
Case Studies for Harvard Business School

What Is a Case?

A case is a description of a management situation. Most cases range in length from two to twenty-five pages of text and exhibits; the latter often present quantitative material. So-called field cases are largely based on data provided by the organization that is the focus of the case. Library cases are drawn from published material in the public domain. A case is not written to illustrate correct or incorrect handling of an administrative situation, nor is there an editorial bias that implies a particular conclusion.

A chronological series of cases based on a single organization is sometimes used to expose the student to an organization's cumulative experience with a situation.

How Are Cases Used?

Cases are used for class discussion in a variety of educational programs. At the Harvard Business School, these include short programs for executives as well as the two-year program leading to the degree of Master of Business Administration (MBA). The cases offer students experience in dealing with complex, realistic situations. The emphasis is on decision making. In most courses, the cases are arranged so that a conceptual structure is built up during the course. Cases are often

supplemented with readings and short lectures.

In the MBA program, the student most often has three cases to prepare every day, each for a different course. A case usually is discussed for one class session.

Many cases developed by Harvard Business School are available to other educational institutions through the HBS Publishing Division.

How Are Cases Developed?

Each faculty member responsible for a course typically has a group of issues or situations for which cases are needed. Cases are often developed in response to these explicit needs. At other times, organizations suggest particularly interesting situations to faculty members.

Who Writes the Cases?

Faculty, research assistants, and—occasionally—students may be involved in casewriting. Research assistants and students work under the close supervision of members of the faculty.

In general, extensive writing, editing, or revising by the host organization does not aid case development. These responsibilities are most satisfactorily performed by people outside of the firm.

Who Pays the Expenses?

Harvard Business School commonly pays the direct expenses of case development. There are exceptions, however, and certain casewriting ventures are underwritten by an association or an individual firm.

What Is Expected of the Host Organization?

A case cannot be used until it is formally approved by the host organization. An initial discussion between the faculty supervisor and the host organization establishes the preliminary scope of the case. This understanding may be confirmed in a written summary or outline. An agreement to continue with the project signifies the organization's willingness to provide information relevant to the situation and important to the decision makers involved in the situation. Such information is crucial to the development of an effective teaching vehicle.

The initial agreement also affirms the organization's general willingness to approve Harvard's use of a case of the nature and scope discussed. If there is real doubt about the likelihood of approval, it is usually better to call a halt to the venture rather than to risk the development of an unapproved case and the consequent loss of substantial time and money.

Web 2.0: A Strategy Guide Amy Shuen, 2008-04-23 Web 2.0 makes headlines but how does it make money? This concise guide explains what's different about Web 2.0 and how those differences can improve your company's bottom line. Whether you're an executive plotting the next move, a small business owner looking to expand, or an entrepreneur planning a startup, Web 2.0: A Strategy Guide illustrates through real-life examples how businesses large and small are creating new opportunities on today's Web. This book is about strategy. Rather than focus on the technology, the examples concentrate on its effect. You will learn that creating a Web 2.0 business or integrating Web 2.0 strategies with your existing business means creating places online where people like to come together to share what they think, see, and do. When people come together over the Web, the result can be much more than the sum of the parts. The customers themselves help build the site as old-fashioned word of mouth becomes hypergrowth. Web 2.0: A Strategy Guide demonstrates the power of this new paradigm by examining how Flickr, a classic user-driven business, created value for itself by helping users create their own value. Google made money with a model based on free search and changed the rules for doing business on the Web, opening opportunities you can take advantage of. Social network effects can support a business, ever wonder how Facebook grew so quickly? Businesses like Amazon tap into the Web as a source of indirect revenue using creative new approaches to monetize the investments they've made in the Web. Written by Amy Shuen, an authority on Silicon Valley business models and innovation economics, Web 2.0: A Strategy Guide explains how to transform your business by looking at specific practices for integrating Web 2.0 with what you do. If you're executing business strategy and want to know how the Web is changing business, this book is for you.
