Improvisation and Music Education Ajay Heble, Mark Laver, 2016-02-19 This book

offers compelling new perspectives on the revolutionary potential of improvisation pedagogy. Bringing together contributions from leading musicians, scholars and teachers from around the world, the volume articulates how improvisation can breathe new life into old curricula, how it can help teachers and students to communicate more effectively, how it can break down damaging ideological boundaries between classrooms and communities, and how it can help students become more thoughtful, engaged and activist global citizens. In the last two decades, a growing number of music educators, music education researchers, musicologists, cultural theorists, creative practitioners and ethnomusicologists have suggested that a greater emphasis on improvisation in music performance, history and theory classes offers enormous potential for pedagogical enrichment. This book will help educators realize that potential by exploring improvisation along a variety of trajectories. Essays offer readers both theoretical explorations of improvisation and music education from a wide array of vantage points and practical explanations of how the theory can be implemented in real situations in communities and classrooms. It will therefore be of interest to teachers and students in numerous modes of pedagogy and fields of study, as well as students and faculty in the academic fields of music education, jazz studies, ethnomusicology, musicology, cultural studies and popular culture studies.

Creative Contradictions in Education Ronald A. Beghetto, Bharath Sriraman, 2016-09-30. *Creative Contradictions in Education* is a provocative collection of essays by international experts who tackle difficult questions about creativity in education from a cross-disciplinary perspective. The contributors to this volume examine and provide fresh insights into the tensions and contradictions that researchers and educators face when attempting to understand and apply creativity in educational contexts. Creativity in education is surrounded by many contradictions. Teachers generally value creativity but question the role it can and should play in their classroom. Many educators find themselves feeling caught between the push to promote students' creative thinking skills and the pull to meet external curricular mandates, increased performance monitoring and various other curricular constraints. This book brings together leading experts who provide fresh cross-disciplinary insights into how creative contradictions in education might be addressed. Contributors will draw from existing empirical and theoretical work but push beyond what currently is and comment on future possibilities. This includes challenging the orthodoxy of traditional conceptions of creativity in education or making a case for maintaining particular orthodoxies.
