaches and a comprehensive approach to crisis management However the implementation of the two policy frameworks by the EU led to very different outcomes The book explains this variation by exploring the pathways by which ideas turn into policies and by comparing the transformational power of epistemic communities and communities of practice p **Palgrave Handbook of Inter-Organizational Relations in World**
