Achievement Teams Steve Ventura, Michelle Ventura, 2022-05-27 What if you had a collaborative process of looking at student data that could pinpoint student gaps in learning and suggest effective strategies to close those gaps? What if you knew not only what you should start doing to enhance student learning but also what you should stop doing because it hasn't given you the hoped-for results? Enter Achievement Teams. This is not another program that's here today and gone tomorrow; it's a timeless approach that any school or district can replicate that focuses on the most significant variable in student achievement: teaching. In Achievement Teams, Steve Ventura and Michelle Ventura offer a framework based on John Hattie's Visible Learning research that makes teacher collaboration more efficient, rigorous, satisfying and effective. Think of it as a systematic treasure hunt for best practices using real data on your students. The authors walk you through the Achievement Teams four-step meeting protocol. In Step 1, teams focus on the evidence from a pre-assessment to provide specific feedback to students and teachers about concepts and skills that students did and did not learn. In Step 2, teams use that evidence to establish SMART goals for both teachers and students. In Step 3, teams summarize the collected data and make inferences around students' mastery levels. In Step 4, teachers select high-impact strategies directly targeted to student needs. A post-assessment reveals what did and didn't work. The authors provide a plethora of resources along the way, including reflection activities to extend your thinking and a variety of helpful downloadable templates designed to facilitate the work. If you're a teacher or leader who is interested in maximizing student achievement, this book is for you. *Getting Evidence into Education* Stephen Gorard, 2020-03-31 Worldwide there has been considerable progress in the quality of research evidence generated for use in education, but not the equivalent growth in knowledge of how best to get this evidence into actual use. Yet with far-reaching implications, all of education is damaged when persuasive but poor-quality evidence has widespread influence or good research lies unused. Focused on the work of the Durham University Evidence Centre for Education, *Getting Evidence into Education* addresses this problem, examining what can be done to improve the take-up of suitable research evidence and inform the public service of education. Containing a variety of case studies from evidence-based policies for

early childhood education in Brazil to the use of evidence on contextualized admissions to Scottish universities the volume explores a variety of different ways to approach the problem addressing the questions What is the existing evidence on different approaches to getting research evidence into use What are the factors which influence the uptake of high quality research evidence by policy or practice Which are the most effective pathways for evidence into use in particular contexts Considering both the practical and ethical implications the book builds towards key recommendations for the research community practitioner bodies and policy makers and advisors directing them on how to communicate better with each other for the benefit of everyone

Understanding Leadership Libby Nicholas, John West-Burnham, 2016-05-23 Are current leadership roles and relationships appropriate in a rapidly changing world Do we need to rethink key assumptions about leaders and leadership Are you confident about the appropriateness and effectiveness of your chosen leadership styles and behaviours These are questions facing leaders today and Understanding Leadership by Libby Nicholas and John West Burnham can help find the answers with an approach that is neither normative nor prescriptive but rather exploratory and developmental Applying research and case studies from inside and outside the educational canon Libby and John challenge prevailing orthodoxies and invite readers to reflect on their personal understanding as the basis for translating theory into practice All leadership behaviour is based on a number of fundamental personal assumptions about the nature of human relationships and the basis on which human organisations function Understanding Leadership helps leaders make their implicit understanding explicit and so informs and aids development of professional practice Effective leaders develop and grow by understanding their personal mindscape the mental map with which they make sense of the world and developing it through reflecting exploring testing and questioning The usefulness of any map is determined partly by its scale and partly by the information it depicts As leaders develop so their personal mental maps become more sophisticated and more detailed The purpose of this book is to help leaders understand and refine their maps through reflective self awareness facilitating the journey to understanding leadership Leadership is fundamentally concerned with the complexity of human relationships performance engagement and motivation leadership has to be seen as relational Leadership involves emotional engagement and sophisticated interpersonal relationships The idea of a hero leader single handedly transforming a school is perhaps not a particularly useful or relevant vision of effective leadership for today Libby and John encourage leaders to arrive at their own working definition of effective leadership and analyse how the myriad of carefully examined models and case studies might apply in their own school context The eight chapters are underpinned by the following themes questions and points of reflection why leadership creating a preferred future leading change leadership as a moral activity learning as the core purpose of school leadership leading through collaboration and cooperation building capacity sharing leadership leading through relationships and leadership and personal resilience High performance effective leadership can be truly transformational Leadership cannot be taught it has to be learnt It could be argued that school leadership is primarily concerned with learning the leader s own and facilitating that of the children Questioning interrogating and analysing ideas and practice are fundamental to that learning process Libby Nicholas and John West Burnham prompt leaders to do just that Suitable for school leaders at all levels head teachers principals assistant and deputy heads middle leaders aspiring to senior roles and in all educational settings The book will also be of interest to education system leaders chief education officers and directors of education and indeed
