Links Between Beliefs and Cognitive Flexibility Jan Elen, Elmar Stahl, Rainer Bromme, Geraldine Clarebout, 2011-08-20

With the world and its structures becoming ever more complex and the nature of future employment becoming ever more unpredictable the notion of cognitive flexibility has a high profile in educational and psychological debate The contributions in this volume analyze the nature of cognitive flexibility as well as the impact of different types of beliefs on cognitive flexibility Making adequate decisions requires considering input from a variety of continuously evolving sources rather than adhering to predetermined procedures Adopting a position in a debate necessitates the critical evaluation of different alternatives while solving a problem entails selecting appropriate problem solving strategies Meanwhile studying requires students to integrate a range

of interventions and treating a patient involves making a differential diagnosis The common factor cognitive flexibility lies at the core of effective functioning in complex domain specific environments Cognitive flexibility can be described as the disposition to consider diverse information elements while deciding on how to solve a problem or to execute a learning related task in a variety of domains The concept of disposition implies that individuals will not always demonstrate cognitive flexibility even if they are in principle able to act in a cognitively flexible way The notion does not require that alternatives are always deliberately considered which is why this volume s tandem discussion of beliefs is key element of the discussion Beliefs play a central role in cognitive flexibility and relate to what individuals consider to be important valid and or true Of specific interest is the relationship between epistemological beliefs and cognitive flexibility especially as a particular subset of epistemological beliefs seems to be a prerequisite to a cognitively flexible disposition Teachers' Personal Epistemologies Gregory Schraw,Jo Lunn Brownlee,Lori Olafson,Michelle Vander Veldt Brye,2017-07-01 The focus of this book is to explore teachers evolving personal epistemologies or the beliefs we hold about the origin and development of knowledge in the context of teaching The chapters focus on a range of conceptual frameworks about how university and field based experiences influence the connections between teachers personal epistemologies and teaching practice In an earlier volume we investigated preservice and inservice teachers beliefs and teaching practices Brownlee Schraw and Berthelsen 2011 While we addressed the nature of teachers personal epistemologies learning and teaching practices and approaches for changing beliefs throughout teacher education programs the volume did not address conceptual frameworks for the development of teacher s personal epistemologies To address this gap the book is focused on teacher educators teachers and teacher education programmers in universities with an overall aim of highlighting how we might support preservice teachers involvement in learning that is challenging and inservice teachers engagement in professional experiences that promote changes in teaching practice We argue that teachers need to be encouraged to question their beliefs and develop increasingly sophisticated beliefs about their knowledge and their students knowledge that facilitate learning and intellectual growth *Epistemic Fluency and Professional Education* Lina Markauskaite,Peter Goodyear,2016-09-21 This book by combining sociocultural material cognitive and embodied perspectives on human knowing offers a new and powerful conceptualisation of epistemic fluency a capacity that underpins knowledgeable professional action and innovation Using results from empirical studies of professional education programs the book sheds light on practical ways in which the development of epistemic fluency can be recognised and supported in higher education and in the transition to work The book provides a broader and deeper conception of epistemic fluency than previously available in the literature Epistemic fluency involves a set of capabilities that allow people to recognize and participate in different ways of knowing Such people are adept at combining different kinds of specialised and context dependent knowledge and at reconfiguring their work environment to see problems and solutions anew In practical terms the book addresses the following kinds of questions What

does it take to be a productive member of a multidisciplinary team working on a complex problem What enables a person to integrate different types and fields of knowledge indeed different ways of knowing in order to make some well founded decisions and take actions in the world What personal knowledge resources are entailed in analysing a problem and describing an innovative solution such that the innovation can be shared in an organization or professional community How do people get better at these things and how can teachers in higher education help students develop these valued capacities The answers to these questions are central to a thorough understanding of what it means to become an effective knowledge worker and resourceful professional *Encyclopedia of Christian Education* George Thomas Kurian, Mark A.

Handbook of Individual Differences in Reading Peter Afflerbach,2015-08-11 The central unifying theme of this state of the art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading Previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationship s of individual differences to reading development and to account for interactions among individual differences Addressing developments in each of these areas this volume also describes affective individual differences and the environments in which individual differences in reading may emerge operate interact and change The scant comprehensive accounting of individual differences in reading is reflected in the nature of reading instruction programs today the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed An important contribution of this volume is to provide prima facie evidence of the benefits of broad conceptualization of the ways in which readers differ The Handbook of Individual Differences in Reading moves the field forward by encompassing cognitive non cognitive contextual and methodological concerns Its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area

Teaching for Active Citizenship Joanne Lunn Brownlee,Eva Johansson,Susan Walker,Laura Scholes,2016-06-17 There is strong social and political interest in active citizenship and values in education internationally Active citizenship requires children to experience and internalize moral values for human rights developing their own opinions and moral responsibility While investment in young children is recognised as an important factor in the development of citizenship for a cohesive society less is known about how early years teachers can encourage this in the classroom This book will present new directions on how teachers can promote children s learning of moral values for citizenship in classrooms The research provided offers important insights into teaching for active citizenship by providing an analysis of educational contexts for moral values for active citizenship highlighting teachers beliefs about knowing and knowledge personal epistemologies and how these relate to children s learning and understanding about social and moral values discussing the impact of teachers beliefs on teaching practices Evidence suggests that investment in the early years is vital for all learning and specifically for developing an understanding of active citizenship for tolerant and cohesive societies This book will be essential reading for the professional education of early years teachers interested in teaching for active citizenship

Cultural Diversity Pedagogy and Meta-Case Design Neal Dreamson,2021-01-18 Responding to the growing need for educators to have a deeper understanding of cultural diversity this book provides a theoretically rich and empirically sound analysis of diversity

education to develop a new cultural diversity pedagogy The author deconstructs and navigates the complex field of diversity education arguing for a more socially engaged approach in which educators and researchers develop their perspectives on cultural diversity by examining their own assumptions values and beliefs This is explored through a series of 10 case studies based in primary school settings demonstrating that teaching and learning environments are crucial to the success of cultural diversity

Beyond Reason and Tolerance Robert Joseph Thompson, 2014-03 Beyond Reason and Tolerance argues that to prepare students to engage political ethnic and religious differences higher education must adopt a developmental model for a formative and liberal undergraduate education

Development and Assessment of Self-Authorship Marcia B. Baxter Magolda, Peggy S. Meszaros, Elizabeth G. Creamer, 2023-07-03 This book brings together new scholarship that expands and refines the concept of self authorship across cultures It adopts a constructive developmental approach to self evolution that emphasizes the interaction of personal characteristics and contextual influences on individuals construction of knowledge identities and relationships Individual chapters cover subjects from populations as varied as Dutch students male and female Bedouin and Jewish adolescents African American male and female adolescents in economically depressed areas of the US Latino college students grappling with ethnic identity and dissonance Australian college females preparing to be childcare workers and finally a comparative study of Japanese and U S college students epistemic beliefs The book concludes by addressing questions about the challenges and opportunities involved in developing a valid measure of self authorship that is less time and expertise intensive than the in depth one on one interview employed until now and offering an outline of future theoretical and methodological research needed to further our understanding of self evolution in general and self authorship in particular
