Trust, Tourism Development and Planning Robin Nunkoo,Stephen L.J. Smith,2014-08-07 The dynamics of trust and distrust are central to understanding modern society social relations and development processes However numerous studies suggest that societal trust and citizen s trust in government and its institutions are on the decline challenging the legitimacy of government and leading to an undemocratic and unsustainable form of development Recognizing its importance the authors for the first time situate trust within the context of tourism development and planning This volume discusses trust in tourism from different yet intrinsically connected perspectives Chapters review how diminishing societal trust may have adversely affected tourism planning systems the role of trust in good tourism governance and sustainable tourism how trust can be used as a facilitator of participatory tourism planning political trust in tourism institutions power and how tourism development can be a basis for trust creation among society members by using social capital theory In addition a final section on Researching Trust in Tourism Development means that readers are not only provided a thorough theoretical framework

on trust and an understanding of its importance for sustainable tourism and good governance of the sector but also methodological aspects of research on trust in the context of tourism development and planning This significant volume is valuable reading for students academics and researchers interested in tourism development and planning

The Decision to Trust Robert F. Hurley, 2011-10-25 A proven model to create high performing high trust organizations Globally there has been a decline in trust over the past few decades and only a third of Americans believe they can trust the government big business and large institutions In *The Decision to Trust* Robert Hurley explains how this new culture of cynicism and distrust creates many problems and why it is almost impossible to manage an organization well if its people do not trust one another High performing world class companies are almost always high trust environments Without this elusive important ingredient companies cannot attract or retain top talent In this book Hurley reveals a new model to measure and repair trust with colleagues managers and employees Outlines a proven Decision to Trust Model DTM of ten factors that establish whether or not one party will trust the other Filled with original examples from Daimler PriceWaterhouse Coopers Goldman Sachs Microsoft QuikTrip General Electric Procter and Gamble AzKoNobel Johnson and Johnson Whole Foods and Zappos Reveals how leaders in Asia Europe and North America have used the DTM to build high trust organizations Covering trust building in teams across functions within organizations and across national cultures *The Decision to Trust* shows how any organization can improve trust and the bottom line

The Moral Foundation of Economic Behavior David C. Rose, 2011-11-25 It then identifies specific characteristics that moral beliefs must have for the people who possess them to be regarded as trustworthy

Trust, Control, and the Economics of Governance Philipp Herold, 2019-06-05 In today's world we cooperate across legal and cultural systems in order to create value However this increases volatility uncertainty complexity and ambiguity as challenges for societies politics and business This has made governance a scarce resource It thus is inevitable that we understand the means of governance available to us and are able to economize on them Trends like the increasing role of product labels and a certification industry as well as political movements towards nationalism and conservatism may be seen as reaction to disappointments from excessive cooperation To avoid failures of cooperation governance is important control through e.g. contracts is limited and in governance economics trust is widely advertised without much guidance on its preconditions or limits This book draws on the rich insight from research on trust and control and accommodates the key results for governance considerations in an institutional economics framework It provides a view on the limits of cooperation from the required degree of governance which can be achieved through extrinsic motivation or building on intrinsic motivation *Trust Control Economics* thus inform a more realistic expectation about the net value added from cooperation by providing a balanced view including the cost of governance It then becomes clear how complex cooperation is about governance accretion where limited trustworthiness is substituted by control and these control instances need to be governed in turn *Trust Control and the Economics of Governance* is a highly necessary development of

institutional economics to reflect progress made in trust research and is a relevant addition for practitioners to better understand the role of trust in the governance of contemporary cooperation structures It will be of interest to researchers academics and students in the fields of economics and business management institutional economics and business ethics Note that this work is the first of its kind that explicitly reflects on the societal realities how these drive the assumption setting process and how these assumptions influence the theory outcome
