GroundWork for Community-Based Conservation Diane Russell, Camilla Harshbarger, 2003-05-13 While ecological and biophysical sciences have dominated the theory and practice of conservation practitioners and researchers worldwide know that conservation initiatives have profound social impacts and consequences for local communities and cultures This concise and accessible book will give students and practitioners a solid introduction to important methods from ethnography and interviews to surveys and community mapping always attending to the imperatives of local control and community partnerships

Global Visions, Local Landscapes Lisa L. Gezon, 2006-09-15 In her new book Gezon argues that local events continuously redefine and challenge global processes of land use and land degradation She challenges analytical distinctions between separate local and global spaces rather proposing that the global is one aspect of the local to the extent that people in any given locale must act within the parameters of policies authorities and material conditions that have sources outside of the reach of immediate local networks Her ethnographic study of Antankarana identifying rice farmers and cattle herders in northern Madagascar weaves together an analysis of remotely sensed images of land cover over time with ethnographies of situated negotiations between human actors She focuses in particular on the interplay of political authorities including family based elders a regional indigenous authority and an NGO charged with enforcement of conservation policies in the context of specific contests over resource access Gezon takes a micro political approach in evaluating conflicts that result in a change in control over local resources by global or supra national policies capital or personnel Her book will be particularly valuable to researchers and students in anthropology geography sociology and environmental studies and those involved in conservation and resource management

From Global Policy to Local Reality at a World Heritage Site Daniela Niemeier, 2019-03-27 This paper examines existing challenges to the implementation of global United Nations policy guidelines on issues of outreach and adult education as contained in the Convention on Biological Diversity CBD on the local level using the Laughing Bird Caye National Park a World Heritage Site co managed by the Friends of Nature organization as an example For this analysis of conservational and educational issues central categories such as livelihood empowerment community participation and community education which are included in the new paradigm of protected areas management compose the contextual backbone of the research By use of Niklas Luhmann s system theory a dimensional theoretic embedding allows for the determination of communication processes between organizations of different levels and shapes In the Caribbean region examined the offshore reef and also the livelihood of the inhabitants of the coastal area are threatened Information on local living conditions in social and economic

terms as well as their impact on and interactions with the natural environment is provided The cross cutting issues covered by the framework of the CBD as listed under Article 13 target Communication Education and Public Awareness CEPA The case analysed in this paper is schematically positioned according to its provisions in terms of space and habitats as pertaining to programmatic domains of the CBD A multi level analysis of the systemic interrelation between global policy and local reality is conducted Problems that hinder conservationally sound and time efficient communication processes are identified by means of a case study on the local organization and found to be primarily caused by insufficient management Further obstructive influences from the national and global levels are identified And include a lack of coordination and collaboration Findings of the thesis indicate a need for increased networking and more transparency regarding decision making these are strongly recommended for better practices on site and improvements for systemic communication development and information exchange worldwide

Nature and Culture Sarah Pilgrim, Jules N. Pretty, 2010-09-23 There is a growing recognition that the diversity of life comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity

Conservation Social Science Daniel C. Miller, Ivan R. Scales, Michael B. Mascia, 2023-01-19 Groundbreaking book that examines the essential contribution of the social sciences to understanding and conserving biodiversity across the globe Authored by leading scholars at the nexus of social science and biodiversity conservation Conservation Social Science addresses the growing realization that biodiversity conservation is at heart a social

phenomenon Threats to biological diversity are influenced by a wide range of political economic and cultural factors The conservation of biodiversity is conceived and carried out by people Biodiversity conservation is a manifestation of human beliefs and values Choices about which species and habitats to conserve how to prioritize efforts and how to conserve them are inherently social with consequences not just for wildlife but also human lives and livelihoods Key topics covered in this thought provoking text include An introduction to key social science disciplines and how each field specifically relates to biodiversity conservation How to make social sciences an integral part of conservation strategies and initiatives How social science theories and analytic approaches can explain and help predict patterns of human behavior How biodiversity conservation as a ubiquitous societal phenomenon can provide insights into human society in general Conservation Social Science is an essential one of a kind survey of novel approaches to explaining and fostering more effective just and enduring conservation of biodiversity It is academically rigorous and comprehensive in scope yet sufficiently nontechnical and concise to be accessible to a global audience of students faculty and environmental professionals and policymakers **Forest**

Community Connections Ellen M. Donoghue, Victoria E. Sturtevant, 2010-09-30 The connections between communities and forests are complex and evolving presenting challenges to forest managers researchers and communities themselves Dependency on timber extraction and timber related industries is no longer a universal characteristic of the forest community Remoteness is also a less common feature as technology workforce mobility tourism and amenity migrants increasingly connect rural to urban places Forest Community Connections explores the responses of forest communities to a changing economy changing federal policy and concerns about forest health from both within and outside forest communities Focusing primarily on the United States the book examines the ways that social scientists work with communities their role in facilitating social learning informing policy decisions and contributing to community well being Bringing perspectives from sociology anthropology political science and forestry the authors review a range of management issues including wildfire risk forest restoration labor force capacity and the growing demand for a growing variety of forest goods and services They examine the increasingly diverse aesthetic and cultural values that forest residents attribute to forests the factors that contribute to strong and resilient connections between communities and forests and consider a range of governance structures to positively influence the well being of forest communities and forests including collaboration and community based forestry **Beyond the Biophysical** Laura German, Joshua J. Ramisch, Ritu Verma, 2010-06-10 Beyond the

