## **Hare And Critics Essays On Moral Thinking:**

**Hare and Critics** Douglas Seanor, R. M. Hare, 1990      **Hare and Critics** Douglas Seanor, N. Fotion, Richard Mervyn Hare, 1990 This collection of thirteen original essays by such well known philosophers as Thomas Nagel Peter Singer J O Urmson David A J Richards James Griffin R B Brandt John C Harsanyi T M Scanlon and others discusses the philosophy of R M Hare put forth in his book *Moral Thinking* including his thoughts on universalizability moral psychology and the role of common sense moral principles In addition Professor Hare responds to his critics with an essay and a detailed point by point criticism      *A Companion to Analytic Philosophy* A. P. Martinich, E. David Sosa, 2008-04-15 A Companion to Analytic Philosophy is a comprehensive guide to many significant analytic philosophers and concepts of the last hundred years Provides a comprehensive guide to many of the most significant analytic philosophers of the last one hundred years Offers clear and extensive analysis of profound concepts such as truth goodness knowledge and beauty Written by some of the most distinguished philosophers alive some of whom have entries in the book devoted to them      *Crucible of Reason* Keith David Wyma, 2004 Weakness of will seems to be an inherent part of the human condition We know what we ought to do and how often we knowingly willingly fall short in actual practice How can this be explained and what challenges does it present to systematic explanations of intentional actions In this clear incisive and well written inquiry philosopher Keith Wyma subjects the thought of three prominent intentional theorists R M Hare Donald Davidson and Thomas Aquinas to the crucible of reason to see whether and how they can account for weakness of will Wyma is careful to clarify which actions count as incontinent or the result of weakness of will they must be performed intentionally even as they are judged as something that ought not to be done His in depth study of Hare Davidson and Aquinas on this important issue is a major contribution to understanding practical rationality and intentional action      **Philippa Foot's Moral Thought** John Hacker-Wright, 2013-08-29 Philippa Foot 1920 2010 is widely regarded as one of the most important Anglophone moral philosophers of the 20th century She pioneered a distinctive approach to philosophical treatment of ethics using the tools of analytic philosophy She defended the objectivity of moral judgment and took controversial positions on abortion and euthanasia She was also a leading figure behind the revival of Aristotelian virtue ethics in contemporary philosophy This book represents the first comprehensive and accessible introduction to Foot's work It offers a complete chronological and thematic overview emphasising the role Foot played in the development of contemporary virtue ethics It situates her thought in the context of the historical development of analytic moral philosophy and discusses the various objections to her views Foot's writings take the form of essays that take up small problems within moral philosophy Yet John Hacker Wright argues that there is nevertheless a coherent systematic moral perspective throughout Foot's work that she does not make fully explicit This is the ideal introduction for students seeking a synthetic grasp of Foot's moral vision      **The Argument of Supererogation and the Limits of Duty in Applied Ethics** Marie-Luise Raters, 2025-09-30 Drawing on current research

this book demonstrates that there are rational reasons for why certain actions should reasonably not be considered duties despite their moral value Would you do something unpleasant or dangerous you are not obliged to simply because it would benefit others I won't do this because I don't have to This argument of supererogation can be used to reject overly demanding moral expectations Yet the argument is not always equally convincing For instance refusing to donate a kidney is morally accepted Refusing a favor to a friend however seems indecent Perhaps supererogatory acts do not exist at all This book offers a refined framework for understanding the boundaries of moral duty It is of interest to students and scholars of moral philosophy applied ethics and meta ethics

**Morality Without Foundations** Mark Timmons, 2004-11-18 Timmons defends an original metaethical view that exploits certain contextualist themes in philosophy of language and epistemology He advances a view that employs semantic contextualism when engaging in moral discourse

**Current Legal Problems 1998** M. D. A. Freeman, 2000 This book is the fifty first volume of Current Legal Problems and contains the now customary selection of high quality essays by a group of outstanding scholars This volume gathers together a particularly valuable and broad ranging set of contributions which makes for a stimulating study of legal theory at the end of the millennium

**Philosophy as a Humanistic Discipline** Bernard Williams, 2024-11-01 What can and what can't philosophy do What are its ethical risks and its possible rewards How does it differ from science In *Philosophy as a Humanistic Discipline* Bernard Williams addresses these questions and presents a striking vision of philosophy as fundamentally different from science in its aims and methods even though there is still in philosophy something that counts as getting it right Written with his distinctive combination of rigor imagination depth and humanism the book amply demonstrates why Williams was one of the greatest philosophers of the twentieth century Spanning his career from his first publication to one of his last lectures the book's previously unpublished or uncollected essays address metaphysics epistemology and ethics as well as the scope and limits of philosophy itself The essays are unified by Williams's constant concern that philosophy maintain contact with the human problems that animate it in the first place As the book's editor A W Moore writes in his introduction the title essay is a kind of manifesto for Williams's conception of his own life's work It is where he most directly asks what philosophy can and cannot contribute to the project of making sense of things answering that what philosophy can best help make sense of is being human *Philosophy as a Humanistic Discipline* is one of three posthumous books by Williams to be published by Princeton University Press In the Beginning Was the Deed Realism and Moralism in Political Argument was published in the fall of 2005 The Sense of the Past Essays in the History of Philosophy is being published shortly after the present volume

