Planners, architects, and designers can have a great impact on living environments and well being. Well being is a natural outcome of natural living, but it is important to realize that a real and comprehensive understanding of well being can only be achieved through the continuity of the concept to all environmental scales, starting from the biosphere and leading towards interiors. Factors discussed throughout the book include the history of the concept of living well, the evolution of well being with age, the requirements that affect well being, the potentials of certain design approaches for well being, the existing environments such as vernacular structures, heritage buildings with specific advantages for well being, changes in well being requirements, interior environments with different functions such as schools and home environments, and the intersections of interior design with other design disciplines.
