Linking Restoration And Ecological Succession Springer Series On Environmental Management:

Linking Restoration and Ecological Succession Lawrence R. Walker, Joe Walker, Richard J. Hobbs, 2007-10-16 While studies of restoration and ecological succession have been published independently there is much overlap between these approaches that has not been adequately explored Linking Restoration and Ecological Succession integrates practical information from restoration projects around the world with the latest developments in successional theory This innovative book recognizes the critical roles of disturbance ecology landscape ecology ecological assembly invasion biology ecosystem health and historical ecology in habitat restoration and argues that restoration within a successional context will best utilize the lessons from each of these disciplines To successfully restore an ecosystem that needs minimal care the temporal dynamics of successional processes must be considered By re examining restoration in the light of succession the authors hope to encourage the development of new approaches to the practice of restoration supported by solid ecological principles

Transitioning to Sustainable Life on Land Volker Beckmann ,2021-11-18 Sustainable Life on Land the fifteenth UN Sustainable Development Goal SDG 15 calls for the protection restoration and promotion of the sustainable use of terrestrial ecosystems Among others it requires societies to sustainably manage forests halt and reverse land degradation combat desertification and halt biodiversity loss Despite the fact that protection of terrestrial ecosystems is on the rise worldwide and forest loss has slowed the recent IPBES report concluded that nature is declining globally at rates unprecedented in human history Consequently the United Nations General Assembly recently declared 2021 2030 the UN Decade on Ecosystem Restoration There is no doubt that the current global responses are far from sufficient and significant transformative changes of societies are needed to restore and protect nature and ecosystems *Transitioning to Sustainable Life on Land* presents reviews original research and practical experiences from different disciplines with a focus on theoretical and empirical reflection about the necessary transformation of values institutions markets firms and policies reviews and research on protection restoration and sustainable use of diverse terrestrial ecosystems analyses and reporting of encouraging local regional national and global initiatives *Transitioning to Sustainable Life on Land* is part of MDPI s new Open Access book series *Transitioning to Sustainability* With this series MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world *Transitioning to Sustainability* aims to add to the conversation about regional and global sustainable development according to the 17 SDGs The book series is intended to reach beyond disciplinary even academic boundaries

Ecology, Planning, and Management of Urban Forests Margaret M. Carreiro,Yong-Chang Song,Jianguo Wu,2007-10-31 It has been increasingly recognized that trees and vegetation in urban areas provide a number of ecological services beyond beautifying cities The purpose of urban forestry is to use trees and natural habitat patches to ameliorate negative environmental impacts of cities and to contribute to the creation of more livable ecological sustainable co cities *Ecology Planning and Management of Urban Forests* takes an international approach to sharing knowledge about the management of urban forests that has been learned through studies in many different regions This allows the reader to evaluate methods and management that are appropriate for particular geographic

environmental and socio political contexts Urban forests are also approached on regional and landscape scales to encompass more natural environments in and around cities rather than within arbitrary municipal boundaries *Wildlife Study Design* Michael L. Morrison, William M. Block, M. Dale Strickland, Bret A. Collier, Markus J. Peterson, 2008-05-25 We developed the first edition of this book because we perceived a need for a compilation on study design with application to studies of the ecology conservation and management of wildlife We felt that the need for coverage of study design in one source was strong and although a few books and monographs existed on some of the topics that we covered no single work attempted to synthesize the many facets of wildlife study design We decided to develop this second edition because our original goal synthesis of study design remains strong and because we each gathered a substantial body of new material with which we could update and expand each chapter Several of us also used the first edition as the basis for workshops and graduate teaching which provided us with many valuable suggestions from readers on how to improve the text In particular Morrison received a detailed review from the graduate students in his Wildlife Study Design course at Texas A M University We also paid heed to the reviews of the first edition that appeared in the literature

Restoration of Ecosystems - Bridging Nature and Humans Stefan Zerbe, 2023-02-13 In this interdisciplinary textbook which bridges the gap between the natural and social sciences both the scientific principles of restoration ecology and practical aspects of ecosystem restoration are comprehensively presented The diversity of land use types with a focus on Central Europe is highlighted and case studies of practical restoration projects are presented The textbook offers students who deal with the environment as well as scientists and practitioners a profound and up to date but also critical overview of the state of knowledge This book opens up the broad spectrum of degraded ecosystems of Central European natural and cultural landscapes In further chapters marine ecosystems and their restoration as well as development potentials and the limits of restoration are discussed in more detail The ecological fundamentals are expanded through an interdisciplinary perspective taking into account environmental ethics sociology anthropology and economics In addition to an up to date overview of the various areas and fields of activity in restoration ecology and ecosystem restoration the textbook provides a valuable basis for studies science and practice The students also receive assistance in searching for literature and critical fact analysis and the lecturers on teaching formats and interdisciplinary approaches to discussion in restoration ecology *Science of Ecosystem-based Management* Alan Desbonnet, Barry A Costa-Pierce, 2008-01-12 Science for Ecosystem based Management Narragansett Bay in the 21st Century addresses the broad problem of coastal nutrient pollution In the U S approximately two thirds of the coastal rivers and bays are moderately to severely degraded from nutrient pollution However debates continue about how large a problem nutrient pollution is and what actions to take and since effective management requires decisions at a local scale an in depth case study can provide valuable guidance Narragansett Bay is one of the best studied estuaries in the world Rhode Island has been developing regulatory and management actions to reduce nutrient inputs particularly those of nitrogen to the waters of

Narragansett Bay This book was developed in response to a symposium addressing this mandate with coastal estuarine scientists and environmental management agency personnel The contributors use long term data sets to discuss the interactions among biological ecological chemical and physical processes and discuss what is known about nutrient inputs to the bay ecosystem the impacts related to nutrient inputs and how the ecosystem might respond to a sudden reduction in these inputs

Integrating Landscapes: Agroforestry for Biodiversity Conservation and Food Sovereignty Florencia Montagnini, 2024-06-25 This updated and expanded second edition summarizes advances in agroforestry research and practice and proposes alternatives to increase the effectiveness of agroforestry systems It offers an important contribution to help solve the most pressing development and environmental challenges in this sector today The contributing authors present views from the academic the practitioner and the development areas Chapters offer alternatives and suggestions for facing challenges in agroforestry adoption profitability and in the implementation of integrated landscape management approaches With new chapters and substantial revisions made in many others the scope was broadened both geographically and thematically Students Scientists and practitioners will therefore gain more insights from Africa and Asia as well as the Americas
