Evolutionary Perspectives on

Human Development Robert G. Burgess, Kevin MacDonald, 2005 This new edition of *Evolutionary Perspectives on Human Development* is obligatory reading for anyone interested in the integration of evolutionary theory into developmental psychology. It provides a valuable corrective to recent narrow approaches which argue that the human mind is constructed exclusively of domain specific mechanisms and which deemphasize the importance of human psychological and behavioral plasticity. Anyone who reads this book will come away with a richer understanding of our shared human nature. Bill Irons, Northwestern University. In this volume Burgess and MacDonald have brought together a distinguished group of psychologists and anthropologists to investigate how given our evolutionary heritage genetic make up and salient environment behavior cognition and emotion unfold from the human organism. They make clear that both evolutionary functional and proximate behavioral perspectives are essential to understanding the human mind and its products. Many of these essays should be required reading for sociobiologists evolutionary psychologists and evolutionary anthropologists and their ilk. Jeffrey Kurland, Penn State. It is clear that evolutionary biology has a tremendous amount to offer when it comes to our understanding of human development and yet many experts in developmental psychology have remained impervious to these insights. At last this may change. Burgess and MacDonald have compiled a rich array of theory and data much of it contributed by the leading lights of evolutionary psychology or if you prefer sociobiology. A very valuable collection and one that might help define a new and important field. David P. Barash, University of Washington. *Evolutionary Perspectives on Human Development* Second Edition considers the role of evolutionary theory in the field of developmental psychology to examine key topics of individual human development. This unique book fills an important gap in the literature applying evolutionary models to human development by focusing on central development issues. The book emphasizes both domain general evolved psychological mechanisms and domain specific processes. The text also integrates behavior genetic research with evolutionary and developmental principles. In this contributed volume editors Robert L. Burgess and Kevin MacDonald have brought together a distinguished group of social and behavioral scientists employing multiple levels of analysis drawn from a variety of academic disciplines. This diverse group of contributors illustrates the enormous power of evolutionary theory by elucidating human behavior and its development and the various ways it is manifested in different environments. *Evolutionary Perspectives on Human Development* applies evolutionary theory to such topics as parent child relationships the maltreatment of children psychopathology cooperation and competition among siblings and the acquisition of vital resources in different cultural settings from an evolutionary point of view. **Key Features** Comprehensive coverage of the impact of evolutionary theory on human development provides students with the most thorough foundation available in this area.

Contributions by leading scholars and researchers expose readers to the exciting research and developments that have been occurring in the field An introductory chapter written by the volume editors provides an accessible overview of the book Evolutionary Perspectives on Human Development provides state of the art groundwork in evolutionary theory as viewed by leading thinkers in the field It is an excellent supplementary textbook for advanced undergraduate and graduate courses in evolutionary and developmental psychology *Human Growth and Development* Noel Cameron, Barry Bogin, 2012-06-08 Offering a study of biological biomedical and biocultural approaches this book is suitable for researchers professors and graduate students across the interdisciplinary area of human development It is presented in the form of lectures to facilitate student programming **Entrepreneurship, the New Economy and Public Policy** Uwe Cantner, Elias Dinopoulos, Robert F. Lanzillotti, 2004-11-23 Silicon Valley is the most salient example of high tech industrial clusters Public policymakersthroughouttheworldwouldliketolearnthesecretsofSiliconValley in order to build their own high tech economies The existing literature on industrial clusters which traces back to Marshall 1920 focuses on the way in which firms benefit from locating in a cluster it suggests that once a cluster comes into existence it tends to reinforce itself by attracting more firms However a more important question is how to reach this critical mass in the first place In contrast to the literature evidence suggests that entrepreneurs rarely move when they establish high tech start ups Cooper and Folta 2000 This contradicts the notion that location choice analyses lead entrepreneurs to a high tech cluster A high tech industrial cluster such as Silicon Valley is characterized by concentrated entrepreneurship Following Schumpeter we emphasize the fact that the appearance of one or a few entrepreneurs facilitates the appearance of others Schumpeter 1934 We propose an agent based computational model to show how high tech industrial clusters could emerge in a landscape in which no firms existed originally The model is essentially a spatial version of the Nelson Winter model Boundedly rational agents are scattered over an explicitly defined landscape Each agent is endowed with some technology which determines his firm's productivity if he has one During each period of time an agent with no firm would make a decision as to whether he wants to start one This decision is mostly affected by the behavior of his social contacts who are all his neighbors Avian Growth and Development J. Matthias Starck, Robert E. Ricklefs, 1998 This is the first reappraisal in 50 years of concepts of development made in birds This book is a case study in evolutionary diversification of life histories Although birds have a rather uniform body plan and physiology they exhibit marked variation in development type parental care and rate of growth Altricial birds are fully dependent on their parents for warmth and nutrition and begin posthatching life in a more or less embryonic condition At the other extreme such superprecocial species as the megapodes are independent of all parental care from hatching and the neonate able to fly resembles an adult bird This book thus attempts to present an integrative perspective of organism biology ecology and evolution A Critical Approach to Human Growth and Development Paula Nicolson, 2014-04-25 What does it mean to be human This critical text from a well respected author captures and interrogates the many models which have

