Youth sports: growth, maturation and talent, 2ª Edição Manuel J. Coelho e Silva, António J. Figueiredo, Marije T Elferink-Gemser, Robert M. Malina, 2016-03-01 A prepara o a longo prazo de jovens atletas para o alto rendimento pode ser incompatível com as de curto prazo centradas na obtenção imediata de resultados desportivos. O conhecimento do essencial dos processos de crescimento e maturação pode confluir na máxima expressão das capacidades individuais e por outro lado evitar o esgotamento precoce dos sistemas biológicos e psicológicos de que depende o rendimento desportivo. Outro imperativo: qualidade do processo de treino com crianças e jovens decorre da gestão das exigências da participação desportiva em termos familiares e escolares na observância de princípios essenciais para o desenvolvimento pessoal e social. O presente livro e os seus autores oferecem uma coleção de capítulos devidamente organizados cobrindo tópicos fundamentais ao treinador e às organizações que enquadram a formação desportiva. Em resumo a investigação presta um valioso contributo ao desenvolvimento do treino desportivo.

**The Athletic Skills Model** René Wormhoudt, Geert J.P. Savelsbergh, Jan Willem Teunissen, Keith Davids, 2017-10-12 The Athletic Skills Model offers an alternative to dominant talent development theories in the form of holistic broad based movement education focusing on health and wellbeing. It places the emphasis on physical intelligence including attributes such as agility, flexibility and stability through adaptable and varied training programmes creating a skilled athlete before introducing sport specialization. The book sets out the scientific underpinnings of the ASM before going on to offer practical guidance on the content of the programme, how to adapt and vary the programme and how to apply the approach to different age groups and sports. The ASM's application in the youth development programme at AFC Ajax is explored in depth before a future of talent development with an emphasis on athletic rather than sport specific expertise is imagined. The Athletic Skills Model introduces an important and timely challenge to conventional wisdom in talent development and is a fascinating read for any upper level student or researcher interested in

youth development skill acquisition motor learning or sports coaching and any coaches wanting to refresh their approach to talent development

therefore helps us develop a better understanding of the social construction of young people's lives. The book covers youth sport in all its forms from competitive game contests and conventional sport to recreational activities, exercise and lifestyle sport and at all levels from elite competition to leisure time activities and school physical education. It explores youth sport across the world in developing and developed countries and touches on some of the most significant themes and issues in contemporary sport studies including physical activity and health, lifelong participation, talent identification and development and safeguarding and abuse. No other book brings together in one place such a breadth and depth of material on youth sport or the engagement of young people in physical activity. The Routledge Handbook of Youth Sport is therefore important reading for all advanced students, researchers, practitioners and policy makers with an interest in youth sport, youth culture, sport studies or physical education.

[Optimizing Player Health, Recovery, and Performance in Basketball, volume II](#) Davide Ferioli, Aaron T. Scanlan, Daniele Conte, 2025-03-19. This Research Topic is the second volume of the article collection [Optimizing Player Health Recovery and Performance in Basketball](#). Please see the first volume [here](#). In line with the first volume, basketball is a popular team sport played all over the world by male and female players participating in various competitions. As the game continues to evolve, there are new challenges and opportunities being faced by teams. Consequently, basketball organizations constantly seek competitive advantages that optimize the health, recovery and performance of players through various practices. The growing body of basketball research provides an essential evidence base for basketball organizations to draw upon when implementing different practices. As such, it is important that sound basketball research with strong practical translation is produced on topics relevant to player health, recovery and performance. In this regard, examination of coaching, training, testing, monitoring, nutrition, recovery, injury prevention, psychological performance analysis and sleep strategies as well as technological innovations that can improve the existing understanding and practices in basketball would prove advantageous for basketball coaches, high performance staff and players alike.

This Research Topic is the second volume of the article collection [Towards a Psychophysiological Approach in Physical Activity Exercise and Sports](#). Please see the first volume [here](#). <https://www.frontiersin.org/research-topics/39747/towards-a-psychophysiological-approach-in-physical-activity-exercise-and-sports> magazine. In recent years, there has been an increase in interest in mental health disorders as a result of mediatic coverage of Olympic athletes' mental health struggles and also due to the COVID-19 pandemic lockdowns. These phenomena helped to further exacerbate a problem already extensively present in sport and society. Therefore, applying a psychophysiological approach to physical activity, exercise and sports research has become very popular. Indeed, mental fatigue and mental disorders are not only psychological in origin but also require an explanation from a psychophysiological perspective due to the effective interconnection between the psychological and

physiological dimensions Psychological variables can also influence performance and the psychophysiological system has a strong effect on the control of physical capacities Moreover pacing behaviour decision making self regulation and effort perception can also explain the role of the brain in physical activity and exercise management Thus the aim of this Research Topic is to share the impact of a psychophysiological approach in physical activity exercise and sports The goal of this Topic is to address the following Factors determining performance including technical tactical physiological cognitive and psychosocial training and competition demand training interventions and testing in sports acute and chronic effects of training in psychophysiological variables coaching in sports strength and conditioning mental health and performance recent developments within sports sciences research This Research Topic endeavors to explore at specific themes related to physiological stress and mental well being Additionally we aim to provide evidence to coaches and sports scientists highlighting the relationship between training and competition demands related to performance We also want to analyze the effects of strength and conditioning training and coaching effects acute and chronic on psychological and physiological Finally it is our intention to provide scientific literature with evidence for a relationship between movement behavior and cognition with physiological performance the psychophysiological approach