Rationality, Virtue, and Liberation Stephen Petro, 2013-11-19 This book explores the overlooked but vital theoretical relationships between R M Hare Alan Gewirth and Jürgen Habermas The author claims their accounts of value while failing to address classic virtue theoretical critiques bear the seeds of a resolution to the ultimate question What is most valuable These dialectical approaches as claimed justify a reinterpretation of value and value judgment according to the Carnapian

conception of an empirical linguistic framework or grammar Through a further synthesis with the work of Philippa Foot and Thomas Magnell the author shows that value would be literally meaningless without four fundamental phenomena which constitute such a framework Logical Judgment Conceptual Synthesis Conceptual Abstraction and Freedom As part of the grammar of goodness the excellence of these phenomena in a highly concrete way constitute the essence of the greatest good as this book explains

**Ethics** David Wiggins, 2006 Almost every thoughtful person wonders at some time why morality says what it says and how if at all it speaks to us David Wiggins surveys the answers most commonly proposed for such questions and does so in a way that the thinking reader increasingly perplexed by the everyday problem of moral philosophy can follow His work is thus an introduction to ethics that presupposes nothing more than the reader's willingness to read philosophical proposals closely and literally Gathering insights from Hume Kant the utilitarians and a twentieth century assortment of post utilitarian thinkers and drawing on sources as diverse as Aristotle Simone Weil and Philippa Foot Wiggins points to the special role of the sentiments of solidarity and reciprocity that human beings will find within themselves After examining the part such sentiments play in sustaining our ordinary ideas of agency and responsibility he searches the political sphere for a neo Aristotelian account of justice that will cohere with such an account of morality Finally Wiggins turns to the standing of morality and the question of the objectivity or reality of ethical demands As the need arises at various points in the book he pursues a variety of related issues and engages additional thinkers Plato C S Peirce Darwin Schopenhauer Leibniz John Rawls Montaigne and others always emphasizing the words of the philosophers under discussion and giving readers the resources to arrive at their own viewpoint of why and how ethics matters

**Biodiversity and Democracy** Paul Malcolm Wood, 2000 This work argues that the problem of extinction can be traced to how we think about biodiversity and democratic societies While biodiversity is usually confused with biological resources Wood argues that it should be conceived as an essential environmental condition

**Thick Concepts** Simon Kirchin, 2013-04-25 What is the difference between judging someone to be good and judging them to be kind Both judgements are typically positive but the latter seems to offer more description of the person we get a more specific sense of what they are like Very general evaluative concepts such as good bad right and wrong are referred to as thin concepts whilst more specific ones including brave rude gracious wicked sympathetic and mean are termed thick concepts In this volume an international team of experts addresses the questions that this distinction opens up How do the descriptive and evaluative functions or elements of thick concepts combine with each other Are these functions or elements separable in the first place Is there a sharp division between thin and thick concepts Can we mark interesting further distinctions between how thick ethical concepts work and how other thick concepts work such as those found in aesthetics and epistemology How if at all are thick concepts related to reasons and action These questions and others touch on some of the deepest philosophical issues about the evaluative and normative They force us to think hard about the place of the evaluative in a seemingly nonevaluative world and raise

fascinating issues about how language works      The Development of Ethics, Volume 3 Terence Irwin, 2009-09-10 This book is a selective historical and critical study of moral philosophy in the Socratic tradition with special attention to Aristotelian naturalism It discusses the main topics of moral philosophy as they have developed historically including the human good human nature justice friendship and morality the methods of moral inquiry the virtues and their connexions will freedom and responsibility reason and emotion relativism subjectivism and realism the theological aspect of morality The first volume discusses ancient and mediaeval moral philosophy The second volume examines early modern moral philosophy from the 16th to the 18th century This third volume continues the story up to Rawls's Theory of Justice A comparison between the Kantian and the Aristotelian outlook is one central theme of the third volume The chapters on Kant compare Kant both with his rationalist and empiricist predecessors and with the Aristotelian naturalist tradition Reactions to Kant are traced through Hegel Schopenhauer Nietzsche and Kierkegaard Utilitarian and idealist approaches to Kantian and Aristotelian views are traced through Sidgwick Bradley and Green Mill and Sidgwick provide a link between 18th century rationalism and sentimentalism and the 20th century debates in the metaphysics and epistemology of morality These debates are explored in Moore Ross Stevenson Hare C I Lewis Heidegger and in some more recent meta ethical discussion This volume concludes with a discussion of Rawls with special emphasis on a comparison of his position with utilitarianism intuitionism Kantianism naturalism and idealism Since this book seeks to be not only descriptive and exegetical but also philosophical it discusses the comparative merits of different views the difficulties that they raise and how some of the difficulties might be resolved It presents the leading moral philosophers of the past as participants in a rational discussion in which the contemporary reader can participate      **Morality and Rational Choice** J. Baron, 2012-12-06 Public controversies such as those about the distribution of goods between rich and poor trade and population policies allocation of medical resources and the tradeoff between environmental protection and economic efficiency often hinge on fundamental views about how we ought to make decisions that affect each other that is what principles we ought to follow Efforts to find an acceptable public philosophy a set of such principles on which people might agree have foundered because of disagreement among philosophers and others who are concerned with such issues One view which I shall develop and defend here holds that decisions that affect others should be made according to an overall evaluation of the consequences of each option This consequentialist view is opposed by a variety of alternatives but many of the alternatives have in common a basis in moral intuition To take a simple example consequentialism holds that other things equal if we have decided that it is better to let a terminally ill patient die than to prolong her agony by keeping her alive then we ought to kill her      Animal Suffering: Philosophy and Culture E.