Biophysical provides a broad overview of agriculture and natural resource management NRM scholarship and practice that lies beyond the biophysical emphasizing instead epistemological cultural and political foundations of NRM The volume is oriented toward professionals with expertise in agriculture and natural resource management scholarship and practice but who lack exposure to the conceptual and methodological underpinnings of critical theory the anthropology of development ecological anthropology and other relevant scholarship It therefore follows common standards of academic rigour but

minimizes the use of jargon integrates detailed case studies with conceptual syntheses and attempts to move from critique to concrete recommendations for scholarship and practice The volume seeks to foster a more nuanced and responsible engagement with local communities and the natural world among NRM scholars and practitioners

The International Handbook of Environmental Sociology M. R. Redclift, Graham Woodgate, 2010-01-01 Acclaim for the first edition The scope of the volume is vast and overall the Handbook amounts to an almost encyclopaedic reference text for scholars of environmental questions across the social sciences be they in sociology geography political science or wherever Neil Ward Environmental Politics Each author writes with a distinctive style yet the work flows well because the editors selected recognized scholars with outstanding credentials Academic libraries especially those serving a strong social science community will find this work a worthwhile addition Professors of sociology and environmental studies could use the essays for additional readings and reviews Marjorie H Jones American Reference Books This International Handbook is an important addition to the growing concern and publication in the field of environmental sociology Certainly any serious scholar in the field should find this edited reference work of interest John J Hartman International Social Science Review This thoroughly revised Handbook provides an assessment of the scope and content of environmental sociology and sets out the intellectual and practical challenges posed by the urgent need for policy and action to address accelerating environmental change More than a decade has passed since the first edition of the Handbook was published to considerable acclaim and environmental sociology has since become firmly established as a critical social science discipline This second edition is a major interdisciplinary reference work comprising more than 25 original essays authored by leading scholars many of whom are intimately involved in national regional or global environmental policy processes It marks some of the changes and continuities in the field of environmental sociology and highlights today s substantive concerns and theoretical debates The Handbook is divided into three parts covering concepts and theories critical issues and international perspectives each with an introduction outlining the content of the constituent chapters and cross referencing some of the more significant themes that link them together Authoritative and comprehensive this Handbook will prove to be essential reading for academics researchers and students across the social sciences who are interested in the environment It will also be enthusiastically received by sustainable development policy makers and practitioners

The Encyclopedia of Sustainable Tourism Carl I Cater, Brian Garrod, Tiffany Low, 2015-10-01 Tourism is the world s fastest growing industry and impacts globally upon ecology economies peoples cultures and the built environment Development therefore must be sustainable and sympathetic in order to preserve the environment and culture it exploits Despite sustainable tourism being an area of considerable recent interest there has been no synthesis of the diverse considerations of sustainable tourism and the language and terms particular to this subject An important resource for researchers of tourism this reference work defines and explains terms associated with considering and preserving the environment host peoples communities cultures customs lifestyles and social

and economic systems **The Complex Forest** Carol J.P. Colfer, 2010-09-30 The Complex Forest systematically examines the theory processes and early outcomes of a research and management approach called adaptive collaborative management ACM An alternative to positivist approaches to development and conservation that assume predictability in forest management ACM acknowledges the complexity and unpredictability inherent in any forest community and the importance of developing solutions together with the forest peoples whose lives will be most affected by the outcomes Building on earlier work that established the importance of flexible collaborative approaches to sustainable forest management The Complex Forest describes the work of ACM practitioners facing a broad range of challenges in diverse settings and attempts to identify the conditions under which ACM is most effective Case studies of ACM in 33 forest sites in 11 countries together with Colfer's systematic comparison of results at each site indicate that human and institutional capabilities have been strengthened In Zimbabwe for example the number of women involved in decisionmaking soared In Nepal community members detected and sanctioned dishonest community elites In Cameroon and Bolivia learning programs resulted in better conflict management These are early results but a wide range of recent research supports Colfer's belief that these new capabilities will eventually contribute to higher incomes and to sustainable improvements in the health of forests and forest peoples The Complex Forest reinforces calls for change in the way we plan conservation and development programs away from command and control approaches toward ones that require bureaucratic flexibility and responsiveness as well as greater local participation in setting priorities and problem solving Settlement Patterns and Ecosystem Pressures in the Peruvian Rainforest: Understanding the Impacts of Indigenous Peoples on Biodiversity Rodolfo Tello, 2016-06-11

Hunting Practices of the Wachiperi Rodolfo Tello, 2016-12-14 When it comes to environmental conservation and sustainable development initiatives in tropical forests indigenous peoples are key players They have been described often as either conservationists or destroyers of biodiversity The position adopted on this matter is important because it guides the design and implementation of conservation strategies The central question about what makes indigenous peoples conserve or degrade biodiversity however has posed a significant challenge particularly in light of widespread trends such as cultural change market expansion and greater diversification of livelihoods The reasons why indigenous communities end up degrading or conserving natural resources are addressed in a comprehensive yet accessible manner in this book filling a critical gap in current knowledge about the socioeconomic drivers of biodiversity loss and the rise of community based conservation using the hunting trends and conservation efforts of the Wachiperi for this analysis Readers could greatly benefit from the lessons provided in this book about achieving both socioeconomic development and biodiversity conservation by engaging indigenous communities in a sustainable manner **The British National Bibliography** Arthur James Wells, 2004 *Indigenous Peoples and Tropical Biodiversity: Analytical Considerations for Conservation and Development* Rodolfo Tello, 2015-02-20 **Politeia**, 2009 English and Afrikaans with abstracts in English **Ground**