been developed to explore and explain human behaviour Informed by sociological psychological and biological perspectives the book plots the key stages of the life course from childhood through to older age **Philosophical Foundations of Evolutionary Psychology** August John Hoffman, 2015-12-24 Philosophical Foundations of Evolutionary Psychology describes the unique relationship between early schools of thought in Greek philosophy modern psychology and most recently evolutionary psychology This volume provides the reader with a concise history and description of some of the most important theories used in understanding human behaviors i e the mind body duality the essence of human nature and how humans have evolved to cooperate with each other and how the physical characteristics of communities have contributed to positive i e prosocial or destructive i e antisocial behavior It explores human nature from the philosophical perspectives of Socrates Plato Descartes Locke and Rousseau as contributing factors to the development of modern psychology i e Structuralism Functionalism Behaviorism and Biopsychology that ultimately is combined with evolutionary psychology Philosophical Foundations of Evolutionary Psychology also incorporates various topics of psychology that support the development of evolutionary psychology such as language and communication gender differences aggression cooperative behaviors and natural selection **The Tales Teeth Tell** Tanya M. Smith, 2018-10-23 What teeth can tell us about human evolution development and behavior Our teeth have intriguing stories to tell These sophisticated time machines record growth diet and evolutionary history as clearly as tree rings map a redwood s lifespan Each day of childhood is etched into tooth crowns and roots capturing birth nursing history environmental clues and illnesses The study of ancient fossilized teeth sheds light on how our ancestors grew up how we evolved and how prehistoric cultural transitions continue to affect humans today In The Tales Teeth Tell biological anthropologist Tanya Smith offers an engaging and surprising look at what teeth tell us about the evolution of primates including our own uniqueness Humans impressive set of varied teeth provides a multipurpose toolkit honed by the diet choices of our mammalian ancestors Fossil teeth highly resilient because of their substantial mineral content are all that is left of some long extinct species Smith explains how researchers employ painstaking techniques to coax microscopic secrets from these enigmatic remains Counting tiny daily lines provides a way to estimate age that is more powerful than any other forensic technique Dental plaque so carefully removed by dental hygienists today records our ancestors behavior and health in the form of fossilized food particles and bacteria including their DNA Smith also traces the grisly origins of dentistry reveals that the urge to pick one s teeth is not unique to humans and illuminates the age old pursuit of dental art The book is generously illustrated with original photographs many in color

Recent Advances in Growth Research Matthew W. Gillman, Peter D. Gluckman, Ron G. Rosenfeld, 2013 Growth in mammals encompasses several stages from intrauterine growth through infancy and childhood to adolescence Each of these phases is characterized by very specific nutritional molecular and endocrine perspectives which under ideal conditions allow the organism to achieve its genetically programmed growth patterns In this book an international panel of experts addresses

these topics in a historical physiological and social perspective The first part investigates the genetic epigenetic molecular and nutritional determinants of intrauterine and postnatal growth Part two deals with non evolutionary changes which occurred in the recent past such as changes in body size in utero during infancy and childhood and during adolescence and the potentially unfavorable consequences of enhanced nutrition and growth including early onset of puberty development of obesity and increases in metabolic and cardiovascular disease The last part addresses the question of which factors define healthy growth in light of the influence of nutritional molecular and endocrine influences Although the association between rapid changes in body size and adverse health effects is clear the precise nature of causality remains uncertain Presenting the latest scientific findings in growth research this publication provides essential reading for pediatricians clinical investigators and health workers

Social Theory of Modern Societies David Held, John Brookshire Thompson, John B. Thompson, 1989-12-07 This book offers a comprehensive appraisal of the work of Anthony Giddens who is known worldwide as one of the leading figures in social theory and the social sciences During the last decade Giddens has published a series of substantial volumes which have defined a distinctive and original theoretical approach The twin focal points of his approach are the theory of structuration and the analysis of modernity Giddens s writings on these and related themes are widely recognized as among the most important contributions to theoretical debate in the social sciences *Social Theory of Modern Societies* is the first volume to provide a systematic and critical assessment of Giddens s contributions The volume includes eleven critical essays all of which were specially commissioned for this volume by authors who are well known in their own fields Zygmunt Bauman Richard J Bernstein Derek Gregory Nicky Gregson David Held Bob Jessop Linda Murgatroyd Peter Saunders Martin Shaw John B Thompson and Erik Olin Wright In a long concluding chapter Anthony Giddens responds to the criticisms raised by these and other authors clarifying and elaborating his current views The result is a unique and engaging book which gives both a critical evaluation of Giddens s work and a guide to some of the theoretical issues which are at the forefront of the social sciences today It will be of interest to students and academics in sociology politics and geography and to students in the social sciences and humanities generally