Aaltola, 2012-07-31 Exploring how animal suffering is made meaningful within Western ramifications the book investigates themes such as skepticism concerning non human experience cultural roots of compassion and contemporary approaches to animal ethics At its center is the pivotal question What is the moral significance of animal suffering      *Routledge*

*Encyclopedia of Philosophy: Index* Edward Craig, 1998 Volume seven of a ten volume set which provides full and detailed coverage of all aspects of philosophy including information on how philosophy is practiced in different countries who the most influential philosophers were and what the basic concepts are

**Kantian Ethics Almost without Apology** Marcia W. Baron, 2018-10-18 A reappraisal on the emphasis on duty in Immanuel Kant's ethics is long overdue Marcia W Baron evaluates and for the most part defends Kantian ethics against two frequent criticisms that duty plays too large a role leaving no room for the supererogatory and that Kant places too much value on acting from duty The author first argues that Kant's distinction between perfect and imperfect duties provides a plausible and intriguing alternative to contemporary approaches to charity self sacrifice heroism and saintliness She probes the differences between the supererogationist and the Kantian exploring the motivation between the former's position and bringing to light sharply divided views on the nature of moral constraint and excellence Baron then confronts problems associated with Kant's account of moral motivation she argues that the value that Kant attaches to acting from duty attaches primarily to governing one's conduct by a commitment to doing what morality asks Thus understood Kant's ethics steers clear of the most serious criticism Of special interest is her discussion of overdetermination Clearly written and cogently argued *Kantian Ethics Almost without Apology* takes on the most philosophically intriguing challenges to Kantian ethics and subjects them to a rigorous yet sympathetic assessment Readers will find here original contributions to the debate over impartial morality

[The Temptations of Evolutionary Ethics](#) Paul Lawrence Farber, 1994 Evolutionary theory tells us about our biological past can it also guide us to a moral future Paul Farber's compelling book describes a century old philosophical hope held by many biologists anthropologists psychologists and social thinkers that universal ethical and social imperatives are built into human nature and can be discovered through knowledge of evolutionary theory Farber describes three upsurges of enthusiasm for evolutionary ethics The first came in the early years of mid nineteenth century evolutionary theories the second in the 1920s and 30s in the years after the cultural catastrophe of World War I and the third arrived with the recent grand claims of sociobiology to offer a sound biological basis for a theory of human culture Unlike many who have written on evolutionary ethics Farber considers the responses made by philosophers over the years He maintains that their devastating criticisms have been forgotten thus the history of evolutionary ethics is essentially one of oft repeated philosophical mistakes Historians scientists social scientists and anyone concerned about the elusive basis of selflessness altruism and morality will welcome Farber's enlightening book

[Towards Reunion in Ethics](#) Jan Österberg, 2019-05-21 This posthumous publication attempts to answer the question of what moral code is the most reasonable Philosophers often turn to consequentialism or deontological ethics to address this issue As the author points out each has valid arguments but each is unable to get the other side to agree To rectify this he proposes a third way Inside readers will discover a theory that tries to do justice to both sides The author first details consequentialism and deontological ethics He also explains their fundamental conflict One holds the view that you should do what has the best

consequences The other believes that there are actions which are wrong to do even if they have the best consequences Next the volume considers various ways to solve this conflict Would rejecting one theory work Or is it possible to somehow reconcile them The author shows why these solutions fail He then goes on to present his own The resulting contractual theory brings together the two opposing ethical convictions It proposes that what is right and wrong depends on what norms people would agree to Throughout coverage explores the psychological sociological and historical background of the moral theories discussed The reason is that moral theories are embedded in social and psychological contexts They are better understood when the contexts are explicit This key feature distinguishes the volume from other works in moral philosophy At the time of his death in July 2011 Jan sterberg was close to completing this manuscript It was taken up and fully completed by Erik Carlson and Ryszard Sliwinski both of Uppsala University