Long-term Consequences of Early Environment C. Jeya K. Henry, Stanley J. Ulijaszek, 1996-06-27 In this book a leading team of researchers explore the long term effects of early environment in humans

The Heredity Hoax Richard M. Lerner, Gary Greenberg, 2025-01-30 This innovative and thought provoking book integrates both new authored material and reprints of existing literature that together provide a compelling narrative that reveals the fatally flawed science associated with genetic reductionist accounts of human behavior and development Through an interdisciplinary lens it illuminates the dynamic nature of human development empowering readers to question established notions and embrace the complexity of our potential Across the

book the work of top tier scientists from developmental comparative educational and biological science illuminates theory and research converging on the conclusion that the multiple egregiously flawed work of genetic reductionists should be expunged from research pertinent to human development The book challenges the prevailing reductionist narratives and their application to social policies programs and uses in media Theoretically based and empirically rigorous this multidisciplinary approach to human development will shine a light on the inequities in individuals or groups that suggest that specific genes do not enable them to succeed in life The Heredity Hoax invites graduate programs and advanced undergraduate courses on human development human potential epigenetics and more to delve into the intricate interplay between genes environment and personal growth This will also serve as an unimpeachable source of evidence for researchers educators and social policymakers *Innovation Dynamism and Economic Growth* Masaaki Hirooka, 2006-01-01 I think this book is a great achievement It is packed with useful information and thought provoking analysis and discussion The work on technological development is especially a very valuable original contribution to the work in this field The book illuminates the technological trajectory so often ignored by economists but which underlies Schumpeter s clusters of innovations and the emphasis on trunk innovations and analysis of their role is of particular interest Christopher Freeman SPRU Science and Technology Policy Research University of Sussex UK and Maastricht University The Netherlands This pathbreaking book addresses the economics of technological change as revealed by a unique methodology that uncovers the true nature of technological development Masaaki Hirooka bases this new approach to the economics of technological change on the recognition of the nonlinear dynamic nature of innovation In order to provide a richer understanding of technological development the book focuses on the period of innovation prior to market launch grounding the analysis within a distinct innovation paradigm This is expressed using three logistic trajectories technology development and diffusion which make it possible to interpret and better understand technology foresight infrastructure formation long business cycles and national innovation systems The author emphasizes the importance of the timing of innovation commitment knowledge transfer between and within these trajectories and the evolutionary character of innovation Those with an interest in economics macroeconomics technological change and evolutionary economics will find this book to be a highly stimulating and fascinating read **Social Dynamics in a Systems Perspective** Sergio Barile, Marco Pellicano, Francesco Polese, 2017-10-04 This book targets the critical issue of decision making in uncertain conditions and situations The aim is to increase readers understanding of complexity and of socio economic interactions through the application of systems thinking perspectives Among the various areas and topics addressed are complexity and sustainable management markets as complex adaptive systems the impacts of psychological and emotional factors upon value co creation exchanges and ICT enablers of service network performance and service exchange fulfillment Thanks to the chosen perspectives all of which are based on different systems research streams the book will support more consistent and robust decisions leading to sustainable wise

and viable systems dynamics It will aid managers practitioners and consultants in their decision making processes and will also be of interest for academics and scholars in management systems computer science engineering and marketing

Patterns of Human Growth Barry Bogin,2020-11-19 This completely revised edition provides a synthesis of the forces that shaped the evolution of the human growth pattern the biocultural factors that direct its expression the intrinsic and extrinsic factors that regulate individual development and the biomathematical approaches needed to analyze and interpret human growth After covering the history philosophy and biological principles of human development the book turns to the evolution of the human life cycle Later chapters explore the physiological environmental and cultural reasons for population variation in growth and the genetic and endocrine factors that regulate individual development Using numerous historical and cultural examples social economic political economic forces are also discussed A new chapter introduces controversial concepts of community effects and strategic growth adjustments and the author then integrates all this information into a truly interactive biocultural model of human development This remains the primary text for students of human growth in anthropology psychology public health and education

Development, Growth and Evolution Paul O'Higgins,Martin J. Cohn,2000-04-05 This volume attempts to provide accessible accounts of these advances in developmental biology for the non expert together with contributions from hominid palaeontologists which aim to bring this developmental perspective to bear on interpretation of the skeletal record of human evolution This combined approach is as yet in its infancy but it is likely that it will impact significantly on palaeoanthropology and palaeontology in general

Social Work and Science in the 21st Century Leon H. Ginsberg,Christopher R. Larrison,Larry Nackerud,John R. Barner,Lauren A. Ricciardelli,2019-03-11 Social work students practitioners and educators often lack a solid educational foundation in science leading to an underestimation of its impact on all of our lives Social Work and Science in the 21st Century provides information and ideas that bring the natural and physical sciences and related fields such as climate change chemistry and neuroscience into the domains of social work education and practice
